Presentation

As it was the case with the last 10 Annual Reports that I had the opportunity to introduce, the scientific and institutional performance of the IR-IIB Sant Pau along the year 2018 was once again encouraging.

The analysis of the scientific indicators and the various innovation and dissemination activities developed through 2018 clearly shows a continuity with respect to the sustained growth achieved during the last 10 years. Then, once more I have the pleasure and the pride to congratulate all members of the IR-IIB Sant Pau - researchers, technicians, managers, and the associated institutions- for their work and the outstanding achieved results.

Regarding the 'classic' scientific indicators, along 2018 the IIB community of research published 1168 documents of which 813 were original articles. The overall impact factor (IF) of these documents reached 5.220 points with a mean IF of 5,19. We have maintained -and for some indicators improved- the achievements of 2017, that was a very good year for the scientific production of the Institute. On the innovation chapter, 22 families of patents were active during 2018 and two new patent requests were made; two new transference agreements were signed; two new spin-offs and two new start-ups were founded; two products were licensed and the Institute earned 130.000 euros for shared ownership agreements with companies. Added to the various dissemination of scientific activities promoted our Research Groups, with workshops, courses, seminars and conferences, the Scientific Seminars of the IIB Sant Pau continued to be lectured by recognised investigators from the national and international research community and have become a traditional and frequent appointment for our research community.

Nevertheless, the most outstanding achievement was the opening of the new Research Building that we inaugurated on the last quarter of 2018. This facility will not only positively change the way our experimental groups work but adds another milestone to the more than 600 hundred years of history of the main partner of the IIB by being the first building of the Hospital de la Santa Creu i Sant Pau Campus devoted entirely to translational research. The new Research Building, costed a total of 17 million euros and included the cost of the adjoining provisional spaces until the new building was fully functioning. The funding of the project was possible with a 9 million loan to the IR from the Spanish Ministry for Health, through the Carlos III Institute, up to 5 million euros in aids from the European Regional Development Fund, administered by the Secretary's Office of Universities and Research of the Government of Catalonia and loans from the Council of Europe Development Bank (CEB), and a contribution of 12 million euros provided by the Santa Creu i Sant Pau Hospital's Private Foundation for the return of all loans. The new Research Building was designed to have low energetic consumption and their facades also aimed to dialogue with the nearby existing art nouveau constructions of the Recinte Modernista, which are declared UNESCO World Heritage. Erected both as a symbol of the tight link of our investigators to the translational and clinical research and as an original architectural solution, an elevated tunnel communicates the research building to the medical facilities of Sant Pau Hospital.

Further to the other IIB facilities devoted to clinical research at the Sant Pau Campus, the new Research Building concentrates most of our human and material resources destined

to experimental and translational research, with complementary support services covering the main areas of biomedicine. The modern facilities with work spaces without separations between groups break with the tradition of compartmentalized laboratories and allows for a more cooperative interaction between researchers from different lines and will allow for a rational growth of research groups at Sant Pau. Moreover, the Research Building has allowed us to modernize and expand the facilities for first administrations of drugs (phase I studies) of the Drug Research Center (CIM Sant Pau). New spaces adapted to the special population in the area of cancer and hematological malignancies will extend the international competitive offer of the CIM. The new Research Building is also a management and administration center for the hospital's research resources and a place to transfer research activities to the public health system. This new structure also aims to be a pole of attraction for other partnerships and research groups from around the world with the aim of strengthening interrelations and increasing the added value of Sant Pau's researchers.

Another very important milestone of 2018 was the effective incorporation of the Catalan Institute for Cardiovascular Research (ICCC) to Sant Pau Research Institute (IR). Besides the ICCC being a scientific partner and founder of the IIB Sant Pau, from January 1st 2018 and with the support of the CERCA Program all the researchers and most of the technicians and managers of the ICCC are fully and satisfactorily incorporated to carrying the legal structure of the IR Sant Pau. I have to thank the heavy efforts of the managers of the IR for this achievement and also to Professor Badimon, the former Director of the ICCC, for her positive view of the integration and her confidence on the future of the Institute.

I want to also acknowledge the contribution of the IIB community on the writing of the IIB Sant Pau 2019-2022 Strategic Plan for Innovation and Research. This third Scientific Plan of the Institute was a model of involvement of the personnel of the IIB in thinking and defining the future of the Institute. Different participative activities allowed researchers, technicians, administrators and scientific managers to deliberate about the present and future situation of the IIB Sant Pau. They identified strengths, weaknesses, opportunities, and threats that served to elaborate the 2019-2022 Strategic Plan that was approved in 2018 by the Governing Council of the IIB Sant Pau. The Plan identified five strategic axes: scientific excellence, internationalization and strategic alliances, innovation and transfer, scientific support services and fundraising and sustainability. Attracting more resources from clinical trials, internationalization and transfer, will contribute to maintain the finances of the Research Institute (the IIB manager) which in the immediate future will have to face economic challenges derived from episodic a diminution on the regular structural support provided to the IR.

Finally, after most than ten years at the forefront of the Institute, I have the sensation of 'work been done' and that the time has arrived for me to take a step aside from the Direction of the IIB. I firmly believe that for institutional health it is judicious not to excessively prolong the same executive position and that a change after two consecutive periods is advisable.

Among other attainments I have had the honor to lead the formation of the IIB Sant Pau, the formation of the scientific support platforms, the refurbishing of the old buildings that formed the Contingency Plan to transitorily allocate platforms and research groups in parallel to the gathering of resources to construct the New Research Building, the accreditation and re-accreditation of the IIB Sant Pau by the Carlos III Institute and the CERCA system, and the conception and execution of two Strategic Plans of the Institute. I have to give full credit for these and other achievements to my collaborators at the IR. This is also the place to acknowledge the support of the researchers, the members of the External and Internal Scientific Advisory Boards, the Governing Council of the IIB Sant Pau and the Board of Trustees of the Research Institute for giving me and my team their confidence in difficult times. At the time of writing this introduction, the process of the selection of a new Director conducted by the Scientific Advisory Board, the CERCA Institution, and the Board of Trustees, is almost finished. I wish the new Director all the success in conducting the mission of the IIB Sant Pau: fostering high quality research and innovation and promoting its translation into regular practice, with the aim of responding to the health problems of the community.

IIB Sant Pau Entities

Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation

The Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation (HSCSP Healthcare Management Foundation) is a high-technology specialist care hospital performing patient care, teaching and research activities in the clinical, epidemiological and healthcare services fields. It offers accredited specialist and undergraduate health science training courses.

Hospital de la Santa Creu i Sant Pau Research Institute Foundation

The Hospital de la Santa Creu i Sant Pau Research Institute Foundation (HSCSP RI) promotes, manages and communicates biomedical research conducted in the HSCSP. It raises and manages funds and other resources for health science research in the basic, clinical, epidemiological and healthcare service fields.

Hospital de la Santa Creu i Sant Pau Private Foundation

The Hospital de la Santa Creu i Sant Pau Private Foundation (HSCSP Private Foundation), which owns the HSCSP, is responsible for building, improving and maintaining buildings and premises used for medical care and associated and complementary activities.

Autonomous University of Barcelona (UAB) - Ageing Institute

The UAB, a leading university renowned for quality and innovation in research, coordinates an influential scientific and technological centre, called Esfera UAB, responsible for promoting new business projects. The UAB also projects its productive activity in such a way as to disseminate new knowledge in society.

Fundació Puigvert

Puigvert Foundation

The Puigvert Foundation has the aim of deepening medical knowledge and perfecting medical techniques in the field of research and treatment of urinary and male reproductive system disorders and diseases. More specifically, it performs urology, nephrology and andrology research, focusing particularly on medical care, teaching, training and studies.

Iberoamerican Cochrane Centre

This independent, not-for-profit organization has as its main aim the promotion of medical practice based on the best available scientific evidence. To this end, it ensures that valid, useful, up-to-date and thoroughly reviewed information is made available for clinical and healthcare decision making.

Barcelona-Sardenya Primary Care Centre

Part of the public healthcare system, this teaching and care centre provides primary care services in its catchment area of Barcelona and has a research unit which performs clinical trials and epidemiology studies.

CSB Consorci Sanitari de Barcelona

ASB Agència de Salut Pública

Public Health Agency of Barcelona

This autonomous body, created by the Barcelona Health Consortium, has as its main mission to analyse and monitor the health of the population of Barcelona with a view to improving health and preventing risk. It is also responsible for epidemiological surveillance and the provision of medical care to substance abusers. It has an excellent track record in the public health and applied research fields.

Blood and Tissue Bank

The Blood and Tissue Bank is a public healthcare body which carries out patient care, teaching and research activities in the blood transfusion and tissue bank fields.

Vertical Areas of Research

Cardiovascular Diseases

The incorporation of new technologies that facilitate molecular profiling and gene regulation has led to innovative research into heart disease. The great diversity of the groups in this area gives research varied perspectives, whether in developing or testing the effectiveness of new biomarkers (as in the investigation of the metabolic and genetic bases of diseases) or improving the range of results and possible applications in short-term therapies.

Genetic, Metabolic and Inflammatory Diseases

Identifying the genes and mutations responsible for genetic diseases is an essential component of knowledge and understanding of the physiological bases of metabolic pathways and also in the development of new forms of treatment for common diseases affecting large proportions of the population, such as diabetes and obesity, known but with a hereditary diseases, infectious diseases (AIDS, tuberculosis, etc) and rare diseases (not well know but with a devastating impact on those affected).

Haematological and Oncological Diseases

A broad range of research is conducted in this area, particularly in head-and-neck, breast, ovary, colorectal and haematological cancers, among others. Research in covers a wide range of fields, with disciplines that include nanomedicine, new anticancer agents and predictive molecular markers. Initiatives of specific relevance include the GAIT (Genetic Analysis of Idiopathic Thrombophilia) project, a world pioneer in the identification of genes influencing the risk of thromboembolic disease, and research into antitumour immunotherapy in animals and humans.

Neurological, Mental Disorders and Ageing

This area covers research in a broad range of disciplines. Besides the study of ageing and the most common neurodegenerative disorders such as Alzheimer and Parkinson, neurological research is also focused on stroke, neuroimmunology and neuromuscular diseases. Research into cognitive, affective, psychotic and personality disorders ranges from identification and evaluation of new therapeutic targets to neurogenesis and the effects of deep-brain stimulation. Research in this field has the support of the Drug Research Centre, which assesses the effectiveness of new drugs and therapies in humans.

Uronephrology and Experimental Surgery

IIB Sant Pau promotes experimental surgery in the knowledge that this area has a promising future both as an independent research line and as a complement to general surgery. This interdisciplinary approach provides valuable new insights and ensures techniques and procedures of great clinical relevance. Current areas of interest include the development of minimally invasive techniques and the application of deep-brain stimulation in different pathologies. In the fields of andrology, urology and nephrology research, the Puigvert Foundation is a leading centre in Spain.

Transversal Areas of Research

Epidemiology, Public Health and Healthcare Services

Research in these fields aims to determine the magnitude and distribution and identify the determinants of public health problems in order to evaluate the effectiveness and efficiency of public interventions and prevention practices. This area also aims to reduce patient risk and make healthcare safer by promoting evidence-based medical practice and ensuring the use of conscious, explicit and rational decision making concerning patient care.

Molecular, Genomic, Cellular and Kinetic-Dynamic Bases for Diseases and their Treatment

This area focuses on the structure of proteins associated with neurodegenerative diseases and inflammatory processes and on factors linked to the innate immune system. Research is also conducted in the area of osteoporosis, ageing-related macular degeneration and coagulation-cascade factors closely linked to cardiovascular disease and haemophilia. Such studies are vital to the understanding of diseases of the heart, blood and nervous systems and to advances in the fields of cancer and epidemiology.

Associated Groups

This area includes HSCSP Research Institute groups that do not form part of IIB Sant Pau because they have not, as yet, been accredited by the External Scientific Committee.

Financial Data

Below, we highlight some economic data. The first graph shows the evolution of the public and private funds collected by IIB Sant Pau during the period between 2013 and 2018, and the 2018 results account.

On the exercise 2018 we were not able to fulfill part of the operational financing planned in the sustainability plan, which would have allowed us to close with positive numbers.

We would like to highlight the integration of the Consorci Institut Català de Ciències Cardiovasculars, that was carried out on January 1st 2018.

Inauguration of the new building of the Sant Pau Research Institute

On 15 November 2018, the President of the Generalitat de Catalunya, Molt Honorable Mr Joaquim Torra, inaugurated the new building of the Sant Pau Research Institute.

At the initiative of the Research Institute, the Fundació Privada de l'Hospital de la Santa Creu i Sant Pau has promoted the construction of this new facility for research, which brings together in a single building the facilities dedicated to this activity.

The total cost of the new research building in the Sant Pau was 17 million euros.

The new construction, financed by the Fundació Privada Hospital de la Santa Creu i Sant Pau with a minimum contribution of 12 million euros, has a subsidy of up to 5 million euros from European FEDER funds, managed by the Secretaria d'Universitats i Recerca del Departament d'Empresa i Coneixement de la Generalitat de Catalunya. The global financing of the project includes from the contingencies of the provisional spaces to the start-up of the new building, and has been possible with two loans, one from the Ministry of Health, through the Carlos III Institute, and another from the Council of Europe Development Bank (CEB), through Caixabank.

New spin-off to develop a nanomedicine for the treatment of cancer

Researchers from the Research Institute of Sant Pau, the Institute of Biotechnology and Biomedicine of the Autonomous University of Barcelona, and the CIBER of Bioengineering, Biomaterials and Nanomedicine have developed a nanomedicine for the treatment of metastasis through selective elimination of tumor stem cells. It is a system based on nanoparticles that transport a chemotherapeutic drug and release it into cancer cells.

The team of researchers, led by Ramon Mangues, of the Oncogenesis and Antitumour Group of the Research Institute of Sant Pau and Esther Vázquez and Antonio Villaverde, of the UAB, has created a pro-

totype of the drug and have carried out in vivo clinical trials in animal models of colorectal cancer, which have shown their efficacy, selective biodistribution and low toxicity. Now, in order to promote the development of the drug towards the clinic, they have created the spin-off Nanoligent, led by Manuel Rodríguez, a professional with experience in the field of investment and the creation and growth of biotech companies.

The technology has been presented at the main international patent offices. The European Patent Office (EPO) and the United States Patent and Trademark Office (USPTO) have granted three patents that protect it and have already been licensed to the Nanoligent company.

Sant Pau and CIBERCV describe a new technique for detecting scars after myocardial infarction by bioimpedance

Researchers from the Centro de Investigación Biomédica en Red de Enfermedades Cardiovascular (CIBERCV) of the Joan Cinca de San Pablo group have recently described a new technique to identify areas of scarring in patients with myocardial infarction by means of endocardium mapping of tissue electrical impedance.

In a preclinical study carried out in a porcine model of chronic myocardial infarction, it is evident that this procedure can allow recognition of the scar of the infarction and, theoretically, is not influenced by changes in the cardiac activation sequence. "Accurate identification of scar areas is essential for electrical ablation of arrhythmias in patients with myocardial infarction to provide optimal results," says Dr. Cinca.

New IIB Sant Pau research group created in pharmacogenomics and neurovascular genetics

The research group in pharmacogenomics and neurovascular genetics, led by Dr. Israel Fernández, has recently joined the Biomedical Research Institute of the Santa Creu i Sant Pau Hospital (IIB Sant Pau), as an Emerging Group. The new group focuses its research mainly on genetic and epigenetic studies of stroke. He also studies the intestinal microbiota to learn about the relationship of these microorganisms with the possibility of suffering a stroke. The group also investigates the evolution of patients after having a stroke.

News From NEURON Cofund

NEURON 2018 Call for Proposals for Transnational Research Projects on Mental Disorders is closed. 124 preproposals were submitted, involving 533 research groups

JTC 2017 on "Synaptic Dysfunction in Disorders of the Central Nervous System" - 12 projects were chosen for funding out of 93 pre-proposals. Total grant volume for the 12 projects: 12.4 m€

The ERA-NET Neuron Newsletter of June has been published where the groups that were awarded with an ERA-NET grant are presented. Among them, the work coordinated by Dr. Àlex Bayés from IIB Sant Pau is presented. The project title is "Synaptic Dysfunction in Intellectual Disability Caused by SYNGAP1. Translational Research to Develop Human Models and Advance Pharmacological Treatments". This grant will allow an important advance in the research on the dysfunction of the neuronal synapses, in the Intellectual Disability caused by SYNGAP1.

Our spin-off company GlyCardial Diagnostics has received the SME instrument phase II funding of the H2020 programme

We are proud to announce that our spin-off company GlyCardial Diagnostics has received the SME instrument phase II funding of the H2020 programme to advance in the development of our novel test for the early detection of cardiac ischemia in their first trial. It is highly motivating to see that the EU trusts in young and innovative projects.

A blood biomarker allows the early detection of Alzheimer's disease in people with Down syndrome

A study published in The Lancet Neurology magazine, led by Dr. Rafael Blesa, director of the Neurology Service of Sant Pau and with the support of "la Caixa" Welfare Projects, points to a paradigm shift in the diagnosis of Alzheimer's disease in people with Down syndrome, at through the detection of NfL as plasma biomarker and cerebrospinal fluid.

The Lancet Neurology magazine, a reference in Neurology, publishes an article led by Dr. Rafael Blesa, on the advances in the detection of Alzheimer's in people with Down syndrome.

Dr. Kulisevsky leads a clinical trial for a Huntington's disease drug

The essay, led by neurologist Jaume Kulisevsky, scientific director of the Sant Pau Research Institute and director of the Parkinson's and Movement Disorders Unit of the Neurology Service of the Hospital Sant Pau, will be carried out in the Hospital Sant Pau together with three more Catalan centers. The objective of this clinical trial, a phase IIa study, is to determine the efficacy and safety of SOM3355 -a drug that is currently prescribed for hypertension in humans- in 30 patients with Huntington's disease.

Nanoligent in the news: "A nanodrug selectively eliminates metastatic mother cells in animals"

NANOLIGENT

In June 2017, researchers from the IIB-Sant Pau, the Institute of Biotechnology and Biomedicine at the UAB and the CIBER-BBN, created a spin-off, Nanoligent, with the goal of developing the first drug designed to eliminate metastatic cells that could enter the market.

This company, which has more than 10 years of studies behind, is directed by Dr. Manuel Rodríguez Mariscal, a professional with a long experience in the field of investment and the creation of biotechnology companies and aims to obtain funding for the realization of the project.

The research team, led by Dr Ramon Mangues (IIB Sant Pau), Prof Antonio Villaverde (UAB) and Dr Esther Vázquez (UAB), all members of the CIBER-BBN, have demonstrated that the drug acts only on metastasis initiating cells, through the specific interaction between a peptide present in the protein nanoparticle that transports it and the cellular receptor CXCR4 that is overexpressed in tumour cells. This allows targeting only tumour cells, to block their dissemination at early cancer stages, by preventing the appearance of metastasis while avoiding the adverse effects associated with conventional chemotherapy.

The José Carreras Foundation promotes the first clinical trial in Europe of CAR-T immunotherapy for T lymphomas and Hodgkin's lymphoma at the Hospital de Sant Pau

The José Carreras Leukaemia Foundation and the Hospital de Sant Pau presented today at a press conference the campaign "The factory of unstoppable cells", a clinical trial of immunotherapy CAR-T to offer an opportunity to lymphoma patients who no longer have other therapeutic possibilities available due to the resistance of their diseases to the usual treatments. The project, unique in the world for its characteristics, will be developed entirely in the Hospital de la Santa Creu i Sant Pau in Barcelona during 2019.

Clinical Trial Documentation Management

Functions:

- > Manage and supervise all documentation associated with active clinical trials in the experimental phase and destruction of documentation for terminated clinical trials located in the external archive.
- > Store the supplies until the end of the studies, when they are destroyed or recycled.
- > Oversee and manage documentation of completed trials for the Centre for Drug Research (CIM)
- > Maintain and update the clinical workstation database and manage clinical studies.
- > Manage restricted access by clinical trial monitors to the clinical workstation.
- > Supervise data processing and management.
- > Coordinate researchers and monitors; draw up agendas for meetings and study monitoring.
- > Provide logistical support to the cold area and the clinical materials store associated with clinical trials in the experimental phase.
- > Ship biological samples to central laboratory services.

Facilities:

Several areas have been designated to implement these functions:

- > Head office and administration area.
- > Data processing and management area.
- > Clinical trial monitoring meeting rooms.
- > Documentation filing area.

Functions:

- > General:
 - Support management with strategic projects (accreditation, CERCA evaluation).
 - Manage IIB Sant Pau research groups: creation, dissolution and changes in composition.
 - Implementation of the functional plan for the new research building, coordination and management to the new research building.
 - Support management of the IIB Sant Pau Internal Scientific Committee, External Scientific Committee and Governing Council.
 - Implement policies for the dissemination of research among the general public and especially among secondary pupils and health science university students.
 - Represent the HSCSP Research Institute before external organizations.
- > Quality:
 - Implement policies to improve quality under GLP, GCP, GMP, ISO 9001 and UNE 166002 standards.
 - Lead the quality assurance programme at CIM Sant Pau and in clinical trials where the HSCSP Research Institute acts as sponsor.
 - Oversee auditing for protocols, databases, experimental phases, facilities, processes and final reports for clinical trials.
- Oversee supplier audits.
- Monitor non-conformity in internal and external audits.
- Draw up own SOPs and provide support for SOPs preparation by other units.
- Establish mechanisms to assess quality and good scientific practices in IIB Sant Pau.
- > Information systems:
 - Design mechanisms and implement tools for the collection and organization of data and information to feed decision making.
 - Manage and transform information and data to contribute to the fulfillment of objectives and strategies.
 - Respond to external requests for data and information (statistical surveys, SIRECS, etc).
 - Implement policies to improve information systems.
 - Develop new indicators of use for the institution.
 - Update research group staff details on the intranet.
- > Biosafety Committee:
 - Management of the biosafety committee.

Centre for Drug Research (CIM Sant Pau)

Functions:

Perform clinical drug trials and/or clinical research in compliance with methodological, ethical and legal requirements in the context of international GCP guidelines.

- > Clinical trials that are not of therapeutic interest for participants (phase I, special populations, psychopathological research, biomarkers, proof of concept).
- > Clinical trials in neuropsychopharmacology.
- > Clinical trials in initial developmental phases.

Facilities:

Three separate work areas have been designated for the trials:

Healthcare:

- > Admission zone.
- > 24 beds distributed in 4 units: trials in healthy volunteers and patients.
- > 2 individual rooms for CNS studies.
- > Ambulatory zone.
- > 4 consulting rooms for complementary testing, mainly related to CNS.
- > 3 cubicles to evaluate psychomotor performance.

Logistical support:

- > Rest area for clinical trial participants with bathrooms and kitchen.
- > Areas for the preparation, centrifugation and separation of biological samples.
- > Cold room.
- > Archives.

Management, administration and data processing:

- > Offices.
- > Area for monitors.
- > IT equipment for clinical trial activities of a non-experimental nature.

Clinical Research and Clinical Trials Unit (UICEC Sant Pau)

Functions:

It provides comprehensive support to researchers in the development of independent research projects (not sponsored by the pharmaceutical industry) on the methodological, regulatory, administrative, economic and practical aspects, subject to compliance with the ethical, good clinical practice and legislation.

UICEC Sant Pau is part of the Spanish Clinical Research Network (SCREn), a functional organization network to support the conduction of multi-center clinical trials.

Knowledge management:

- > One-stop information for independent research group projects.
- > Comprehensive assessment and project coordination.
- > Point of communication between researchers and technical units.
- > Pharmacovigilance activities for trials including drugs or medical devices.
- > Knowledge management:
 - Study of dimensionality and feasibility of projects.
 - Identification of each project needs.
 - Advice on the preparation of documentation: protocol, annexes, monitoring report, final report.
 - Advice on the submission of documentation to Spanish Agency for Medicines and Medical Devices (AEMPS), Ethics Committee for research with medicinal products (CEIm), Autonomous Communities (CCAA) and other relevant authorities.
 - Advice on project registration in public databases.
 - Identification of spin-off projects.
 - Advice on the presentation of research results.

Methodological and statistical support unit:

- > Advice on study design.
- > Data entry.
- > Data processing.
- > Development of statistical reports.
- > Electronic CRFs validation and management.
- > Documentation and reports.

Documentation, archiving, monitoring and follow-up unit:

- > Support in document creation: EudraCT application form and annexes / other application forms / evaluation forms / monitoring reports.
- > Support in the processing of initial applications, clarifications and amendments: AEMPS, CEIm, other health authorities regarding clinical trials, and other post-authorization studies.
- > Comprehensive monitoring of clinical trials and observational studies.
- > Management of initial, follow-up and final reports.
- > Development and file custody promoter (Master File), file preparation investigator.
- > Other communications to CEIC, autonomous communities and competent authorities.

Unit of management and financial management:

- > Management of clinical trials contracts with participating centers.
- > Management of collaboration agreements with laboratories / companies for funding.
- > Management of clinical trial-related contracts (CRO's, E-CRDs, statistics, etc.).
- > Management of clinical trial-related client and supplier invoices.
- > Management of clinical trial insurance policies.
- > Preparation of financial reports for the submission of studies to ethics committees.
- > Management of payment of fees to the competent authorities.

Animal Experimentation Service

The Animal Experimentation Service is the area dedicated to the house and care of experimental animals, and to work with experimental procedures that use them. The SEA has the ISO 9001: 2015 certification and guarantees compliance with the legal and ethical laws related to the use of animals for experimentation and for other scientific purposes. It is officially registered as a breeding center, supplier and user of experimental animals (B9900067 and REGA ES080190036528), and it also has the authorization to house and work with Genetically Modified Organisms (A / ES / 08/21 and A / ES / 08 / I-14) . The staff of the SEA is also officially trained and accredited: Welfare and Animal Health Specialist, Advisor on Animal Welfare, Technicians and Caregivers.

Translational research needs responsible use of experimental animals and the reproducibility of results. The use of animals of high genetic and health quality and their use, maintenance and well-being in appropriate facilities are accurate to obtain these results. The SEA offers its services to keep the animals in the right conditions and also to advice and give specialized support to the researchers in the realization and design of the experimental procedures and techniques

The SEA consists of 2 separate buildings:

- > Conventional Facility, one floor area of 650m², designed according to the requirements of Decret 214/1997 and R D 53/2013. It has the necessary facilities to house up to 40 pigs, 114 rabbits, 350 rats and 2500 mice in conventional

conditions and 90 ratios and 2200 mice in SPF or Special Pathogen-Free conditions (individually ventilates cages in a possitive pressure room).

The SEA facility has work halls for rodents and rabbits and 4 experimental operating theaters for pigs. It also has advanced medical equipment for small animals: bioluminescence (Hamamatsu), high frequency ultrasound (Vevo2100), intravital microscope, flow measurement equipment and probes, ECG monitor, NIP equipment, mechanical ventilators , equipment of anesthesia with sebu / isoflorane, surgery microscopes... For the large animals the SEA has: multiparameter monitors, defibrillators, anesthesia equipment with sebo / isoflorane, mechanical ventilators, RX (Philips and Siemens) equipment, equipment Trans-echocardiography and transesophageal echocardiography (Philips iE33), intravascular echocardiography (Siemens Acuson), real-time 3D imaging equipment (CartoXP), radiofrequency ablation equipment, 12-lead ECG...

The operating theaters can be used to teach microsurgery courses, experimental surgery, medical equipment presentations...

- > The Biomodule-SPF is a barrier area of 30m² that can house up to 400 immunodeprived mice. The entrance to the installation is through an air shower for people or a SAS of peroxide for materials. Work with animals is under biosafety hood, it has a preclinical in vivo image system for fluorescence and / or bioluminescence (IVIS Spectrum) and inhalatory anesthesia equipment.

Ethics Committee for research with medicinal products (CEIm)

The Ethics Committee for research with medicinal products (CEIm) of the HSCSP Healthcare Management Foundation is an independent body that, according to the laws that accredit it, has the mission to ensure the protection of rights, safety and welfare of the subjects involved in a research study and provide

public assurance of that protection by reviewing the protocol, the suitability of the researchers, facilities, equipment and methods to be used in obtaining and documenting the informed consent of the subjects.

Its specific functions are:

- > Evaluate the methodological, ethical and legal aspects of:
 - Clinical trials with medicinal products and medical devices
 - Non interventional studies.
 - Pharmacogenetic and pharmacogenomic studies.
 - Studies evaluating surgical or psychological treatments.
 - Studies involving invasive procedures or the use of health data or biological samples.
- > Evaluate the relevant amendments in projects approved by the CEIm.
- > Conduct a follow up of clinical trials with medicinal products and medical devices, as well as the other approved research studies.

Technical Secretariat of the CEIm

The Technical Secretariat of the CEIm is an independent agency whose mission is to protect the rights, safety and wellbeing of persons participating in HSCSP research projects which may entail physical or psychological harm. The Technical Secretariat of the CEIm evaluates the methodological, ethical

and legal aspects as well as any other relevant information regarding all research projects listed in the minutes of the Committee's meetings. It also advises researchers in the HSCSP and the HSCSP Research Institute regarding the preparation and presentation of clinical research projects.

Functions:

- > Receive, log and validate documentation for clinical research projects submitted to the Committee for evaluation.
- > Arrange and call Committee meetings, inform members of the agenda and provide them with copies of protocol summaries and patient informed consent and information sheets.
- > Prepare and submit reports to the Committee containing a methodological, ethical and legal description and analysis (and any other relevant information) of the research projects listed in agendas.
- > Act as a reference point in communications with and between researchers, sponsors, medical administrators and managers and healthcare authorities regarding all aspects of the activities of the Committee and of the research projects evaluated by the Committee.
- > Prepare and sign the reports of the Committee and communicate its decisions to the corresponding sponsors and researchers.
- > Prepare the minutes of meetings and distribute them to Committee members within the established period.
- > Manage all documentation associated with the operations and activities of the Committee and with the research projects evaluated by the Committee.
- > Manage contracts for all clinical studies to be performed at the HSCSP.
- > Certify the actions of the Committee.
- > Prepare the annual report of the Committee.
- > Ensure compliance with the SOPs of the Committee.

Biobank

The Biobank is a core facility for coordinating the collection, processing, store and transfer of human biological samples at the highest standard.

It's comprised of three main sections:

- > Blood and fluids: samples of hematological neoplasias, respiratory, psychiatric and neurological diseases. The processing is performed in the biobank's BSL-2 laboratory.
- > Tumour bank: Tumoral and non-tumoral tissue samples from patients affected by a neoplasia.
- > Histopathology laboratory: tissue processing, paraffin and OCT-block preparation, block cutting (microtome and cryostat), automatic immunostaining, histological stainings, special stainings, FISH staining, tissue microarray, high-resolution slide scan.

Equipment:

- > BSL-2 II A cabinet, inverted microscope, TC automated cell counter, refrigerated centrifuge, refrigerated microfuge, computer system for managing samples and data, automated molecular extraction (Qiacube, Qiagen), controlled freezing ramp
- > Liquid nitrogen tanks, -20°C freezer, -80°C freezers with safety systems
- > Tissue processor VIP Jr (Sakura), paraffin tissue embedding console system (Sakura), microtome (Microm), cryostat (Leica), Automated Immunostaining System (DAKO AS 48), Semiautomatic tissue arrayer (Galileo), Digital slide scanner Panoramic Midi (3DHitech), microwave tissue processor (KOS), multiobserver microscope with fluorescent light illumination system (Olympus)

Grants:

- > ICO Agreement (Oncology Director Plan for members of the Catalan Network of Tumour Banks) 15,000 €

Common Spaces Management

The aim of the common spaces management unit is to regulate the work in the shared places ensuring their proper use under a safe and quality environment.

The objective of this Unit is to offer technical support to research groups. For this purpose, PST provides equipment and facilities to researchers that allow them to perform the most modern and state-of-the-art techniques in different research areas. The organization as a transversal service promotes the cooperation and interaction between the different research groups.

This platform is organized in different units and services that offer solutions to different requirements.

Functions:

- > To ensure that the equipment within common areas is in right conditions and cleanliness (calibration/verification/maintenance).
- > The regulation of the entry and exit equipment in IR building.
- > To authorize the access to shared areas, and ensure compliance with regulations in the common spaces.

Equipment:

- > The common areas of the IR are equipped with all types of material and facilities to offer to researchers of the center the best experience at the time of performing their work.

Cell Culture Service

Technical Staff:

Estefania Segales
esegales@santpau.cat

Currently, in vitro cell techniques are a fundamental tool for the research lines developed by a wide array of scientific groups. The IR Cell Culture Service offers a suitable infrastructure for the realization of cell cultures, primary cultures and cell lines at different biosafety levels (BSL2 or BSL3), as well as bacterial cultures in biosafety level I, certified to ISO 9001:2015.

Functions:

In order to ensure proper operation and attention to investigators, the service includes:

- > Quarantine for new cultures
- > Sterilization of solid and liquid material
- > Removal and management of residues
- > Detection of mycoplasma in samples
- > Control of surface contamination
- > Maintenance of water baths and incubators, supervised cleaning procedures and control of personnel access

Facilities:

The service is structured in several experimental areas that are in separate locations, with an approximate extension of 400m². There are two BSL2 areas and one BSL3 area for eukaryotic cell cultures, where we can find biosafety cabins, cabins for working with cytostatic products, CO₂ incubators, hypoxystations, thermostatic baths, inverted microscopes, fluorescence microscopes with image capture systems, a particle counter (Coulter MSIII), automatic pipettors, refrigerators and freezers. In one of the BSL2 areas there is a room with a cabin prepared for working with radioactive sources. A BSL1 room is available for bacterial cultures. There are also rooms for washing and autoclaving material within the same areas or adjacent areas.

Radioactivity Unit

Functions:

- > The Radioactivity Unit provides groups with specific research laboratories in which to work with radioactive isotopes in liquid form. These areas are fully equipped and adapted for the handling of radioactive material and apply optimum measures for the safety and radioprotection of staff and the environment.
 - > This area has been authorized by the nuclear safety authority and its staff supervise compliance with the corresponding laws, guidelines and regulations.
- > Services include support for:
 - In vitro labelling of proteins, lipoproteins and liposomes.
 - Cellular proliferation and toxicity.
 - Nucleic acid labelling.
 - Immunoassay techniques.
 - Determination of enzymatic activities using radiolabelled substrates.
 - Analysis and separation of labelled molecules.
 - Metabolism in vitro and in vivo.

Facilities:

The Radioactivity Unit has the following facilities:

- > 1 room for radioactive material storage.
 - > 7 equipped laboratories, one of them refrigerated.
 - > 1 room for gamma- and beta- counters.
 - > 1 room for radioactive waste storage.
 - > 1 room for controlled disposal of radioactive waste.
 - > Radioactive liquid waste containers for controlled radioactive waste disposal.
- > Shielding accessories for radiation safety (table top shields, shielded containers, protective equipment, etc)
 - > Portable radiation and environmental contamination detectors.
 - > 1 ventilated rack for in vivo studies.
 - > 2 chemical safety cabinets for gas extraction.
 - > 1 vertical laminar air flow cabinet for cell cultures.
 - > 1 CO₂ incubator for cell cultures.

Main Lines of Research

- ▶ Electrophysiology and arrhythmias, clinical and experimental.
- ▶ Heart failure.
- ▶ Ischemic heart disease.
- ▶ Valvular heart disease.
- ▶ Cardiac imaging.
- ▶ Percutaneous valve repair.
- ▶ Bioengineering.

Scientific Challenges

Electrophysiology

- ▶ New experimental models of atrial infarction.
- ▶ Describe the mechanisms and clinical significance of the electrocardiographic alterations in patients with acute myocardial infarction, using translational research in pig heart models.
- ▶ Develop animal models for the study of left bundle branch block.
- ▶ Prognosis in patients with left circumflex coronary occlusion.
- ▶ Develop clinical applications of myocardial impedance in patients undergoing ablation of arrhythmias.

Heart failure

- ▶ Develop new risk scores for ambulatory heart failure patients predicting death and rehospitalizations.
- ▶ Research on new biomarkers in patients with heart failure included in the Spanish registry Redinscor II (RIC) (1500 patients). Our group is the national coordinator.
- ▶ Develop new markers for early detection of cardiac graft rejection in transplanted patients.

- ▶ Develop palliative care programs for patients with advanced heart failure.

Ischaemic heart disease

- ▶ Multidisciplinary treatment of cardiac sudden death.
- ▶ Treat complex atherosclerotic coronary artery lesions using international techniques.

Valvular heart disease

- ▶ Implement new percutaneous techniques for the treatment of mitral valve regurgitation and degenerative aortic stenosis.
- ▶ Implement devices for the treatment of prosthetic valve leak.

Cardiac imaging

- ▶ Implement new imaging software analysis to detect structural abnormalities of the myocardium (fibrosis, necrosis).
- ▶ Implement new percutaneous techniques for the treatment of mitral regurgitation in patients with heart failure or myocardial infarction.

Main Lines of Research

- ▶ Investigation of the genetic basis of venous and arterial thrombosis. GAIT-1 and GAIT-2 projects.
- ▶ Investigation of new antithrombotic drugs: thrombin inhibitors, molecules against activated factor X, low molecular weight heparin with oral activity, among others.
- ▶ Biomarkers of prothrombotic states in patients under 55 years with venous thromboembolic disease, acute ischaemic stroke, or acute myocardial infarction. VEREMA project.
- ▶ Applied clinical development of the self-management model of oral anticoagulant treatment. ORION project. Retrospective analysis of the clinical outcomes from patient self-management of antivitamin-K treatment at the Hospital de Sant Pau. NCT3532724
- ▶ Mathematical models of prediction of the individual risk of thromboembolic disease in general population (RETROVE Project) and in cancer patients (MIRTO Project).
- ▶ CITA project. Centre for Antithrombotic Therapy Management. Research into a new ambulatory management model for patients receiving any kind of antithrombotic therapy (anti vitamin-K, new oral anticoagulants, low molecular weight heparins, antiplatelets) by incorporating new educational programmes, specialized nursing and new communication technologies.
- ▶ CARAVAGGIO Clinical trial. Apixaban for the treatment of venous thromboembolism in patients with cancer: a prospective randomized open blinded end-point (probe) study - the CARAVAGGIO Study. Promotor: Fondazione FADOI (Italian Federation of Hospital Internists). Via F. Grossi Gondi, 49. Rome, Italy. IP Coordinator: Giancarlo Agnelli, University of Perugia. Perugia. Italy N. EudraCT: 2016-003093-40.
- ▶ Immunotherapy of solid cancer based on innate immunity (ITACA).

Scientific Challenges

- ▶ Study QTL detected in GAIT-1 families in relation to phenotypes of haemostasis with thrombosis risk (resistance to activated protein C, factor VIII, homocysteine, factor XII, body mass index and others).
- ▶ Replicate QTL related to thrombosis in GAIT-1 families by means of the linkage analysis using new GAIT-2 families.
- ▶ Conduct genome-wide association study (GWAS) of phenotypes involved in GAIT-1.
- ▶ GWAS of phenotypes included in GAIT-2.
- ▶ Analyse RNA expression in the GAIT-2 families.
- ▶ Investigate miRNA associated with thromboembolic disease in GAIT-2 and RETROVE.
- ▶ To complete the recruitment of the cohorts included in MIRTO Project (Modelling the Individual Risk of Thrombosis in Oncology), with the goal of establishing an individual risk score for venous thromboembolism (RETROVO sub-project) and for ischaemic stroke (SINO sub-project) in patients with cancer.
- ▶ Research plasma proteins associated with the risk of venous thromboembolism by using high affinity proteomics developed at Karolinska Institutet. VEREMA project, joint collaboration between the European case-control studies VEBIOS (Sweden), RETROVE (from our unit) and MARTHA (France).
- ▶ Investigation on laboratory management of DOACs.
- ▶ Search for new universal laboratory methods for the assessment of any kind of oral anticoagulant (AVK and DOACs).
- ▶ Immunotherapy of solid cancer (ITACA Project). Neutrophils as anti-tumorals. Clinical trial on sustained neutrophilia in advanced head and neck cancer (approved trial, waiting for financial support)

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Genomics of Complex Diseases (GAIT1, GAIT2, RETROVE, VEREMA and MIRTO Project).

Main Lines of Research

Atherosclerosis mechanisms

- ▶ Mechanisms leading to lipoprotein aggregation in the arterial wall.
- ▶ Use of mimetic peptides derived from apoJ as therapeutic tools.
- ▶ Involvement of LDL(-) on lipid accumulation in cardiomyocytes associated to diabetes, obesity and heart failure.
- ▶ Inflammatory mechanisms induced by LDL(-) on monocytes from patients with diabetes.
- ▶ Analysis of the secretome of the adipose tissue from cardiac surgery patients.
- ▶ Alterations of lipoprotein properties in patients with Alzheimer disease and cerebral amyloid angiopathy.

Diagnosis and biomarkers

- ▶ Analysis of apolipoprotein J (apoJ) as a marker of CVR.
- ▶ Development of algorithms for ruling-out acute coronary disease.
- ▶ Assessment of new biomarkers of acute cardiovascular disease: cardiac troponins, natriuretic peptides, ST-2.
- ▶ Development of methods for point-of-care biomarker measurement.
- ▶ Vulnerability markers in atheromatous plaque: electronegative LDL, LDL size, HDL function, myeloperoxidase, phospholipase.
- ▶ Lipoprotein-related biomarkers to assess carotid plaque inflammation in ischemic stroke.
- ▶ Lipoprotein alterations as biomarkers of CVR in HIV patients.

Scientific Challenges

- ▶ Determine the intracellular mechanisms involved in the inflammatory response induced by LDL(-) and the components of the particle that entail atherogenicity.
- ▶ Analyse the therapeutic potential of mimetic peptides derived from apoJ to delay the development of atherosclerosis in animal models.
- ▶ Demonstrate that electronegative LDL is a marker of vulnerable atheromatous plaque.
- ▶ Find new markers of cardiovascular risk in diseases such as diabetes, obesity, HIV or cardiac failure.

Main Lines of Research

- ▶ Physiopathological role of LRP family proteins in chronic diseases.
- ▶ Role of lipids and inflammation in atherosclerosis and ischemic heart disease.
- ▶ Vascular impact of ischaemia and angiogenesis in heart disease. Cell therapy.
- ▶ Research into new targets to inhibit the transformation of silent atherosclerosis into ischaemic syndromes: tissue-factor-mediated angiogenic switch.

Scientific Challenges

- ▶ Broaden the experimental focus to include transgenic animal models with/without cardiovascular risk factors in order to proceed to in-depth analysis of molecules involved in the modulation of new proteins identified by post-genomic technologies and systems biology approaches.
- ▶ Maintain present scientific networks and establish new multidisciplinary collaborations.
- ▶ Increase international funding for the extension of new and established platforms in order to implement proposed activities.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Acute and Intensive Cardiac Care Unit (Sionis A, Sans-Roselló J, Sánchez-Martínez M, Vila-Perales M, Duran-Cambra A)

Conferences

- ▶ Lecture: Papel de la Investigación Básica en la Práctica Clínica (L. Badimon). Collaboration HUCA – ICCV- Oviedo, Asturias, Spain.
- ▶ Lecture: Mecanismos que hacen más precoz la arterioesclerosis en los pacientes con diabetes que en la población general (L. Badimon). Workshop: Deconstruyendo la visión científica de la diabetes del siglo XXI. Madrid, Spain.
- ▶ Lecture: Riesgo Cardiovascular en Obesidad y Síndrome Metabólico (L. Badimon). V Curso Avanzado de Obesidad y Síndrome Metabólico, Real Academia Nacional de Farmacia. Madrid, Spain.
- ▶ Special Lecture: Precision Medicine in Cardiology: Molecular Phenotyping (L. Badimon). Cardio Athena 2018: Meeting on Cardiovascular Medicine - Athens, Greece.
- ▶ Lecture: Cardioprotection: where do we stand in 2018 (G. Vilahur). Seminar at: Department of physiology and genetics, University of Oxford. Oxford, United Kingdom.
- ▶ Lecture: Mecanismos y consecuencias clínicas de la calcificación vascular. ¿Podemos prevenirla? (G. Vilahur). XIV Reunión Nacional de Hipertrigliceridemia & V Reunión de las Unidades de Lípidos de la Sociedad Española de Arteriosclerosis. Oviedo, Spain.
- ▶ Lecture: Estrategias terapéuticas para aterosclerosis y aterotrombosis (L. Badimon). Fundación Valenciana de Estudios Avanzados. Valencia, Spain.
- ▶ Lecture Section: What are the key mechanisms of CV benefit of novel diabetes drugs? Discussion & What are the 3 key messages? (L. Badimon). European Expert Meeting Exploring the role of GLP-1 in the management of CVD & T2DM. London, UK.
- ▶ Distinguished conference: Future therapeutic strategies for atherothrombosis (L. Badimon). Advanced learning on platelets & Thrombosis International course. ALPIC 2018. Metsovo, Greece.
- ▶ Lecture: Novel targets for cardioprotection; system biology approaches (G. Vilahur). Printemps de la Cardiologie, Recherche Fondamentale and Clinique. Montpellier, France.
- ▶ Lecture: Efectos del consumo moderado de bebidas fermentadas en la salud cardiovascular y los factores de riesgo asociados (G. Vilahur). VII Jornada sobre Bebidas Fermentadas: Hostelería y Nutrición, Universidad Complutense de Madrid. León, Spain.
- ▶ Lecture: The effect of LDL in monocyte-to-macrophage differentiation (L. Badimon). 24th Annual Scandinavian Atherosclerosis Conference SSAR - Humlabæk. Copenhagen, Denmark.
- ▶ Lecture: Role of microvessels in plaque formation in diabetes mellitus (L. Badimon). Co-chairman: The role of the innate and the adaptive immune system in cardiovascular pathologies (L. Badimon). Chairman: Keynote Lecture – Linking microbiota to human disease (L. Badimon). Lecture: Dyslipidemia impairs high-density lipoproteins cardioprotective effects leading to larger infarcts (G. Vilahur). Frontiers in Cardiovascular Biology. Vienna, Austria.
- ▶ Lecture: Aspectos biológicos diferenciales entre sexos en la fisiopatología de la CI e infarto de miocardio (L. Badimon). Cardiopatía isquémica en la mujer. Curso de la Casa del Corazón. Madrid, Spain.
- ▶ Co-chairman: Novel Technologies for Cardiovascular Research (L. Badimon). EAS Congress. Lisbon, Portugal.
- ▶ Lecture: Replacement or local activation: paracrine mechanisms of myocardial repair (L. Badimon). 15th International Symposium on Stem Cell Therapy and Cardiovascular Innovations. Madrid, Spain.
- ▶ Henry N. Neufeld Memorial Award Lecture: Precision Medicine: Molecular Phenotyping in Cardiovascular Pharmacotherapy (L. Badimon). 23th Annual Scientific Meeting of the International Society Cardiovascular Pharmacotherapy (ISCP). Kyoto, Japan.
- ▶ Lecture: PCSK9: efectos más allá del LDL (L. Badimon). Co-chairman: Aspectos y mecanismos que modulan el efecto de la dieta (L. Badimon). 31º Congreso de la Sociedad Española de Arteriosclerosis. Girona, Spain.
- ▶ Lecture: Effects of fermented beverages' moderate consumption in cardiovascular disease (L. Badimon). Lecture: Molecular phenotyping (L. Badimon). Co-chairman Opening Lecture: The scientific basis of health through imaging, omics and behavior (L. Badimon). Co-chairman : Targeting Inflammation, Lipids and Immunomodulation (L. Badimon). Lecture: Conditioning the heart (G. Vilahur). Lecture: Closing Ceremony (L. Badimon). 52nd Annual Scientific Meeting of the European Society for Clinical Investigation. Barcelona, Spain.
- ▶ Lecture: Enfermedad aterosclerótica y diabetes (L. Badimon). Evidencias en DM2 Perspectiva cardiovascular y renal de la enfermedad. Madrid, Spain.
- ▶ Lecture: Papel de DM2 en la patogénesis de la enfermedad vascular (L. Badimon). DIABETTER 2018: Riñón, Corazón y otros protagonistas en DM2. Sevilla, Spain.
- ▶ Lecture: Dislipidemia y enfermedad coronaria. Nuevos objetivos, efectos sobre la aterosclerosis y redefinición de uso clínico (L. Badimon). Lecture: Fármacos antitrombóticos y protección miocárdica (L. Badimon). Lecture: Medicina de Precisión en Cardiología, futuro o realidad (L. Badimon). XXVIII Congreso Sudamericano de Cardiología Dr. Jorge Rodríguez-Larraín. XIX Curso de Cardiología para el Consultor CARDIOSUR 2018. Lima, Perú.
- ▶ Lecture: Diabetes, aterosclerosis y epigenética: modulación por a-GLP-1 (L. Badimon). Deconstruyendo la visión científica de la diabetes del siglo XXI. Un nuevo paradigma del tratamiento de la diabetes desde el riesgo cardiovascular: Reflexión científica desde los análogos GLP-1. Valencia, Spain.
- ▶ Co-chairman: Women in Cardiology: Bridging the Gap (L. Badimon). Chairman: Session: Aortic stenosis: translating mechanisms and risk factors to treatments (L. Badimon). Co-chairman: ESC William Harvey Lecture on Basic Science (L. Badimon). Lecture: Highlights - Condensed Abstract Basic Science (G. Vilahur). ESC CONGRESS 2018. Munich, Germany.
- ▶ Lecture: Diet and Network Medicine in Atherogenesis (L. Badimon). International Conference on Network Medicine and Big Data: The Transformation of Medicine - Rome, Italy.
- ▶ Lecture: Gender differences in health and disease (L. Badimon). Women in Science: Recommendations to improve Horizon Europe through a gender perspective. European Parliament. Brussels, Belgium.
- ▶ Lecture: Tissue factor signaling: beyond coagulation in the cardiovascular system (L. Badimon). Lecture: Coronary atherothrombosis: from lipids to inflammation (L. Badimon). Co-chairman: Looking beyond coronary damage in ACS: the role of microcirculation (L. Badimon). Lecture: HDL in CAD: a key role beyond atherosclerosis protection (G. Vilahur). Eurothrombosis 2018. Barcelona, Spain.
- ▶ Lecture: Platelets and cardioprotection (L. Badimon). Lecture: HDL in cardioprotection: detrimental effects of hypercholesterolemia (G. Vilahur). 3rd Cost Action European Union -Cardioprotection Meeting Kamari - Santorini, Greece
- ▶ Lecture: Endothelial dysfunction in the progression to heart failure (L. Badimon). Co-chairman: RSH-ESC WG6 Joint session: Arterial hypertension and coronary microcirculation (L. Badimon). Arterial Hypertension – interferences and connections. 5th Congress of the Romanian Society of Hypertension (RSH) Romanian Society of Hypertension Congress. Bucharest, Romania.
- ▶ Lecture: Molecular mechanisms supporting ischemic post-conditioning: Chaperones in cardioprotection (L. Badimon). 39th Panhellenic Congress of Cardiology - Athens, Greece.
- ▶ Lecture: Dyslipidemia and Cardiovascular Disease (L. Badimon). Maltese Cardiac Society Conference 2018. Malta.
- ▶ Co-chairman: Simposio ATIC. Inteligencia artificial en medicina (L. Badimon). Lecture: Del conocimiento a la empresa: la detección precoz de la isquemia miocárdica y el Proyecto Glycardial (L. Badimon). Co-chairman: Mesa Redonda ATIC. Nuevos fármacos en perspectivas (L. Badimon). Lecture: Metodologías postgenómicas y modelos animales preclínicos: innovando la farmacología (G. Vilahur). Congreso de las Enfermedades Cardiovasculares SEC 2018. Sevilla, Spain.

- ▶ Lecture: PCSK9 inhibitors: New era of lipid lowering therapy (L. Badimon). The Second International Congress of Coronary Units Association - UKJS2018. Belgrade, Serbia.
- ▶ Chairman: Clinical Proteomics in Cardio and Neurological diseases (L. Badimon). Clinical Proteomics: towards personalized medicine and health. Barcelona, Spain
- ▶ Lecture: Keynote lecture: Women in medicine (L. Badimon). Master-class Advances: Gender impact on stroke Prevention. Rome, Italy.
- ▶ Lecture: Tissue Factor "jinand jang" in the circulation: from thrombosis to angiogenesis (L. Badimon). Coronary Pathophysiology and Microcirculation in Acute Coronary Syndrome and Heart Failure. Berlin, Germany.
- ▶ Lecture: Novel therapeutic diabetes approaches: The cardiovascular benefits beyond glucose control (L. Badimon). Diabetes, Cardiology

& Novel Therapeutic Approaches Science, Outcomes and Practice. International Round Table on Familial Hypercholesterolaemia Conference. WCC Congress 2018 - World Heart Federation. Dubai, UAE.

- ▶ Lecture: Cardioprotection: the missing target in the resolution of atherothrombotic complications (L. Badimon). Mechanisms Linking Aging and Vascular Disease. IV UIMP-IBIS School of Biomedicine. Sevilla, Spain.

Dissemination

- ▶ Round table: Implicaciones en la práctica clínica real (L. Badimon). CardioTV Directo Online (20/11/2018) (odyssey.secardiologia.es).

Main Lines of Research

► Identification and characterization of key molecular and cellular biomarkers of atherothrombosis and ischaemic heart disease with potential use in prevention, disease diagnosis and treatment. In general, the research activities focus on cardiovascular disease, vascular

remodelling and atherosclerosis, thrombosis, risk factors, ischemic and heart diseases, covering studies at cellular, pre-clinical and clinical level.

Scientific Challenges

► Advance research aiming to identify and characterize new biomarkers of tissue remodelling, vascular injury, atherothrombotic disease and/or ischaemic, coronary and cerebrovascular syndromes using postgenomic techniques.

► Generate new information on extracellular vesicles (microvesicles/exosomes) due to their specific feature as carriers of RNAs (miRNA, lncRNAs and mRNAs) and proteins derived from the parental cells providing precise bioprints of defined pathophysiological scenarios and consequently being ideal biomarker candidates of disease evolution.

► Identify cardiovascular-disease associated soluble (serum, plasma, urine) and microvesicles or lipoprotein carried molecular bio-

marker by proteomic technologies based on liquid chromatography/bidimensional electrophoresis and mass spectrometry, lipidomic approaches by mass spectrometry coupled to ultra performance liquid chromatography and transcriptomic (mRNA, miRNA) studies based on array-systems and real-time PCR.

► Validate biomarkers identified in the diagnosis and prognosis of cardiovascular and/or cerebrovascular disease using specific quantitative techniques (confocal microscope, ELISA, multiplex assays, etc).

► Characterize molecular and functional mechanisms for selected biomarkers in cardiovascular pathology and myocardial remodeling (biology of systems).

Main Lines of Research

- ▶ Receptor-mediated changes in intracellular calcium homeostasis in atrial fibrillation.
- ▶ Contribution of genetic variants to electrical remodelling and cardiac arrhythmogenesis.
- ▶ Effects of development and ageing on calcium handling in cardiac myocytes.
- ▶ Mathematical modeling of calcium homeostasis and electrical activity in cardiac myocytes.

Scientific Challenges

The goal is to consolidate the group as a reference in research on calcium handling in atrial fibrillation and to establish it within other lines of research by including emerging technology and fields of research. Specifically we aim to:

- ▶ Develop computational tools and models to improve the analysis and understanding of intracellular calcium handling in cardiac myocytes.
- ▶ Incorporate emerging technology such as stretching and measurements of force development in single cardiomyocytes.
- ▶ Consolidate current national and international collaborations and establish new strategic collaborations within emerging fields of research such as the use of super-resolution fluorescence imaging (STORM, STED-techniques) and the detection and role of Reactive Oxygen Species in diseased cardiomyocytes.
- ▶ Achieve international funding for incorporation of scientific expertise and participation in multidisciplinary international research projects.

Main Lines of Research

Complex diseases genomics and epigenomics

Thrombosis and vascular research

- ▶ GAIT Project: Genetic Analysis of Idiopathic Thrombophilia.
- ▶ RETROVE Project: Risk of Venous Thromboembolic Disease.
- ▶ TAGA Project: Genomic basis of Abdominal Aortic Aneurysm.
- ▶ Research into pharmacologic targets for NSAIDs of cardiovascular interest.
- ▶ Inflammatory mechanisms involved in vascular disorders.

Vascular diseases and cancer

- ▶ OncoThromb Project: New biomarkers related with Thrombosis and Cancer.
- ▶ AIRTOP and MIRTO Projects: Assessment of the Individual Risk of Thrombosis in Oncology Patients.
- ▶ Role of inflammatory mediators in head and neck squamous carcinoma and in the regulation of gene expression in tumour relapse.

Genomic analysis on chronic obstructive pulmonar disease

- ▶ GEPOC Project.

Genomics in sports medicine

Performance, effort and recovery to stress conditions

- ▶ SUMMIT Project (Health in sport and its limits): Marathons and Ultras.

Exposure to hypoxia in extreme environments

- ▶ SHERPA_Everest'2017 Project.
- ▶ K2-Xtreme-Genetics. Impacto biológico, genético y clínico (K2-XG).

Bioinformatics

Analysis and management of data in complex diseases

- ▶ Salambó Project: Bioinformatics Platform.

Scientific Challenges

- ▶ Analysis of Omics data (genomics, transcriptomics, epigenomics) in the field of complex diseases with transversal and translational approach in close cooperation with clinical groups.
- ▶ Identify new biomarkers (genetic, epigenetic and/or plasmatic) that determine the susceptibility to complex diseases.
- ▶ Identify new mechanisms involved in the development and progression of complex diseases.
- ▶ Development of predictive algorithms that integrate the genetic, biological and clinical information of the patients (Personalized Medicine).

Main Lines of Research

- ▶ Extracellular matrix remodeling in cardiovascular diseases.
- ▶ Nuclear receptors in atherosclerosis and vascular biology.
- ▶ Novel therapeutic targets in hypertensive heart disease.

Scientific Challenges

- ▶ Analysis of the molecular basis of abdominal aortic aneurysm: Identification of new therapeutic targets.
- ▶ Physiopathological and molecular mechanisms underlying the development of thoracic aortic aneurysm in syndromic patients.
- ▶ Identification of new biomarkers and therapeutic targets in peripheral artery disease and vascular dysfunction.
- ▶ Analysis of the molecular mechanisms involving nuclear receptors in the control of vascular calcification.
- ▶ Identification and validation of novel pharmacological tools in cardiovascular diseases.
- ▶ Development of new animal models in cardiovascular diseases.

Main Lines of Research

- ▶ Study of the clinical heterogeneity of genetic autosomal recessive transmission of waist dystrophy and autosomal dominant transmission.
- ▶ Spinal atrophy and SMN genes:
 - Studies of molecular pathology, disease mechanisms and SMN gene expression.
 - Identification of modifying genes.
 - Study of biomarkers for validation processing in spinal muscular atrophy.
 - Study of the neuromuscular junction in human development.
- ▶ Hereditary breast cancer and BRCA mutations:
 - Identification of mutations and genetic variants.
- Molecular characterization of circulating tumor cells (CTCSS) through expression profiles in patients with breast cancer.
- Analysis of free circulating tumor DNA (cfDNA) as a predictor of response to the treatment of breast cancer.
- ▶ Pharmacogenetics: adverse reactions to medications.
- ▶ Congenital coagulopathies: molecular pathology of haemophilias.
- ▶ Duchenne and Becker muscular dystrophy: molecular pathology of DMD gene.
- ▶ Identification of the molecular alterations responsible for hereditary hearing loss.
- ▶ Studies of the molecular pathology causing ataxias.

Scientific Challenges

Pharmacogenetics

- ▶ Colorectal and lung cancer treatments.
- ▶ Chronic inflammatory disease treatment.
- ▶ HIV infection treatment.

Muscular dystrophies

- ▶ Post-transcriptional regulation of the dystrophin gene using non-sense-mediated decay analysis in DNA from patients with Duchenne muscular dystrophy.
- ▶ Genes associated with new phenotypic forms of limb girdle muscular dystrophy.
- ▶ Workflow development for the analysis of DMD gene by NGS techniques.

Hereditary breast/ovarian cancer

- ▶ DNA studies to classify DNA variants found in the BRCA genes as pathogenic or neutral.
- ▶ CTCs as prognostic markers in patients with locally advanced and disseminated breast cancer.

Main Lines of Research

- ▶ HDL and susceptibility to arteriosclerosis and cancer: analysis through the study of metabolic disorders, genetic modification, and dietary or drug intervention.
- ▶ Molecular basis of dyslipidaemia: development, validation and application of new clinical laboratory methods.
- ▶ Relationship between epicardial fat, lipoprotein function and inflammation in the development of arteriosclerosis and diabetic cardiomyopathy.

Scientific Challenges

- ▶ To extend the molecular diagnosis of Familial Hypercholesterolemia, and other genetic dyslipidemias, to prevent premature cardiovascular disease.
- ▶ To explore the effect of olive oil in reverse cholesterol transport in vivo and characterize the components responsible of this effect.
- ▶ To explore the anti-cancer mechanisms related to cholesterol metabolism, specially in breast and thyroid cancer.
- ▶ Preliminary identification of lipoprotein-associated active lipid biomarkers informative of heart damage in patients with diabetes mellitus and animal models.
- ▶ To evaluate the cardiometabolic effects of vitamin B3 derivatives.

Main Lines of Research

- ▶ The role of the natural immune system in the development of auto-immune and inflammatory processes.
- ▶ Immunological response and clinical course in immunomodulator treatments.
- ▶ The role of autoantibodies, components of the adaptive immunity system, in the pathogenesis of autoimmune processes and their use as diagnostic and prognostic markers in these diseases.
- ▶ Mechanisms involved in immunodeficiency.

Scientific Challenges

- ▶ Role of cells, molecules and autoantibodies of the innate and adaptive immune response in the development and control of inflammatory processes, in the appearance of autoimmune phenomena, immunodeficiencies, infections, cardiovascular diseases and development of tumours.
- ▶ Role of TLR and STAT signalling in inflammatory diseases and response to superantigens.

Main Lines of Research

- ▶ Diabetic complications: atherosclerosis and microvascular disease.
- ▶ Diabetic epidemiology: primary care research, and research with large databases.
- ▶ Diabetes and endocrine disorders in pregnancy.
- ▶ Diabetes and cardiovascular risk factors.
- ▶ Nodular disease and thyroid cancer.

Scientific Challenges

Endocrine neoplasms

- ▶ Molecular markers of the epithelial lineage: expression of the ABCG2 gene/BCRP1 transporter.
- ▶ Transcriptomics and proteomics as prediction and prognosis instruments for epithelial thyroid cancer.
- ▶ Intramural CELL-NANO-THYROID project: investigation of human mesenchymal cell capacity as an instrument for administering anti-tumour cell drugs in the form of conjugated nanoparticles.
- ▶ Role of cholesterol & cholesterol metabolites in thyroid neoplasms differentiation.
- ▶ Assessment of glycosylated immunoglobulins as serologic markers of thyroid carcinoma.

Autoimmune diabetes mellitus

- ▶ Classic type 1 autoimmune diabetes mellitus: discovery of genes that influence susceptibility to autoimmune diabetes (classic type 1).
- ▶ LADA type diabetes: prevalence of metabolic syndrome among patients with LADA compared to prevalence among patients with classic type 1 diabetes, type 2 diabetes and the general non-diabetic population in European countries.

Diabetes and pregnancy

- ▶ Clinical research aimed at optimizing care for women with pre-gestational and gestational diabetes at pre-conception, pregnancy, birth and postpartum stages.

Technology, telemedicine and intelligent systems for therapeutic optimization of diabetes mellitus

- ▶ Technology in the treatment of diabetes with special focus in insulin (new insulins, pumps), and glucose measurement including sensors.
- ▶ Development of a technological platform for the prediction, prevention and treatment of obesity, DM, HTA, dyslipidemia and cardiometabolic risk.

Optimization of the treatment of obesity, hyperlipidaemia, metabolic syndrome and complications

- ▶ Optimal treatment and prevention of cardiovascular risk associated with obesity, hyperlipidaemia, metabolic syndrome and diabetes mellitus 2.

Diabetic complications: atherosclerosis and microvascular disease

- ▶ Clinical and translational studies that explore research in pathogenesis, biomarkers, and early detection and treatment of microvascular and chronic complications, especially atherosclerosis.

Diabetic epidemiology: primary care research, and with large databases

- ▶ Research on diabetes mellitus in Primary Health Care of Catalonia. In recent years, the group has developed projects using the SIDIAP database, in different aspects of real-world evidence.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Oncogenesis and Antitumour Drugs (Ramon Mangues).
- ▶ Ophthalmology (Fernando Rodríguez Álvarez).
- ▶ Cardiovascular Biochemistry (Jorge Ordóñez, José Luis Quesada, Francisco Blanco).
- ▶ General and Digestive Surgery (Antonio Moral, Ignacio Pérez).
- ▶ Reproductive Health (Juan Adelantado).
- ▶ Metabolic Bases of Cardiovascular Risk (Francisco Blanco).
- ▶ Regulatory mechanisms of cardiovascular remodeling (Cristina Rodríguez-Sinovas, Maria Galan).

External Collaborations

Main Lines of Research

- ▶ ERCUSYN: European Registry on Cushing syndrome. Initiated with funding from SANCO, EU Public Health Programme.
- ▶ Role of myosteatosis in the development and persistence of residual muscular frailty in treated acromegaly and Cushing's syndrome. Study of the mechanisms involved.
- ▶ Spanish Molecular Registry of Pituitary Adenomas (REMAH study).
- ▶ Morbimortality, low-grade inflammation and cardiovascular risk in patients with acromegaly or Cushing syndrome.
- ▶ International consortium collaboration to identify genes and pathogenetic mechanisms involved in the development of craniopharyngiomas and pituitary adenomas.
- ▶ Study of bone microarchitecture and resistance and their predictors in patients with Cushing's syndrome and acromegaly in remission. A model to investigate the interaction between bone and body fat.
- ▶ The etiology and extent of impaired quality of life, fatigue and cognitive and affective/emotional dysfunction in patients with Cushing's syndrome: Sequeles cognitives du syndrome de Cushing- MEMO-CUSH.

Scientific Challenges

- ▶ Evaluate long-term persistent morbidity and mortality in patients who have had Cushing syndrome or acromegaly especially bone quality, muscular dysfunction and quality of life.
- ▶ Analyze and update the European database of patients with Cushing syndrome (ERCUSYN), which in 2018 included over 1650 patients, with partners from 63 centers in 29 countries.
- ▶ Conduct in vitro molecular analysis of operated pituitary adenomas within the REMAH (Molecular Registry of Pituitary Adenomas) study, sponsored by the Spanish Endocrinology and Nutrition Society, to investigate personalized markers of therapeutic response (mainly in acromegaly, corticotroph adenomas and non-functioning pituitary adenomas).

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Collaboration with the Neuromuscular Research Group led by Dr. Isabel Illa, specifically with Dr. Jordi Manero, to evaluate muscle in patients treated for acromegaly and Cushing syndrome. This multidisciplinary group also includes Rehabilitation (Dr. H. Basuñana and Mr Jordi Garcia, and Imaging (Dr. J. Llauger), and a CIBERER working group has been set up by Dr. E Valassi to investigate non-invasive diagnostic tools to early detect impairment of muscle architecture in patients with pituitary rare diseases.
- ▶ Collaboration by Alicia Santos with the Psychiatry Research Group (mainly with Dr. Joaquim Soler and Dr. Cristina Carmona) in order to analyze the effects of compassionate therapy in patients with eating disorders and borderline personality disorder. (Efectos de la terapia de compasión en pacientes con trastornos de la conducta alimentaria y trastorno límite de la personalidad)
- ▶ Collaboration by Elena Valassi with the Unit of Palliative Care led by doctor Antonio Pascual to investigate the clinical implications of poor glycemic control in patients with advanced chronic diseases".

External Collaborations

- ▶ Participation in the project of Personalized Medicine of the ISCIII, number PMP 15/00027 Improved and efficient therapy of acromegaly by implementation of a personalized and predictive algorithm including functional analysis, imaging and genomic information. Global PI: Manel Puig Domingo.
- ▶ Participating PIs:
 - IGTP Group/CIBERER GP: Manel Puig Domingo (PI)
 - Sant Pau Group/CIBERER 747: Susan Webb (PI), E Resmini, E Valassi, A Santos, I Crespo, A Aulinas
 - IDIBAPS/Clínic Group/CIBERER GV: Irene Halperin (PI)
 - Hospital de la Ribera Group (Alzira): Carmaña Fajardo (PI)
 - Hospital de la Princesa Group (Madrid)/CIBERER GP: Mónica Marazuela (PI)
 - Complejo Hospitalario de Santiago de Compostela Group: Ignacio Bernabéu (PI)
 - Hospital Universitario de Alicante/CIBERER GV: Antonio Picó (PI)
 - IMS Health: Montserrat Roset (PI)

- ▶ Silent corticotrope adenomas: Are they a subtype of more aggressive non-functioning pituitary adenomas? Project funded by CIBERER in the competitive call on Translational Medicine, 2015-2016 and is currently being written up for publication. PI: Antonio Picó (Alicante). Participating units: u747-S. Webb (S Pau); U725A-L. Castaño (Bilbao); GCV 13_Picó (Alacant); GCV 11_Halperin (H Clinic Barcelona); GCV 12_Marazuela (Hosp Princesa, Madrid); GCV 14_Puig (Hospital GTiP, Badalona); GCV 15_Soto (HUV Rocío Sevilla)
- ▶ Clinical study protocol on recently diagnosed patients with Cushing's syndrome, in collaboration with investigators in Leiden and Göteborg (mainly Drs. Alberto Pereira and Oskar Ragnarsson): The etiology and extent of impaired quality of life, fatigue and cognitive, affective and emotional dysfunction in patients with Cushing's syndrome.
- ▶ Collaboration with investigators in Bordeaux (mainly Dr. Antoine Tabarin) on cognitive outcome of patients having suffered Cushing's disease: Sequelles cognitives du syndrome de Cushing-MEMOCUSH.
- ▶ Caracterización clínica y molecular de los adenomas hipofisarios en niños y adolescentes. A Santos, SM Webb in collaboration with Dr. Itxaso Rica and Luis Castaño (Hospital Universitario Cruces. Instituto de investigación Sanitaria BioCruces).
- ▶ Bilateral collaboration between E. Resmini and Richard Lee of Baltimore University, Departments of Psychiatry and Medicine, the Johns Hopkins University School of Medicine.
- ▶ Genetic, molecular and clinical characterisation of craniopharyngioma. St Bartholomew's Hospital and The London Charity Hospital. With Dr. Carles Gaston-Massuet.
- ▶ Bilateral collaboration between E. Valassi and Oskar Ragnarsson, University of Gotheborg (Sweden) to investigate the association between polymorphisms of genes involved in the steroidogenesis and the responsiveness to treatment with steroidogenesis inhibitors in Cushing's syndrome.
- ▶ Bilateral collaboration between E. Valassi and Brian Keevil, University of Manchester (UK) to investigate the role of salivary cortisone in the residual morbidity of patients with Cushing's syndrome.
- ▶ Bilateral collaboration between E. Valassi and Adolfo Díaz, Hospital del Mar, to investigate the role of microRNAs in the pathogenesis of bone alterations in patients with Cushing's syndrome and acromegaly.
- ▶ Bilateral collaboration between E. Valassi and Chaysavanh Manichanh, Hospital Vall d'Hebron, to investigate the role of microbiome in the pathogenesis of metabolic alterations in patients with Cushing's syndrome.
- ▶ Bilateral collaboration between E. Valassi and María Morán (Hospital 12 de octubre, Madrid), Federico Pallardó and José Luis García (U733 CIBERER; Valencia University) to identify early markers of metabolic impairment in patients with Cushing's syndrome and acromegaly.

Active Grants

- ▶ Susana Webb Youdale. Centro de Investigación Biomédica en Red de Enfermedades Raras. CB06/07/0044. Ministerio de Sanidad y Política Social. Duration: 2006-2018. 269,325.41 €.
- ▶ Susana Webb Youdale. Estudio de microarquitectura y resistencia óseas y de factores que las determinan en el sd de Cushing o acromegalia en remisión. Modelo para investigar la interacción hueso-grasa corporal. PI14/00194. Instituto de Salud Carlos III. Duration: 2015-2019. 91,500 €.
- ▶ Agreement signed between HRA Pharma and the European Society of Endocrinology to support the ERCUSYN database over 5 years (2018-2023), which allows an annual support of ESE to IR for the sustainability of ERCUSYN.

Clinical trials

- ▶ Protocolo abierto multicéntrico, de continuación de Pasireotida, para pacientes que hayan completado un estudio de pasireotida previo patrocinado por Novartis y el investigador considere que se beneficiaría de la continuación del tratamiento con pasireotida. SOM230B2412. From 2016 (it is the continuation of CSOM230G2304 Estudio de fase III, multicéntrico, aleatorizado y doble ciego, para evaluar la eficacia y seguridad de pasireotida LAR en pacientes con enfermedad de Cushing". n° Eudract. 2009-011128-70. Duration: 2011-2016.)
- ▶ Estudio multicéntrico en fase 3 diseñado para evaluar la eficacia y la seguridad de un producto de hormona humana del crecimiento (hGH) de liberación prolongada (MOD-4023) en sujetos adultos con deficiencia de la hormona del crecimiento. Prolor Biotech Ltd. n° protocolo CP-4-005 n° eudract. 79.745/2013-000830-37. Duration: 2014-2018.

Note: Total amount granted to PI. It does not include indirect costs.

Grants Awarded in 2018

- ▶ Susana Webb Youdale. Grup de Recerca de Malalties de la Hipòfisi i Grup CIBERER 747 (CIBER de Malalties Rares). 2017 SGR 00750. Agència de Gestió d'Ajuts Universitaris i de Recerca. Duration: 2017-2019.
- ▶ Elena Valassi. Role of myosteosis in the development and persistence of residual muscular frailty in treated acromegaly and Cushing's syndrome tratados. Study of the mechanisms involved. PostDoctoral CIBERER researcher. PI 17/00749. Duration: 2018-2020)
- ▶ Susana Webb (awarded to the European Society of Endocrinology). European Society of Endocrinology audit and multi-country comparison of Adult Growth Hormone Deficiency (AGHD) treatment in clinical practice in Europe, Australia and New Zealand; how closely are protocols and best practice recommendations followed. Pfizer Independent Grants for Learning & Change: Improving the Identification and Management of Adult Growth Hormone Deficiency (AGHD). Duration: 2018-2019. 1500 \$.

Note: Total amount granted to PI. It does not include indirect costs.

Main Lines of Research

Experimental research

- ▶ Experimental rat model of cirrhosis and ascites.
- ▶ Mechanisms and prevention of bacterial translocation in rats with cirrhosis.
- ▶ Experimental model of spontaneous and induced bacterial peritonitis: physiopathology and treatment.
- ▶ MiRNAs expression profile in inflammatory bowel disease after stimulation with toll-like receptor ligands.

Clinical investigation

- ▶ Physiopathology, diagnosis, treatment and prevention of bacterial infections, ascites and hepatorenal syndrome in cirrhosis.
- ▶ Diagnosis and treatment of hepatic encephalopathy in cirrhosis.

- ▶ Cognitive impairment, falls and quality of life in patients with cirrhosis.
- ▶ Physiopathology, diagnosis, treatment and prevention of digestive haemorrhage due to portal hypertension of non-varicose origin.
- ▶ Diagnosis and treatment of chronic hepatitis B and C.
- ▶ Diagnosis and treatment of hepatocarcinoma.
- ▶ Physiopathology, diagnosis and treatment of intestinal inflammatory disease (inflammatory bowel disease).
- ▶ Diagnosis and treatment in advanced gastrointestinal endoscopy.
- ▶ Diagnosis and treatment of acute pancreatitis.
- ▶ Prevention of acute post-ERCP pancreatitis.
- ▶ Chronic pancreatitis and pancreatic neoplasms: molecular studies, early detection and treatment.

Scientific Challenges

- ▶ Consolidate the CIBEREHD, CIBER, Instituto de Salud Carlos III research group by studying complications in cirrhosis.
- ▶ Grup de Recerca de Complicacions de la Cirrosi Hepàtica. Universitat Autònoma de Barcelona.
- ▶ Consolidated Research Group (SGR) of the AGAUR, Generalitat de Catalunya.
- ▶ Expand the hepatology research lab and develop new research.
- ▶ Consolidate the portal of hypertension of the research group.
- ▶ Consolidate the pancreatic illness research line.
- ▶ Consolidate the inflammatory bowel disease research line.
- ▶ Consolidate the polyps and colon cancer research line.
- ▶ Develop a digestive endoscopy research line.

Collaborations

Collaborations with other IIB Sant Pau Groups

Main Lines of Research

Clinical microbiology

- ▶ Study of resistance mechanisms.
- ▶ Tuberculosis, epidemiology and antituberculosis resistance mechanisms.
- ▶ Molecular biology applications in infectious disease detection, taxonomy and epidemiology.
- ▶ Medical care projects.

Kidney transplantation

- ▶ Biomarkers for BKV in urine samples.

- ▶ T CD8+ immunity from CMV in renal transplant patients treated with Thymoglobulin.

Infectious pathologies

- ▶ Restricted-use policies for antibiotic and antimicrobial agents and suitable use of antimicrobial agents.
- ▶ Study of infections associated with foreign bodies (joint prostheses, catheters, cardiac prostheses and pacemakers).
- ▶ Study of infections due to multiresistant microorganisms or requiring isolation.
- ▶ Tuberculosis.

Scientific Challenges

Clinical microbiology

- ▶ Detection and characterization of Leishmanis from clinical samples.
- ▶ Study of molecular epidemiology (population and clonality studies in bacteria, mycobacteria, fungi and viruses).
- ▶ Molecular bases of bacterial resistance to antibiotics, vectors that convey resistance genes (plasmids, transposons, integrons, phages).
- ▶ The use of molecular techniques in diagnosis of infectious diseases.
- ▶ Research related to bacteraemia and endocarditis, nosocomial infections, prosthetic joint infections, central nervous system infections, and tuberculosis.

Tuberculosis, epidemiology and resistance mechanisms

- ▶ Prospective monitoring of primary and acquired Mycobacterium tuberculosis resistance to first-second-line drugs.
- ▶ Molecular detection of resistance using a molecular antibiogram.
- ▶ Study of the epidemiology and spread of resistant strains and assessment of the impact of immigration and the contribution of new Mycobacterium tuberculosis families (Beijing, EAI, CAS).

Molecular biology applications to infectious disease detection, taxonomy and epidemiology

- ▶ Study of the usefulness of the 16S RNA gene for microbiological diagnosis and molecular identification.
- ▶ Genotype characterization of Cryptosporidium spp. oocysts from stool samples collected by the HSCSP Microbiology Unit.

Medical care

- ▶ Government health department agreement (ongoing) regarding the development of epidemiological surveillance support functions for nosocomial infections and flaccid paralysis.
- ▶ Study of mycoses in depth, especially invasive fusariosis and aspergillosis and respiratory tract viral infections in patients with onco-haematological diseases.
- ▶ Multicentre studies of HIV (ongoing).
- ▶ Monitoring of congenital infection in pregnant women with Chagas disease.

Kidney surgery

- ▶ Biomarkers for BKV in urine sample: Determination of a diagnostic and prognostic biomarker in urine by proteomics of nephropathy by BK virus in renal transplant recipients, sponsored by the Infectious Diseases Department, Vall d'Hebron University Hospital, Barcelona, Spain.
- ▶ Study of the kinetic of the immunity T CD8+ from CMV in renal transplants in treatment with Thymoglobulin. Financed by Grants from the Fundación, Proyecto y Salud de la Junta de Andalucía.
- ▶ Suspension of the prophylaxis treatment with valganciclovir in renal transplants CMV- seropositive that maintain the immunity T CD8+ CMV-specific after treatment with Thymoglobulin. Financed by ISCIII Grant Fis (PI15/00402).

Infectious pathologies

Restricted-use antibiotic and antimicrobial policies

- ▶ To minimize resistance, reduce cost and improve compliance with surgical prophylaxis (at the time of administration) through suitable use of antimicrobial agents.

Epidemic cutbreaks and infections caused by multiresistant microorganisms and microorganisms requiring isolation

- ▶ To study epidemiology for our hospital.
- ▶ To reduce incidence.
- ▶ To prevent/contain epidemic outbreaks and work with the Microbiology Unit in epidemiology and molecular studies.

Infections associated with foreign bodies (joint prostheses, catheters, cardiac prostheses, pacemakers)

- ▶ To reduce incidence.
- ▶ To develop effective conservative treatment regimes.

Infections in Transplant Patients (Heart, Haemopoietic Progenitors)

- ▶ To study current epidemiology.
- ▶ To assess the efficacy of prophylaxis and other preventive measures.

Tuberculosis

- ▶ To cooperate with studies of resistance and with new treatment regimes for tuberculosis.

Other projects

- ▶ To continue with the government health department agreement regarding the development of support functions as follows:
 - Epidemiological surveillance of nosocomial infections (VINCat).
 - Tuberculosis control: Barcelona-Dreta Tuberculosis Operations Committee (coordinator: Dr Sambeat).
 - New influenza control: Barcelona-Dreta Epidemiological Surveillance Operations Committee (coordinator: Dr López-Contreras).
 - Database for monitoring CMV infections after renal transplantation.
 - Database for monitoring BK virus infections after renal transplantation.
- ▶ Observational and multicentre case-controlled (1:2) study to compare the evolution of renal transplantation in patients with HIV infection (Dr Canal, Dr Facundo and Dr Serra), sponsored by the Andalusian Organ and Tissue Transplantation Society.
- ▶ A phase 3, multicenter, randomized, open-label, active-controlled study to assess the efficacy and safety of maribavir treatment compared to Investigator-assigned treatment in transplant recipients with cytomegalovirus (CMV) infections that are refractory or resistant to treatment with ganciclovir, valganciclovir, foscarnet, or cidofovir, sponsored by Shire.

Main Lines of Research

Bone metabolism and osteoporosis

- ▶ Analysis of genetic influence on osteoporosis by means of aggregation studies in families of three or more generations with a minimum of 15 members.
- ▶ Bone structure study with quantitative CT of hip and spine, analysing the contribution of trabecular and cortical components using HRCT.
- ▶ Description of fat values and percentages in a normal population (in collaboration with the HIV Unit and CETIR Medical Group).
- ▶ Analysis of the influence of an intervention (physical exercise) on changes in the muscle compartment of patients with cirrhosis measured by DXA and HRQCT (in collaboration with the Gastroenterology Department).
- ▶ Description of bone structure in patients with a history of acromegaly assessed by DXA and HRQCT.

Hypertension and vascular risk

- ▶ Hypertension and quality of life.
- ▶ Refractory hypertension.
- ▶ Use of alirocumab in hypercholesterolaemia.

Clinical management, internal medicine and geriatrics

- ▶ Health care quality indexes (mortality, readmissions, etc).
- ▶ Perioperative medicine.
- ▶ Potentially inappropriate prescribing to older patients admitted to hospital.
- ▶ Central sensitization syndromes.

Rheumatology and rheumatoid arthritis

- ▶ Immunomodulation due to anti-CD20 (rituximab) treatment and study of polymorphisms.
- ▶ Evaluation of the clinical and ultrasonographic criteria of remission in Rheumatoid arthritis.
- ▶ Immunological basis and pathogenic studies of rheumatoid arthritis and other inflammatory conditions.
- ▶ Pharmacogenetic studies of disease modifying and immunomodulatory drugs in autoimmune and inflammatory diseases.
- ▶ Validation of the effect of baricitinib in patients with moderately to severe active rheumatoid arthritis who have had an inadequate response to methotrexate or antiTNF therapy.

- ▶ Role of tofacitinib in patients with moderate to severely active rheumatoid arthritis with inadequate response to biologic DMARD.
- ▶ JAK-STAT pathway in autoimmune processes, mainly focused in rheumatoid arthritis.

Systemic sclerosis

- ▶ Capillaroscopy patterns and correlation with auto-antibodies and pulmonary function tests.
- ▶ Evidence-based detection of pulmonary arterial hypertension in systemic sclerosis: the DETECT study.
- ▶ Use of endothelin receptor antagonism to prevent pulmonary arterial hypertension (in collaboration with Vall d'Hebron University Hospital, Barcelona, Spain).
- ▶ Genetic studies in systemic sclerosis and collaboration with DUO Registry and LAUDES study.
- ▶ Study of capillaroscopy patterns in diffuse connective tissue diseases: QuantiCAP study.

Gout

- ▶ Epidemiology of hyperuricaemia and gout.
- ▶ Association of Parkinson and clinical gout and arthritis.

Sjögren Syndrome, SLE and others

- ▶ Role of Association of Platelet Binding to Lymphocytes with B Cell Abnormalities and Clinical Manifestations in Systemic Lupus Erythematosus.
- ▶ Clinical and epidemiological findings in Spanish patients with primary Sjögren syndrome (in collaboration with Spanish Society of Rheumatology).
- ▶ Evaluation of the effect of Apremilast in the Healing process of Mucocutaneous Lesions in Behçet Disease.
- ▶ Study of the pattern of interstitial lung disease in primary Sjögren's syndrome
- ▶ Musculoskeletal involvement and ultrasonography update in systemic lupus erythematosus: New insights and review. ESSDAI activity index of the SJÖGRENSER cohort: analysis and comparison with other European cohorts.
- ▶ SER recommendations on the use of biological drugs in primary Sjögren's syndrome.
- ▶ Studies of Adult-Onset Autoinflammatory Syndromes.

Scientific Challenges

- ▶ To establish stable work relations between the HSCSP Bone Metabolism and Genomics of Complex Diseases Groups and the Bone Metabolism Unit of Hospital del Mar Medical Research Institute and the Faculty of Biology of the University of Barcelona.
- ▶ To strengthen ties between the HSCSP Rheumatology and Immunology departments regarding the study of immunological diseases.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Digestive Diseases (Dr Germán Soriano), Study by densitometry and ergospirometry of the effects of an exercise programme in overweight patients with liver cirrhosis.
- ▶ Orthopaedic Surgery and Traumatology Service (Dr José Carlos González Rodríguez), Randomized, double-blind, placebo-controlled clinical trial of parallel groups assessing the efficacy of subcutaneous denosumab for periprosthetic resorption decrease in patients with total knee prosthesis, IIBSP-DEN-2012-24, Eudra No: 2012-001285-15.
- ▶ Cardiovascular Risk Group (Dr. Laiz Matas). Longitudinal epidemiological study for the assessment of arterial stiffness in patients with renal insufficiency and treatment with vitamin D3 and vitamin D analogues, IIBSP-VIT-2013-138.

External Collaborations

- ▶ Dr. Luis del Rio, Standardized measures of different tissues using dual-energy X-ray absorptiometry, CETIR Medical Group, Barcelona, Spain.
- ▶ Internal Medicine Pneumonia Study (ENEMI), coordinated by the Hospital General Universitario Gregorio Marañón, Madrid, Spain.
- ▶ Collaboration with Vall d'Hebron Hospital: FIS 2018 (Expediente Nº PI17/00019). Biomarcadores de actividad en la artritis reumatoide. Estudio transversal y prospectivo basado en la inmunosecuenciación de anticuerpos y receptores TCR. Co-investigador: Héctor Corominas.

Active Grants

- ▶ Jordi Casademont Pou. Estudio GAO: de los fenotipos intermediarios al análisis global del genoma. PI14/01036. Instituto de Salud Carlos III. Duration: 2015-2018. 76,000 €.

Note: Total amount granted to PI. It does not include indirect costs.

Grants Awarded in 2018

- ▶ Olga Herminia Torres Bonafonte. Identificación de un inmunofenotipo de riesgo de mal pronóstico en ancianos que han sido ingresados por neumonía. PI18/00684. Instituto de Salud Carlos III. Duration: 2019-2021. 66,000 €.

Main Lines of Research

Asthma

- ▶ Asthma exacerbations.
- ▶ Severe asthma.
- ▶ Good clinical practice guidelines for asthma.
- ▶ Bronchial inflammation.
- ▶ Experimental asthma and pathogenic mechanisms.
- ▶ Multicentre biobank specializing in bronchial biopsies for research into asthma.
- ▶ Bronchial thermoplasty.
- ▶ Clinical trials.

COPD and Respiratory Failure

- ▶ Non-invasive mechanical ventilation.
- ▶ Respiratory rehabilitation.
- ▶ Pathophysiology.
- ▶ Exacerbation.

Obstructive Sleep Apnoea (OSA)

- ▶ Physiology and clinical, diagnostic and treatment consequences of sleep disorders.
- ▶ Obesity-hypoventilation syndrome.
- ▶ Analysis of airway inflammation in patients with OSA.

Scientific Challenges

- ▶ Consolidate a leading clinical trial unit in respiratory diseases.
- ▶ Capture pre-clinical development contracts from the pharmaceutical and biotech industry, using the capabilities of our basic research lab and experimental animal models.
- ▶ Recruit research trainees seeking a doctoral degree.
- ▶ Support the development of multidisciplinary research networks such as the Barcelona Respiratory Network and the Programme for Integrated Research for Asthma of the Spanish Society of Pneumology and Thoracic Surgery (SEPAR), and collaborate with or become involved in existing networks such as CIBER-Respiratory Disorders.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Ear, Nose and Throat Cancers (collaboration of Dr. V. Plaza in the EPONA study).
- ▶ Genetics and Vascular Surgery Departments (collaboration of Dr. V. Plaza in the TAGA study).

External Collaborations

- ▶ Dr. V. Plaza, Emergent Asthma Group, SEPAR.
- ▶ Dr. V. Plaza, INASMA Group.

- ▶ Drs. V. Plaza and D. Ramos Barbón, Integrated Research Programme (PII) for Asthma, SEPAR.
- ▶ Drs. V. Plaza and D. Ramos Barbón, group associated with CIBER-Respiratory.
- ▶ Drs. V. Plaza and D. Ramos Barbón, Severe Heterogenous Asthma Research collaboration, Patient-centered (SHARP) of the European Respiratory Society
- ▶ Dr. D. Castillo Villegas, National Institute for Rare Diseases, Instituto de Salud Carlos III, Madrid, Spain.
- ▶ Dr. D. Castillo Villegas, International Working Group on Langerhans Cell Histiocytosis and EUROHISTIONET.

- ▶ Dr. D. Ramos Barbón (PI), Multicentre Biobank of Bronchial Biopsies for Asthma Research, with collaborators as follows:
 - Dr. Carlos Martínez Rivera from Hospital Universitari Germans Trias i Pujol, Badalona, Spain.
 - Dr. Antolín López Viña from Hospital Universitario Puerta de Hierro, Madrid, Spain.
 - Dr. Francisco Javier González Barcala from Complejo Hospitalario de Pontevedra, Spain.
- Dr. Teresa Bazús González from Hospital Universitario Central de Asturias, Oviedo, Spain.
- Dr. Luis Pérez de Llano from Hospital Lucus Augusti, Lugo, Spain (pending approval).
- Dr. Patrick Berger from Université Bordeaux 2, Bordeaux, France.
- Dr. James G Martin from McGill University, Montreal, Canada.

Active Grants

- ▶ Mercedes Mayos Pérez. Proyecto PASHOS: Plataforma Avanzada para el estudio del Síndrome de Apnea Hipopnea del Sueño (SAHS): Estudio de validación de un modelo de criba del SAHS en Atención Primaria. PI14/01985. Instituto de Salud Carlos III. Duration: 2015-2018. 19,400 €.
- ▶ David Ramos Barbón. Mecanismos patogénicos versus terapéuticos de las células madre mesenquimales sobre la remodelación bronquial en asma: prueba de concepto para subsiguiente desarrollo farmacéutico. PI14/00257. Instituto de Salud Carlos III. Duration: 2015-2019. 121,500 €.
- ▶ Oriol Sibila Vidal. El microbioma respiratorio en la EPOC; relación con la respuesta inmune pulmonar y sistémica. PI15/02042. Instituto de Salud Carlos III. Duration: 2016-2019. 72,000 €.
- ▶ Alfonso Torrego Fernández. Estudi dels mecanismes fisiopatològics i resultats de l'aplicació de termoplàstia bronquial en asma greu. BECA VIFOR - FUCAP 2015. Fundació Catalana de Pneumologia. Duration: 2015-2018. 10,363.65 €.
- ▶ Oriol Sibila Vidal. Respiratory Microbiome and COPD exacerbations. Ramon Pla Armengol 2015. Fundació Ramon Pla Armengol. Duration: 2015-2019. 63,636.36 €.
- ▶ David Ramos Barbón. Desarrollo clínico y validación de biomarcadores de un nuevo tratamiento oral para el asma a través de un ensayo de fase II. RTC-2016-4698-1. Ministerio de Economía y Competitividad. Duration: 2016-2019. 178,150 €.
- ▶ Oriol Sibila Vidal. Impacto del tabaquismo sobre los mecanismos de defensa pulmonar y la infección bronquial en pacientes con EPOC y agudizaciones frecuentes. FUCAP 2015 (LA CAIXA). Fundació Catalana de Pneumologia. Duration: 2015-2018. 13,300 €.
- ▶ Vicente Plaza Moral. Asma Neutròfilica y/o No Eosinòfilica. Proyecto ANNE. PI17/01950. Instituto de Salud Carlos III. Duration: 2018-2020. 87,000 €.
- ▶ Ana María Rodrigo Troyano. El microbioma respiratorio en la EPOC; relación con la respuesta inmune pulmonar y sistémica. BECA BECARI SOCAP 2017. Societat Catalana de Pneumologia. Duration: 2017-2018. 14,400 €.
- ▶ Astrid del Carmen Crespo Lessmann. Validación de la medición de la IgE total e IgE específica en el esputo inducido de pacientes con asma alérgica y no alérgica. BECA LETI 2016. Fundació Catalana de Pneumologia. Duration: 2016-2019. 10,909.08 €.
- ▶ Lorena Concepción Soto Retes. Papel del sistema nervioso autónomo en el asma no controlada y en el fenotipo paucigranulocítico. SEPAR 2016. Fundació RESPIRA. Duration: 2018-2019. 23,750 €.

Note: Total amount granted to PI. It does not include indirect costs.

Grants Awarded in 2018

- ▶ Oriol Sibila Vidal. ¿Infección bronquial en las malalties respiratòries cròniques; estudi del microbioma pulmonar, de la resposta immune associada i de la utilitat d'un nas electrònic pel seu diagnòstic?, SLT006/17/00120, Departament de Salut. Duration: 2018-2019. 76,759.89 €.
- ▶ Jordi Giner Donaire. Utilitat del nas electrònic en l'estudi del Microbioma Respiratori en la malaltia pulmonar obstructiva crònica, relació amb la resposta immune pulmonar i sistèmica. SLT006/17/00162. Departament de Salut. Duration: 2018. 14,400 €.
- ▶ Meritxell Peiró Fàbregas. Impacte del tabaquisme en el pacient amb Malaltia Pulmonar Obstructiva Crònica (MPOC) reingressador. SLT006/17/00165. Departament de Salut. Duration: 2018. 9,600 €.
- ▶ Oriol Sibila Vidal. El proyecto PRINCE; Predictores Inmunológicos de Infección Bronquial en Enfermedades Respiratorias Crónicas. PI18/00311. Instituto de Salud Carlos III. Duration: 2019-2021. 97,000 €.
- ▶ David Ramos Barbón. Cercamiento de subproductos de células madre mesenquimales mediadores de anti-remodelación de músculo liso bronquial y prueba farmacológica preclínica en asma experimental, PI18/01102, Instituto de Salud Carlos III. Duration: 2019-2021. 122,000 €.
- ▶ Astrid del Carmen Crespo Lessmann, Asma Neutròfilica No Eosinòfilica (ANNE), ASTRAZENECA 2018, Fundació AstraZeneca. Duration: 2018-2019. 18,181.82 €.
- ▶ Vicente Plaza Moral, Asma neutròfilica y/o no eosinòfilica (Proyecto ANNE). SEPAR 2017. Sociedad Española de Pneumología y Cirugía Torácica. Duration: 2018-2020, 10,363.64 €.

Main Lines of Research

- ▶ Medical care projects.
- ▶ Study of pathogenic mechanisms altering body fat distribution.
- ▶ Study of metabolic disorders associated with antiretroviral treatment.
- ▶ Body composition changes.
- ▶ New antiretroviral drugs.
- ▶ Cardiovascular risk associated with antiretroviral treatment.
- ▶ Comorbid conditions associated with HIV-1 infection.
- ▶ Pharmacogenetics (toxicokinetics).
- ▶ Bacterial meningitis.

Scientific Challenges

Medical care projects

- ▶ Continuing with, expanding and, as appropriate, consolidating the care team for HIV-1 infected patients, consisting currently of 3 staff physicians, 4 grantaided research assistants (including a Río Hortega-funded research assistant) and 2 nurses.
- ▶ Continuing with participation in multicentre projects (especially the AIDS network, Gesida, VACH, EuroSIDA and ART collaboration).
- ▶ Exploration of possible participation in clinical trials of new antiretroviral drugs.
- ▶ Increasing the number of HIV-1 infected patients attended to in our hospital (given current mortality rates, an estimated annual increase of 50 patients is required).
- ▶ Continuing with current clinical research and mixed basic research-clinical research lines.

Pathogenic mechanisms altering body fat distribution

- ▶ Study of metabolism in pyrimidines and derivatives in the genesis of lipodystrophy associated with HIV-1 and antiretroviral treatment.
- ▶ Development of an animal (mouse) model of lipodystrophy.
- ▶ Development of in vitro models (adipocyte cultures) to study the adipose toxicity of antiretroviral drugs.
- ▶ Study of new manifestations of the lipodystrophy syndrome.
- ▶ Development of measurements for antiretroviral drug concentrations in adipose tissue.
- ▶ Exploration of the role of inflammation in the pathogenesis of lipodystrophy associated with HIV-1 and antiretroviral treatment.
- ▶ Metabolism of uridine and its role in the pathogenesis of lipodystrophy.

Metabolic disorders associated with antiretroviral treatment

- ▶ In vivo assessment of metabolic toxicity associated with antiretroviral treatment.
- ▶ Development of in vitro models (adipocyte cultures) to study the adipose toxicity of antiretroviral drugs.
- ▶ Study of factors contributing to hepatic steatosis in patients receiving antiretroviral treatment.
- ▶ Study of the pathogenic role of FGF21 in insulin resistance in HIV-1-infected patients.
- ▶ Study of role of FABP4 in metabolic disorders associated with antiretroviral treatment.

Body composition

- ▶ Definition of normal fat distribution in the general population.
- ▶ Establishment of abnormal fat distribution patterns.
- ▶ Development of a definition of lipodystrophy associated with HIV-1 and antiretroviral treatment.

New antiretroviral drugs

- ▶ Clinical trials of new antiretroviral drugs (phases 2 and 3).
- ▶ Ritonavir and non-ritonavir pharmacokinetic potentiation of antiretroviral drugs.

Cardiovascular risk associated with antiretroviral treatment

- ▶ Establishment of a multicentre cardiovascular risk cohort.
- ▶ Study of antiretroviral treatmentdependent and non-treatmentdependent factors in multicentre cohorts.
- ▶ Development of in vitro models (adipose cultures) to study adipose toxicity for antiretroviral drugs.

Comorbid conditions associated with HIV-1 infection

- ▶ Study of ageing in different tissues associated with HIV-1 infection and antiretroviral treatment.
- ▶ Study of fragility in patients with HIV-1 infection and the role of HAART.
- ▶ Evaluation of the neurocognitive function in patients with HIV-1 infection with and without antiretroviral treatment.
- ▶ Participation in multicentre cohort studies to determine the incidence of specific comorbidities (cancer, HCV, cardiovascular disease, osteogenesis/osteoporosis): EuroSIDA, ART Collaboration, Gesida, VACH, etc.
- ▶ Treatment of HCV in patients with HIV-1 and its prognostic significance.

Pharmacogenetics (toxicogenetics)

- ▶ Role of enzyme polymorphism of the pyrimidine pathways in the pathogenesis of lipodystrophy.
- ▶ Role of enzyme polymorphism of the pyrimidine pathways in the pathogenesis of clinical toxicity (neuropathy, pancreatitis).
- ▶ Role of IL28B polymorphism in spontaneous HCV clearance in the response to antiviral treatment based on interferon and ribavirin.

Bacterial meningitis

- ▶ Identification of prognostic factors in adult bacterial meningitis.
- ▶ Continuation with a cohort study of adult bacterial meningitis.
- ▶ Identification of host-intrinsic factors in the in the pathogenesis and prognosis of adult bacterial meningitis and meningococcal disease.

Main Lines of Research

- ▶ Genetics and molecular biology of cancer-prone genetic syndromes with a focus in familiar breast cancer and Fanconi anemia. Genetic characterization of Fanconi patients and identification of new genes involved in the disease and into hereditary breast cancer syndrome and its functions.
- ▶ Development of new diagnostic and therapeutic tools in Fanconi anemia, including gene therapy, regenerative medicine and drug repurposing.
- ▶ Mechanism of genomic instability and predisposition to cancer. Study of DNA repair and biological and clinical consequences of DNA repair failure.
- ▶ Fanconi/BRCA pathway in cancer. Implications of Fanconi genes in cancer and their use as therapeutic target against cancer.

Scientific Challenges

- ▶ Our research interests are cancer-prone genetic syndromes with defective DNA repair with special focus in Fanconi anemia and familiar cancer syndromes. We perform genetic, molecular biology and therapeutic research including gene discovery, mechanisms of DNA repair, gene and cell therapy approaches and cell-based drug screening platforms. A long term goal is to understand the mechanisms that maintain genome stability and protect us from disease, cancer, and ageing to improve the diagnostics and find novel therapeutic strategies.

Main Lines of Research

Clinical Research

- ▶ Development of new therapeutic strategies.
- ▶ Studies to improve tumour staging.
- ▶ Studies to detect residual disease.

Translational Research

- ▶ Personalized anticancer therapy.
- ▶ Studies of predictive and prognostic molecular markers.

Scientific Challenges

- ▶ Consolidate clinical research into cancer.
- ▶ Foster translational research into cancer in cooperation with other internal and external research groups.
- ▶ Consolidate the bank of tumours, DNA and serum for patients with cancer diagnosed and treated in our hospital.
- ▶ Develop new early-stage drugs (phase 0/1 studies).

Main Lines of Research

- ▶ Development of novel animal models of disseminated disease in solid tumours and haematological neoplasms for the mechanistic study of metastases and preclinical drug development.
- ▶ Identification of prognostic biomarkers in head and neck squamous cell carcinoma and their functional validation in vivo.
- ▶ Development of nanoconjugates for targeted delivery of antitumour drugs or toxins to metastasis stem cells.

Scientific Challenges

- ▶ Obtain funding to ensure stable employment of senior researchers, attract postdoctoral fellows and reinforce current collaborations with clinicians.
- ▶ Develop molecular markers for therapeutic decision-making in head and neck carcinomas.
- ▶ Achieve antimetastatic effects by targeting antitumour drugs to metastasis stem cells in solid tumors and haematological neoplasias.
- ▶ Enhance international collaboration and participation in EU networks and industrial projects.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Collaboration of Dra. Isolda Casanova and Aïda Falgàs in the project: Teràpia dirigida de Auristatina E o Ara-C a cèl·lules de leucèmia mieloide aguda que expresen CXCR4, receptor implicat en adhesió al estroma i quimiorresistència. PI14/00450. IP: Jordi Sierra Gil. Instituto de Salud Carlos III. Duration: 2015-2018. 172,000 €.
- ▶ Collaboration of Dra. Irene Arroyo with the research group of the Otorhinolaryngology Service led by Drs. Miquel Quer and Xavier León in the study of prognostic factors in head and neck cancer.
- ▶ Collaboration of Drs. María Virtudes Céspedes and Patricia Álamo and Rita Sala with the research groups of the Pharmacy Service, led by Dra. María Antònia Mangués, of the Pathological Anatomy Service, led by Drs. Enrique Lerma and Alberto Gallardo, and the Surgery Service, headed by Dr. Manuel Trias, and the Medical Oncology Service, led by Drs. Agustí Barnadas and Antonio López-Pousa, and the groups of Àlex Bayés and Marta Valle of IIB-Sant Pau, in the project "Targeted nanoconjugates for the selective elimination of stem cells in disseminated cancer". PIE15/00028. IP: Ramon Mangués. Instituto de Salud Carlos III. Duration: 2016-2018. 423,912 €.

Main Lines of Research

- ▶ Hematologic malignancies: diagnostics (morphology, cytogenetics, flow cytometry, molecular diagnostics).
- ▶ Next generation sequencing, genomic (microarrays) and proteomic platforms for diagnosis.
- ▶ Patient's derived xenografts.
- ▶ Noncancerous haemopathologies.
- ▶ Diagnosis and characterization of thrombocytopenias, thrombocytopathies and other platelet pathologies, especially complex pathologies (of genetic, mixed or unknown origin) and including unusual presentations of common diseases.
- ▶ In the framework of the GAIT-2 (genetic analysis of idiopathic thrombophilia, phase 2) project, to seek new phenotypes that favour the development of thrombosis, specifically related to the structure and function of platelets and other blood cells.

Scientific Challenges

- ▶ Consolidate characterization of haematological tumours and complex, rare and genetic noncancerous haematopathologies.
- ▶ Sampling management: isolation of neoplastic and non-neoplastic cells.
- ▶ Include the results of mass-analysis genomic and proteomic platforms in diagnostic algorithms and establish prognostic factors for haematological disorders, preferably complex or genetic neoplasms and noncancerous pathologies.
- ▶ Set up animal models in hematologic malignancies.
- ▶ Consolidate cooperation with the GAIT-2 project, especially regarding platelet and other blood cell participation in thrombosis generation.
- ▶ Promote interaction and stable links with internal groups (clinical hematology, pathology, gastrointestinal, hemostasis and thrombosis, complex disease genomics areas) and with other groups in Spain and abroad, especially those with complementary technologies.

Main Lines of Research

- ▶ Study of the molecular and cellular pathophysiology of haematological cancers.
- ▶ Study of the prognostic value of clinical and biological parameters in haematological malignancies.
- ▶ Design of new modalities of chemotherapy, biotherapy and drug treatment targeting molecular mechanisms.
- ▶ Design of new modalities of haematopoietic stem-cell transplantation and cell therapy.
- ▶ Psychological intervention and quality of life in patients with haematological malignancies.

Scientific Challenges

- ▶ Identify new prognostic parameters for risk and therapeutic stratification.
- ▶ Evaluate targeted therapy in cell lines and animal models (with the Oncogenesis and Antitumour Drugs group).
- ▶ Reduce toxicity and increase availability of allogeneic transplants.
- ▶ Molecularly characterize acute myeloid leukaemia and determine the prognostic value of known genes and other genes of uncertain significance (with the Haematology Laboratory).
- ▶ Model leukaemia and lymphoma in animals to better understand cell physiopathology and test new drugs (with the Oncogenesis and Antitumour Drugs group).
- ▶ Molecularly characterize and determine the prognostic significance of cell physiopathology and immunotherapy for lymphoproliferative diseases and evaluate antitumour immunotherapy in animals and humans.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Oncogenesis and Antitumour Drugs (Dr. Ramon Mangues).
- ▶ Haematological Diagnosis (Dr. Josep Nomdedéu).
- ▶ Microbiology and Infectious Diseases (Dr. Pere Coll).

Main Lines of Research

- ▶ Brain neurorepair after stroke.
- ▶ Role of statins in ischemic and haemorrhagic stroke.
- ▶ Prevention of cerebral haemorrhage with anticoagulants.
- ▶ Endothelial progenitor cells in stroke.
- ▶ Aetiological classification of brain haemorrhage.
- ▶ Pathophysiology of hematoma growth in acute cerebral haemorrhage.
- ▶ Benefits and risks of intravenous thrombolysis.
- ▶ Non-invasive monitoring of cerebral flow with applied optical methods.
- ▶ Participation in clinical trials.
- ▶ Cancer and stroke.
- ▶ Vulnerability of the atherosclerotic plaque.
- ▶ Predictors of atrial fibrillation.

Scientific Challenges

- ▶ Enhance cooperation with other groups in the framework of Spanish stroke research.
- ▶ Network (RETICS/INVICTUS) and also intra-hospital and extra-hospital cooperation.
- ▶ To obtain funding from FIS, regional authorities and private companies.
- ▶ Increase the number of contracted and grant-aided researchers and professionally develop existing researchers.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Neuroradiology.
- ▶ Thrombosis and Haemostasis.
- ▶ Cardiovascular Biochemistry.
- ▶ Neurobiology of Dementia.
- ▶ Molecular Pathology and Therapeutic of Ischaemic and Atherothrombotic Diseases.
- ▶ Stroke Pharmacogenomics and Genetics.
- ▶ Genomics of Complex Disease Unit.
- ▶ Clinical Epidemiology and Healthcare Services.
- ▶ Inflammation and Vascular Remodelling.
- ▶ Nuclear Medicine.

Main Lines of Research

Autoimmune neuromuscular diseases

- ▶ Characterization of new target antigens in Myasthenia Gravis (MG), and immune neuropathies (CIDP, GBS, MMN). Their use as diagnostic and therapeutic biomarkers.
- ▶ Pathogenesis of newly recognized antigens both in MG and in CIDP.
- ▶ Analysis of the innate immunity in inflammatory myopathies.
- ▶ Analysis of the impact of new immunomodulating therapies on IgG4 mediated Neuromuscular Diseases (NMD).
- ▶ Functional aspects of immune system cells (response to ligands, production of antibodies, etc).
- ▶ Phase 2 clinical trials in autoimmune neuromuscular diseases.
- ▶ IGOS data base for Guillain Barre syndrome.
- ▶ NMD-ES Spanish registry for neuromuscular diseases.

Muscular dystrophy, dysferlinopathy and distal myopathies

- ▶ Muscle MRI analysis as a biomarker of different muscular dystrophies.
- ▶ Role of PDGF in muscular dystrophies fibrosis. Study of nintedanib as an antifibrotic drug in muscular dystrophies.
- ▶ Natural history of Dysferlinopathies. The international COS-study Jain Foundation.
- ▶ Study of proteasome and autophagy inhibitors in dysferlin myopathy. Development of cell models of NMD diseases using CRISPRCas9 technology.
- ▶ Clinical trials in muscular dystrophies and metabolic muscle diseases.

Amyotrophic lateral sclerosis

- ▶ Epidemiology of ALS in Catalonia.
- ▶ Gene profile of ALS patients in Spain.
- ▶ Biomarkers (miRNAs...) profile in different phenotypes of ALS.

Scientific Challenges

- ▶ Advance in the knowledge of the immunological mechanisms involved in the pathogenesis of autoimmune neuromuscular diseases (MG, CIDP, MMN).
- ▶ Develop 2D and 3D cell based assays to understand the effect of autoantibodies in Myasthenia gravis.
- ▶ Advance in the knowledge of the pathogenetic mechanisms of inflammatory myopathies (DM).
- ▶ Search for new antigens and develop diagnostic tests with new biomarkers in immune-mediated neuropathies and Myasthenia Gravis.
- ▶ Implement new diagnostic and disease follow-up methods for muscular dystrophies resulting from dysferlinopathy and other myopathies research (biomarkers (miRNA, secretome), MRI, etc).
- ▶ Advance in the knowledge of the pathogenetic mechanisms involved in dysferlin deficiency and other muscular dystrophies.
- ▶ Search for new genes and biomarkers in the different phenotypes of ALS.
- ▶ Use of the NMD.ES registry to perform research in different NMD.

Main Lines of Research

Cognitive Impairment, Behavioural Dysfunctions and other non-motor symptoms in Parkinson Disease (PD)

- ▶ Study of the neural correlates of cognitive performance, mild cognitive impairment, dementia and behavioral alterations (apathy, visual hallucinations and impulse control disorders) in PD using neurophysiological techniques (event-related brain potentials), structural, functional and molecular neuroimaging.
- ▶ Characterization of the neurodegenerative process underlying cognitive impairment in PD through the study of cortical atrophy patterns related to genetic and biomarker indicators.
- ▶ Development and validation of PD-specific tools for cognitive and functional assessment to detect subtle changes in cognitive performance and treatment response.
- ▶ Prospective follow-up study of cognition and mood in PD patients with deep-brain stimulation of the subthalamic nucleus.
- ▶ Identification of blood-based, cognitive and neurophysiological biomarkers of cognitive deterioration in PD.
- ▶ Identification of genetic and neurophysiological biomarkers of apathy and impulse control disorders in PD.
- ▶ Data science applied to large PD databases such as PPMI.
- ▶ Surgery and treatments of continuous infusion of intraduodenal levodopa.
- ▶ Study of the effects of continuous infusion of intraduodenal levodopa on cognition and mood.
- ▶ Follow-up and etiologic study of weight loss in patients treated with continuous infusion of intraduodenal levodopa.

Huntington's Disease

- ▶ Characterization of the natural course HD in large and international cohort and studies (Enroll-HD).

- ▶ Study of the neural correlates of clinical progression, cognitive performance, mild cognitive impairment, dementia and behavioural alterations in HD using neurophysiological techniques (event-related brain potentials), structural, functional and molecular neuroimaging.
- ▶ Identification of potential neuroimaging, blood-based, muscular tissue, CSF and clinical biomarkers of disease progression in premanifest and manifest HD.
- ▶ Study of the prevalence and neural substrates of behavioral alterations in premanifest and manifest HD.
- ▶ Development and validation of HD-specific tools for cognitive and functional assessment to detect subtle changes in cognitive performance and treatment response.
- ▶ Study of the effect of intermediate alleles and homozygosity on the clinical presentation of HD.
- ▶ Data science applied to large HD databases such as Enroll-HD and Registry.
- ▶ Identification of different cognitive phenotypes in HD.

Progressive Supranuclear Palsy (PSP)

- ▶ Development of a PSP-specific cognitive rating scale.
- ▶ Development of a standardized eye movement evaluation.
- ▶ Study of the neural correlates of clinical progression, cognitive performance and behavioral alterations in PSP using structural and functional neuroimaging.

Essential Tremor

- ▶ Molecular neuroimaging in essential tremor.
- ▶ Clinical, neurophysiological and neuroimaging assessment of patients with FXTAS (fragile X-associated tremor/ataxia syndrome).

Scientific Challenges

Parkinson's Disease

- ▶ COPPADIS: COhort of Patients with PArkinson's Disease in Spain (national collaborative study).
- ▶ FIS PI14 / 02058: Blood and neurophysiological markers of progression of cognitive impairment.
- ▶ DuoCog: randomized, double blind and crossed study (immediate levodopa vs. intraduodenal in cognition and mood).

- ▶ Ciberned intramural project: randomized, double-blind, placebo-controlled trial of efficacy and safety of candesartan in mild cognitive impairment.
- ▶ Diagnostic accuracy and neuronal correlates of the Buschke memory test in mild cognitive impairment.
- ▶ Study of perception of colors and visuospatial functions in PD.
- ▶ Collaboration in the study of Normative data of the PD-CRS in Brazilian population, with Pedro Brandao, University of Brazilia.

- ▶ Marató TV3 (nº 477, 2013): Prediction of impulse control disorders (TCI) and apathy.
- ▶ FIS (PI15 / 00962): Anatomical-functional correlates of TCI and apathy.
- ▶ Minor hallucinations: analysis of functional correlates (rEEG) and neuroimaging (structural MR, fMRI).
- ▶ Prospective study on the efficacy of music therapy in apathy and depression of PD.
- ▶ Analysis of nutritional status in patients with intraduodenal levodopa.
- ▶ Prospective cognitive, behavioral, sleep and quality of life study in patients with deep brain stimulation and intraduodenal levodopa.
- ▶ Prospective study of patient satisfaction after functional surgery.

Huntington's Disease (HD)

- ▶ Coordination of the "Cognitive Phenotype Working Group" (European Huntington's Disease Network).
- ▶ Spanish coordination of Enroll-HD: A Prospective Registry Study in a Global Huntington's Disease Cohort (PI in Spain: J. Kulisevsky).
- ▶ Validation of HD-specific cognitive (HD-CRS) and functionality scales (HD-CFRS).
- ▶ Project FIS PI17/01885. Longitudinal study of clinical and neurobiological correlates associated with levels of huntington and other biomarkers in CSF and plasma in HD (BCN-HD project) (PI: Jesús Pérez).
- ▶ Collaboration in: a) FIS PI14 / 00834: Longitudinal changes of functional and structural connectivity in pre-symptomatic patients; b) FIS PI15 / 02227: Phenotype and haplotypes associated with intermediate alleles of the EH gene; c) Overcoming Depression in HD: Cdk5 as a potential biomarker and pharmacological target (HD's disease Society of America); d) The nuclear lamina in HD: physiopathology and therapeutic applications (Ramón Areces Foundation).
- ▶ Oxytocin study, plasma levels and modifications in its receptor, and association with apathy and impairment of social cognition in HD (Financing: Regional Health Management and Ministry of Health, Junta de Castilla y León).
- ▶ Identification of molecular signatures in exosomes associated with HD.

Tremor

- ▶ Development of a hardware-software system for a portable neurophysiological study. Collaborative project (SEIDOR company and University of Vic).
- ▶ Development of diagnostic system through mobile App and software. Collaborative project with Mediktör company.
- ▶ Perampanel in primary orthostatic tremor (pilot study) Collaboration with Association of Patients TOP (Paris, France).

Other neurodegenerative diseases

- ▶ Neuronal correlates of hypofrontality in subtypes of progressive supranuclear palsy (PSP).
- ▶ Neuropsychiatric and behavioral symptoms in subtypes of PSP.
- ▶ Multicenter study to validate the diagnosis of neurodegenerative diseases through OSCANN oculo-graphic registry (Alzheimer's, PD and frontotemporal dementia vs. controls).
- ▶ Lewy Bodies Dementia: participation in an international multi-center study integrated in the Joint Program for Neurodegenerative Diseases (European Commission).
- ▶ MSA: Collaborative project within the Catalan MSA Registry (CM-SAR).
- ▶ FXTAS: Collaborative research with Genetics Hospital Clinic (Barcelona) and Associació Catalana X Fràgil (ACXF).
- ▶ Collaboration with GEMT-CAT (Group of Movement Disorders of the Catalan Society Neurology): Document Consensus on genetics in movement disorders.

Neuroimaging and data engineering

- ▶ Functional and structural cerebral correlates in HD: cognitive deterioration, apathy, depression and irritability.
- ▶ Neuronal correlates of the classification of cognitive impairment of PD according to the MDS.
- ▶ Dynamic connectivity models in cognitive impairment of PD (collaboration with Center for Brain and Cognition, Pompeu Fabra University).
- ▶ Effects of dopaminergic treatment of PE on neurocognitive networks.
- ▶ Analysis of public databases ("big-data"): ENROLL (HD) and PPMI (PD).

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Active collaboration with the research groups of Neuroradiology, Nuclear Medicine and Psychiatry.

External Collaborations

- ▶ Active collaboration with the Cognition and Brain Plasticity Group at the Bellvitge Health Science Campus at the University of Barcelona adscribed to the Department of Basic Psychology, Faculty of Psychology - University of Barcelona and the IDIBELL (Institut d'Investigació Biomèdica de Bellvitge).
- ▶ Centro de Investigación Biomédica en Red de Enfermedades Neurodegenerativas (CIBERNED), Instituto de Salud Carlos III.

- ▶ International Movement Disorders Society (MDS). Task Force for Developing Rating Scales in Parkinson's Disease (Subcommittee for Cognitive Evaluation).
- ▶ MDS Task Force for Mild Cognitive Impairment in Parkinson's Disease.
- ▶ MDS Task Force for Evidence Based Medicine in Huntington's Disease.
- ▶ Spanish Coordinator of the European Huntington Disease Network and the ENROLL Study (Cure for Huntington's Disease International - CHDI).
- ▶ Coordination of the Cognitive Phenotype Working Group of the European Huntington's Disease Network (EHDN).

Main Lines of Research

Our main objective is to investigate new strategies for the treatment of arthritic and neuropathic pain as well as of the emotional disorders associated with chronic pain by using pharmacological, molecular and genetic methodologies.

- ▶ New approaches for the treatment of chronic pain. Identify new drugs suited to alleviate arthritic, inflammatory and/or neuropathic pain, and investigate their mechanism of action in the peripheral and central nervous system by using preclinical models of pain.
- ▶ New therapeutic targets for the emotional disorders associated with chronic pain. Investigate new treatments capable of inhibiting the comorbidities associated with the suffering of an inflammatory,

neuropathic or osteoarthritic pain, such as the anxiety, depression, cognitive deficits...

- ▶ Neuropharmacology of opioids and cannabinoids. Establish new strategies to improve the analgesic effects of opioids and cannabinoids during chronic pain to avoid the development of side effects resulting from the administration of high and/or continued doses of these drugs.
- ▶ New strategies for the treatment of diabetic neuropathy. Identify new compounds capable of inhibiting diabetic neuropathy and oxidative stress, two important complications associated with diabetes, using different preclinical models of type 1 and 2 diabetes.

Scientific Challenges

- ▶ Identify new pharmacological compounds that effectively abolish chronic pain without side effects and which use can be transferred to clinical practice and/or be patentable. Evaluate the analgesic effects of new gaseous releasing compounds and their action on the comorbidities associated with the suffering of an osteoarthritic or neuropathic pain. Study the mechanism of action of these treatments in different regions of the central and peripheral nervous system.
- ▶ Study new strategies to potentiate the analgesic action of opioids and cannabinoids during inflammatory and neuropathic pain. Evaluate the antinociceptive, anxiolytic and antidepressant effects of new delta opioid receptor agonists in acute and chronic pain. Ad-

vance in the knowledge of the molecular mechanisms involved in the analgesic effects of opioids and cannabinoids.

- ▶ Develop new approaches for the effective treatment of diabetic neuropathy and oxidative stress associated with diabetes. Evaluate the role of carbon monoxide-liberating compounds in the hyperglycemia and dyslipidemia accompanying type 1 diabetes. Study the emotional disorders associated with diabetes and its treatment.
- ▶ Evaluate the antioxidant and neurotrophic mechanisms implicated in the modulation of inflammatory pain in the central nervous system of animals. Study the interaction between gaseous neurotransmitters and opioid receptors in the aversion to pain.

Main Lines of Research

Clinical Trials with no Therapeutic Benefits to Volunteer Participants

- ▶ Phase I clinical trials (healthy volunteers) whose main objectives include: first in human, safety and tolerability (local, systemic/dermatological, ophthalmological, vaginal), pharmacokinetics, bio-availability and bioequivalence (generic drugs), pharmacodynamics, interactions (drug-drug/drug-food), evaluation and characterization of biomarkers, proofs of concept, acceptability and preference studies.
- ▶ Follow-up studies in populations with the same or different characteristics (elderly, obese, postmenopausal, with liver or kidney failure).
- ▶ Collaboration with clinical services to conduct phase II/III studies.

Neuro-Physio-Pharmacology of Sleep/Wake States

- ▶ Investigate human brain activity in sleep and wakefulness, mechanisms involved in these states, problems derived from sleep disturbances and possible interventions.
- ▶ Approach the phenomenon as a continuum: appropriate interpretation of the impact of a certain intervention, whether pharmacological or not, should take into account the complementarity of evaluations performed during sleep and during wakefulness.
- ▶ Develop psychomotor performance tests, subjective evaluation scales and pupillometric tests.

Scientific Challenges

- ▶ Consolidate and strengthen leadership in this field in Spain, consolidate relationships with the pharmaceutical industry on a national level and strengthen and extend relations abroad with multinational enterprises and industries from other sectors.
- ▶ Broaden the range of questions to address in research projects along the lines of the neuro-physio-pharmacology of sleep/wake states, focusing on pharmacotherapeutic objectives and also on physiopathologic objectives in related fields, such as dreams.
- ▶ Develop neurophysiologic recording performance in ambulatory conditions, simplifying participation of volunteers but not lowering the quality of data obtained (non-negotiable element of their application as a research variable).
- ▶ Promote dissemination of our activity with a dual objective: to return knowledge generated to society and demystify research in humans, bringing it closer to the community so as to foster participation in clinical trials (particularly in specific sectors of the populations, such as the elderly).
- ▶ Set up educational activities related to our two main research lines: the application of good clinical practices in clinical research into sleep medicine and its medical (pathology, and treatment) and social (quality of life, prevention of accident risk) consequences.

Main Lines of Research

- ▶ Use of state-of-the-art genomic strategies to study the genetic architecture of complex diseases caused by neurodegenerative processes, including Alzheimer disease and other dementias, Parkinson disease, and amyotrophic lateral sclerosis (ALS), among others.
- ▶ Cloning and evaluation of novel genes associated with neurodegenerative disorders through genomic analyses on families with Mendelian pattern of inheritance.
- ▶ Study of the relationship between biomarkers and endophenotypes at the individual genetic background.
- ▶ Evaluation of the effect of novel genes related to neurodegenerative disorders in the Spanish population through multicentre collaborative studies.

Scientific Challenges

- ▶ Assemble a research team of excellence in the international field of genetics of neurodegenerative disorders.
- ▶ Increase our capacity of funding through EU support.
- ▶ Develop a comprehensive genomic database from well-characterized Spanish patients of European origin suffering from neurodegenerative disorders.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Neurobiology of Dementia.
- ▶ Parkinson Disease and Movement Disorders.
- ▶ Neuromuscular Diseases.

Training

- ▶ During the course of 2018 we have supervised two Final Degree Projects (TFG), from Vic University and the UAB. We have also directed one Master's Degree Project (TFM) from the UAB. The Unit also hosted two students from the "La Guineueta" Institute (Barcelona), who performed their laboratory practices as lab technicians.

Main Lines of Research

Biomarkers in Alzheimer disease and other neurodegenerative dementias:

- ▶ CSF biomarkers in Alzheimer disease, dementia with Lewy bodies and frontotemporal dementia.
- ▶ Amyloid and tau imaging in neurodegenerative dementias.
- ▶ Novel MRI markers in preclinical Alzheimer disease and frontotemporal dementia.
- ▶ Biomarkers of Alzheimer disease in Down syndrome.
- ▶ Molecular basis of neurodegenerative diseases.
- ▶ Clinical trials in Alzheimer disease and dementia with Lewy bodies.

Scientific Challenges

- ▶ Maintain and increase scientific production and funding in the next 5 years.
- ▶ Develop a training plan for researchers entering the group while maintaining its translational nature.
- ▶ Establish new cooperation agreements to increase number of applications for European and international projects.
- ▶ Establish links with technological innovation groups and companies to foster additional patent applications and contracts.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Genetics in Neurodegenerative Diseases (PI: Jordi Clarimon).
- ▶ Molecular Physiology of the Synapse (PI: Alex Bayés).
- ▶ Cerebrovascular Diseases (PI: Joan Martí-Fàbregas).
- ▶ Neuromuscular Diseases (PI: Isabel Illa, Ricard Rojas).
- ▶ Parkinson Disease and Movement Disorders (PI: Jaime Kulisevsky).
- ▶ Nuclear Medicine (PI: Ignasi Carrió, Valle Camacho).
- ▶ Multidisciplinary Sleep Unit (PI: Sandra Giménez)

Main Lines of Research

- ▶ Ours is a multidisciplinary research group, which has the added value of combining neuroimaging skills of the members of the Neuroradiology Clinical Unit at Hospital de la Santa Creu i Sant Pau with technological knowledge from PIC/IFAE investigators at the Universitat Autònoma de Barcelona (Spain) and University College London (UCL, UK).
- ▶ Our focus are: 1) Neuroimaging biomarkers in diseases involving the central nervous system, including neurodegenerative and neuropsychiatric conditions; 2) Automatic procedures and software tools, especially those of Deep Learning/Artificial Intelligence, in neuroradiology.

Scientific Challenges

- ▶ To achieve visibility of our research group and of neuroradiology –often considered by clinicians more a technical tool rather than a discipline in itself– as a defined field of knowledge.
- ▶ To add knowledge in clinical Neuroradiology to the development and implementation of artificial intelligence in diagnostic imaging.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Pituitary Gland Disorders, Digestive Diseases, Parkinson Disease and Movement Disorders, Cerebrovascular Diseases.
- ▶ Neuro-Oncology, Maternal Care/Obstetrics, Clinical Psychiatry, Head and Neck Tumours/Otorrinolaringology.

Main Lines of Research

Health promotion and prevention in older people

- ▶ Healthy ageing. Promotion of intrinsic capacities.
- ▶ Healthy habits: Physical activity, sedentary behaviour, healthy diet, cognition stimulation.
- ▶ Epidemiological studies.
- ▶ ICT applications to promote healthy ageing.

Geriatric syndromes and health problems of older people

- ▶ Frailty and sarcopenia.

- ▶ Functional assessment.

Scientific Challenges

Health promotion and prevention in older people

- ▶ Area mainly focused on health promotion and disability prevention to improve quality of life among older people. How we improve intrinsic capacities and functional capacity with age.
- ▶ Clinical and epidemiological research undertaken includes both observational and intervention studies, with the main lines of research referring to mobility, nutrition and cognition.
- ▶ ICT Solutions for promoting healthy ageing.

Geriatric syndromes and health problems of older people

- ▶ Screening, diagnosis and intervention in geriatric syndromes.

- ▶ Screening of frailty and sarcopenia. How to apply in in clinical practice.
- ▶ Identifying risk of falls and falls prevention in the community and nursing homes.

Long term care

- ▶ How to apply Personal Centered Care in social centres is a key element to promote quality of social services.
- ▶ New models of services for older people with long term care needs.

Main Lines of Research

Alcohol

- ▶ Pharmacological-epidemiological, non-interventive, prospective, multicenter study with Selincro® in alcohol dependence, to determine patterns of use and consumption of alcohol in routine clinical practice in Spain.
- ▶ Prospective observational study for reducing the negative consequences associated with excessive alcohol use (RINCA) through the treatment program to reduce alcohol consumption with nalmefene.

Cocaine

- ▶ Evaluation of cocaine craving during hospitalization conditions.

Tobacco

- ▶ Evaluation of the neuropsychiatric safety and efficacy of varenicline and bupropion hydrochloride for smoking cessation in subjects with and without a history of psychiatric disorders.
- ▶ Non-treatment follow-up for cardiac assessments following use of smoking cessation treatments in subjects with and without a history of psychiatric disorders.
- ▶ Effectiveness of a telephone intervention for smoking cessation in patients with mental disorder: a pragmatic clinical trial.

Opiates

- ▶ Patient satisfaction concerning maintenance treatment with opioid agonists (methadone and buprenorphine/naloxone).
- ▶ Satisfaction of the heroin-dependent patient regarding methadone and methadone pharmacogenetics.

Behavioral Addictions

- ▶ Effectiveness of a Mindfulness-Based Cognitive-Behavioral Therapy for Gambling Disorder. A randomized controlled trial.
- ▶ Effectiveness of a combined treatment for Hypersexual Disorder.
- ▶ Impact of the gambling advertising in general and clinical population.
- ▶ Effectiveness of the Cognitive-Behavioral Therapy for behavioral addictions.

Detoxification Hospital Units

- ▶ Retention of treatment in detoxification and dehabilitation hospital units.

Scientific Challenges

- ▶ Establish bidirectional links between clinical practice and investigation both to suggest hypotheses and incorporate recent advances.
- ▶ Participate in controlled clinical trials on the treatment of addictive disorders.
- ▶ Develop clinical research studies into the perspective of patients with addictions.
- ▶ Integrate clinical research in routine medical practice to assess the effectiveness of procedures.
- ▶ Evaluate the validity and reliability of frequently used clinical evaluation procedures.

Main Lines of Research

- ▶ Molecular and cellular dysfunctions underlying intellectual disability and autism.
- ▶ Research into animal models of mental and behavioural disorders.
- ▶ Development of new biochemical methods to study the synapse.
- ▶ Molecular and cellular analyses of the vertebrate synapse.

Scientific Challenges

- ▶ Characterize the molecular roots of cognition and behaviour.
- ▶ Identify the synaptic molecules and mechanisms involved in mental and behavioural disorders, mainly intellectual disabilities and autism spectrum disorders.
- ▶ Identify drugs which might help treat mental and behavioural disorders.
- ▶ Study the reversibility after birth of neurodevelopmental disorders affecting cognition.

Main Lines of Research

- ▶ Genetic risk factors for stroke.
- ▶ Pharmacogenetics of neurovascular diseases.
- ▶ Pharmacogenetics of neurovascular diseases.
- ▶ Genetic and epigenetic risk factors for stroke outcome. Long-term disability and acute neurological deterioration.
- ▶ Genetic, epigenetic and proteomic risk factors associated with endophenotypes during the acute phase of stroke. Integromics.
- ▶ CADASIL, Fabry and other monogenic diseases associated with stroke.

Scientific Challenges

The objectives for the next years are:

At a scientific level:

- ▶ To increase the impact factor of the group's publications.
- ▶ To consolidate the group as one of the groups with the most experience in epigenetic and pharmacogenomic studies in stroke.
- ▶ To find genetic factors associated with neurological deterioration and post-stroke disability that could be potential therapeutic targets.

At the organizational level:

- ▶ To consolidate the group with a constant number of researchers.
- ▶ To obtain European or US international grants.
- ▶ To improve the position within the International Genetics Consortium (ISGC) consortium.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Neurobiology of Dementias (PI: Alberto Lleó)
- ▶ Oncogenesis and Antitumour Drugs (PI: Ramón Mangues)

Main Lines of Research

Gastrointestinal surgery

- ▶ Application of laparoscopic surgery in diseases of the spleen.
- ▶ Application of laparoscopic surgery in disorders of the oesophago-gastric junction.
- ▶ Advanced application of colorectal laparoscopy.
- ▶ New stratification and treatment options in colorectal cancer.

Hepatobiliopancreatic surgery

- ▶ Surgery for liver metastasis in colorectal cancer.
- ▶ Development of diagnostic and therapeutic techniques in the global context of treatment for liver metastasis in colorectal carcinoma.
- ▶ Surgery for primary hepatic tumours: determination of efficient prognostic parameters for surgical resection of hepatocarcinoma and likelihood of tumour recurrence after resection.
- ▶ Introduction of the laparoscopic methodology to biliary lithiasis.

Endocrine, breast, abdominal wall, soft tissue sarcomas and advanced gynecological surgery

- ▶ Surgery of the thyroid gland. Research on thyroid cancer.
- ▶ Advanced surgery on parathyroid glands (primary and secondary hyperparathyroidism).
- ▶ Adrenal surgery.
- ▶ Surgery for sarcomas: participation in the development and results of surgery for retroperitoneal tumours.
- ▶ Surgery for sarcomas: participation in GIST research through the Spanish Sarcoma Research Group (GEIS) and other entities.
- ▶ Surgery of advanced gynecological tumors.
- ▶ Advanced surgery of abdominal wall. New techniques for ventral hernia repair.

Emergency care

- ▶ Collaborative project on clinical safety for the introduction of safe practices for polytraumatized patients.

Scientific Challenges

Gastrointestinal surgery

- ▶ Design, develop and manage a dry laboratory for endoscopic surgery, creating a multifunctional research and teaching space to conduct applied technological research in minimally invasive surgery.

Hepatobiliopancreatic surgery

- ▶ Development of techniques to study liver volume and function.
- ▶ Development of experimental studies on the function and healing of bilio-intestinal sutures.
- ▶ Studies of the value of nutrition in patients undergoing aggressive surgery for highly debilitating cancer.
- ▶ Suitable stratification of GIST tumours in accordance with an anatomicopathological classification.

- ▶ Viability of surgical interventions considering the likelihood of disease recurrence.

Emergency surgery

- ▶ Consolidation of a multidisciplinary group for polytraumatized patient care.

Breast surgery

- ▶ Technological innovations in surgery.
- ▶ Possible role of genetic studies in diagnosis and follow-up.

Endocrinal and cervical surgery

- ▶ Technical innovations in surgery.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Endocrinology, Diabetes and Nutrition. Institut de Recerca Hospital de la Santa Creu i Sant Pau - Universitat Autònoma de Barcelona (IRHSP-EDUAB). Eugenia Mato (CIBER Bioingeniería, Biomateriales y Nanomedicina).

External Collaborations

- ▶ Obtención de resecciones hepáticas para aislamiento de hepatocitos para uso en investigación. Donation and Transplantation Institute (DTI). 49/2009.
- ▶ Dr. González (IP at Hospital de Sant Pau). RESAR Project. Project of international prospective database in Retroperitoneal Sarcomas led by the Tumori Institute of Milan since December 2018.

Grants Awarded in 2018

- ▶ Antonio Moral Duarte. Convenio para la asistencia al XXII Congreso Nacional de Cirugía. G19-2039, W. L. Gore and Associates. Duration: 2018. 2,000 €.

Main Lines of Research

Fundació Puigvert's Nephrology Research Group has been part of the IIB since its very beginning. The group carries out translational research within the field of renal diseases along different lines from hypertension, hereditary diseases, glomerular diseases and renal fibrosis, to transplants and dialysis.

Those different lines are analysed in detail below:

- ▶ Dra. Torra is the head researcher of the hereditary diseases line – she and Dra. Ars have leaded many research projects on these diseases, and both have supervised several doctoral theses. The hereditary renal diseases team is currently analysing phenotype variability of those diseases, both in its genomic and its clinical dimension. Dra. Torra coordinates both the Catalan and the Spanish hereditary renal diseases teams, and is a member of the homonymous European board of the EDTA (European Dialysis and Transplant Association).
- ▶ Dra. Ars heads the molecular genetics laboratory; she has optimised the Next generation sequencing tools for hereditary renal diseases. Dra. Ars coordinates the Sant Pau IIB's Fundació Puigvert's On-line Biobank node belonging to the National Biobanks Platform. She is also the person responsible for organising an European Molecular Quality Network (EMQN) outline for quality control of the genetic diagnoses of ADPKD by European laboratories. Currently she is leading a research project for applying this outline to kidney and urinary tract congenital abnormalities.
- ▶ Jointly with Dra. Díaz, Dr. Ballarín leads several clinical trials, both national and international, on glomerular and systemic diseases affecting the kidneys. They also participate in registries at a Catalan, Spanish and European level.
- ▶ Dra. Díaz leads the studies on renal inflammation and fibrosis. Renal grafts from cadaveric donors are an apt model for her study due to their less-good prognosis and to a high probability of inflammation and ensuing fibrosis as compared to living donor grafts. Dra. Díaz and Dra. Guillén have identified the activation of purinoma elements, both in cell cultures and in grafts from cadaver donors. This activation participates in inflammation and fibrosis, triggered by the phenotype change of macrophages into anti-inflammatory and pro-fibrotic, and interacting with other pro-fibrotic classical pathways. This new role of the purinergic pathways could be the key for the detection of new markers and new therapeutic targets associated with renal graft dysfunction after transplant.
- ▶ Dra. Fernández-Llama is participating in the development of a prototype of a multiplex system for flow cytometry focused on a new multi-parametric etio-pathogenic diagnosis of acute renal damage. As an expert in hypertension, she participates in a collaborative trial for evaluating 24-hour central blood pressure, its circadian rhythms and its relationship with organic damage.
- ▶ Dr. Bover is also a member of the EDTA work force board on bone metabolism, this being his primary research subject.
- ▶ Dr. Díaz leads the dialysis research line. Currently the two major research lines are concerned with the appropriateness of peritoneal dialysis, and the investigation for biomarkers of the acute renal failure.
- ▶ Dra. Coll, who belongs in the dialysis team, heads the research of genomic damage in patients on renal replacement therapy, either transplant or dialysis. She analyses the differences of oxidative stress in transplanted vs. dialysis patients. She also analyses the effect of different antioxidants on genomic damage of dialysis patients.
- ▶ The transplant team, leaded by Dr. Guirado, either participates or heads over 15 studies, amongst them clinical trials with drugs against kidney rejection or for treating associated viral infections. His active participation and his leadership in the investigation of biochemical, serologic and genomic biomarkers of both rejection and viral infections associated with renal transplant, are outstanding.
- ▶ Ms. Luz San Miguel, Ms. Judith Ballart, Ms. Irene Silva and Ms. Beatriz Bardají are the coordinators of clinical studies and trials. Their work is essential and of the utmost importance for carrying out the high number of clinical trials performed by the group.

Scientific Challenges

- ▶ To strengthen our translational character and maintain our scientific production.
- ▶ To transfer research results to society as our main goal. To maintain and increase our relationship with patient associations in order to progressively incorporate the RRI approach into our translational research with the objective to better align the research process and its results with the values, the needs and the expectations of our patients.
- ▶ To potentiate Innovation: To continue with active collection of research samples from CKD and transplant patients. To collaborate with private and researchers groups in the detection of tissue, urine and blood biomarkers for the development of innovative tools for optimizing the diagnosis or follow up control of transplant, inherited diseases, chronic renal patients. To participate in innovative projects with Information and Communication Technologies (ICT) for educational purposes and empowerment of patients.

- ▶ To strengthen collaborative research as the best way to obtain funds and results: To maintain participation in national working groups and increase international cooperation. To achieve to access to European projects funds in the field of rare inherited diseases.
- ▶ To consolidate our participation in the elaboration of national and international clinical nephrology guidelines.
- ▶ To increase our participation in relevant private pharmaceutical clinical studies, specially early-staged clinical trials.

Collaborations

Collaborations with other IIB Sant Pau Groups

Active collaboration in basic and clinical research projects

- ▶ Inflammatory Diseases Group: renal fibrosis.
- ▶ Anaesthesiology Group (in collaboration with the Catalan ANES-CARDIOCAT Group): risk of major adverse cardiovascular and cerebrovascular events in non-cardiac surgery associated with the pre-operative estimated glomerular filtration rate.
- ▶ Paediatrics Group: nephrotic syndrome evolution, Ig A nephropathy and inherited kidney diseases.
- ▶ Andrology Group: infertility.
- ▶ Urology Group: genetic predisposition to congenital urological malformations and transplant.
- ▶ Gynecology Group: High risk pregnancies, prenatal diagnosis, pre-implantation diagnosis.
- ▶ Reumatology Group: bone disease in chronic renal failure.
- ▶ Multidisciplinary teams for inherited kidney diseases: collaboration with most specialities from Sant Pau Hospital for different inherited kidney diseases (data bases, articles, protocols...).
- ▶ Biobank platform: translational research in all specific lines.

External Collaborations

National Academic Collaborations

Main Lines of Research

- ▶ Prediction and prevention of complications arising from placental insufficiency, intrauterine growth restriction / preeclampsia (IUGR / PE).
- ▶ Placental insufficiency and maternal cardiovascular risk later in life.
- ▶ Role of the oxygen transport deficit in the placental insufficiency.
- ▶ Development of predictive methods based on the integration of pre and postnatal factors for the detection of abnormal neurodevelopment in congenital hearts diseases.
- ▶ Toxics and air pollution effects on pregnancy and fetal programming.
- ▶ Management of pelvic floor dysfunction: chronic pelvic pain, urinary incontinence and pelvic organ prolapse.

Scientific Challenges

- ▶ To study novel placental biomarkers in the diagnosis and prognosis of preeclampsia (PE) and intrauterine growth restriction (IUGR) in order to generate future hypothesis for target prevention and therapeutic interventions in these pathologies.
- ▶ To determine the usefulness of novel placental biomarkers (sFlt-1/PIGF ratio) in the diagnosis and prognosis of preeclampsia (PE) in order to change policies and improve maternal and neonatal health.
- ▶ To study novel maternal cardiovascular risk biomarkers after placental insufficiency and to explore potential preventive strategies in order to identify mother at risk for cardiovascular disease later in life.
- ▶ To study the role of placental insufficiency and hypoxia in congenital heart disease in order to gain insights into the relationships between hypoxia-dependent placental morphogenesis, placental function and effects on oxygen metabolism in the fetus.
- ▶ To develop biomarkers in fetal and neonatal life that help to predict postnatal neurological risk in congenital heart diseases.
- ▶ To evaluate the impact of maternal exposure to traffic-related air pollution on fetal development in order to generate evidence base to support regulation, implementation of finely-targeted interventions, and in time, the inclusion of this impact in the next iteration of the global burden of the diseases (GBD) attributable to ambient air pollution.

Collaborations

Collaborations with other IIB Sant Pau Groups

Main Lines of Research

- ▶ Identify new prognostic biomarkers and new therapeutic targets for risk and therapeutic stratification in endometrial cancer patients.
- ▶ Study the effect of the nervous system in tumor progression and metastasis in gynaecological and peritoneal cancers.
- ▶ Modeling gynecological and peritoneal cancers in animals to better understand tumor physiopathology and the use for preclinical drug evaluation.
- ▶ Development of new antitumour drugs, using nanotechnology, in cell lines and animal models for targeted delivery to cancer stem cells (in collaboration with the Oncogenesis and Antitumour Drugs group).

Scientific Challenges

- ▶ Promote clinical and translational research into Gynecological cancers with a very large database and study relevant clinical issues.
- ▶ Obtain funding from FIS, regional authorities and private companies.
- ▶ Enhance cooperation with other clinical and research groups in Sant Pau and extra-hospital and attract predoctoral and postdoctoral fellows.
- ▶ Develop molecular markers for therapeutic decision-making in endometrial cancer patients.
- ▶ Identification and validation of novel therapeutic targets related to neuromodulation in tumor progression of gynecological cancers.
- ▶ Achieve antitumor and antimetastatic effects by targeting drugs to cancer stem cells in gynecological and peritoneal cancers.

Main Lines of Research

Main lines of research

- ▶ Evidence-based medicine: systematic reviews, clinical practice guidelines and clinical trials.
- ▶ Health service evaluations.
- ▶ Methodological research.

Areas of interest

- ▶ Evidence-based medicine.
- ▶ Cancer.
- ▶ Perioperative medicine.
- ▶ Cardiovascular medicine.
- ▶ Public health.
- ▶ Appropriateness.

Scientific Challenges

- ▶ To develop and promote systematic-review production about the effects of healthcare interventions, in order to contribute to healthcare and clinical decision-making based on the best available scientific evidence.
- ▶ To promote national and international clinical and applied research projects that will contribute with new knowledge to solve clinical or healthcare problems that are relevant to the needs of the system (applied clinical studies, healthcare services assessment studies, clinical trials).
- ▶ To foster, organise and/or conduct training activities in order to promote healthcare professionals' acquisition of skills and knowledge on Evidence-Based Medicine (EBM) tools.
- ▶ To promote methodological research projects aiming to provide guidance and tools to improve scientific information analysis, interpretation and communication.
- ▶ To develop knowledge transfer activities (clinical practice guidelines) and scientific-knowledge dissemination tools.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Addictive Behaviours
- ▶ Anaesthesiology
- ▶ Angiology, Vascular Biology and Inflammation
- ▶ Blood and Tissue Bank
- ▶ Central Clinical Research and Clinical Trials Unit
- ▶ Clinical and Translational Cardiology
- ▶ Clinical Oncology
- ▶ Evaluation of Public Health Policies and Programmes - Public Health Agency of Barcelona
- ▶ Locomotor System Research
- ▶ Palliative Care
- ▶ Plastic Surgery
- ▶ Primary Care Research - EAP Sardenya
- ▶ Thrombosis and Haemostasis
- ▶ Urology
- ▶ Women and Perinatal Health Research

External Collaborations

- ▶ Population Health Research Institute, Mc-Master University (Canada).
- ▶ Clinical Trial Service Unit and Epidemiological Studies Unit, University of Oxford (United Kingdom).
- ▶ European Respiratory Society.
- ▶ Facultad de Ciencias de la Salud, Universidad Tecnológica Equinoccial (Ecuador).
- ▶ GRADE Working Group.

Main Lines of Research

- ▶ Evaluation of Public Health Policies and Programmes.
- ▶ Monitoring of behaviours and other health risk factors such as environmental exposure.
- ▶ Process and impact evaluation of public health programmes and services (schoolbased prevention programmes for obesity, smoking, alcohol and cannabis consumption, breast cancer screening programmes and memory training workshops for elderly people) and public policies (Barcelona mental health action plan, energy poverty, guaranteed minimum income, “superilles”).
- ▶ Evaluation of ICT innovation in public health.
- ▶ Evaluation of food contaminants.

Scientific Challenges

- ▶ Promote research into the evaluation of policies and programmes.
- ▶ Support the debate on conceptual and methodological aspects of results evaluation in prevention and health promotion.
- ▶ Consolidate the group’s research, fostering less developed aspects such as financial assessment and evaluation of health protection interventions.
- ▶ Develop a theoretical corpus of concepts, principles, methods and examples that contribute to filling the gap in underand postgraduate teaching regarding the design and evaluation of risk prevention and health promotion interventions.

Main Lines of Research

- ▶ Health impacts of urban health, including housing, urban planning and mobility.
- ▶ Public health injury surveillance.
- ▶ Evaluation of road safety strategies at the urban level.
- ▶ Indicators of mobility exposure and risk of traffic injuries.
- ▶ Determinants of walking as a mode of transport.
- ▶ Health impact assessment of active transport (walking and cycling).
- ▶ Inter-sector policies in transport: impact on sustainable environment, health and equity.

Scientific Challenges

- ▶ Study of the nature of injuries and their severity according to the characteristics of the collision and the vehicles involved, particularly in urban settings.
- ▶ Evaluate road safety policies and interventions.
- ▶ Calculation of risk indicators using mobility exposure.
- ▶ Study motorized and non-motorized mobility and its impact on health.

Main Lines of Research

Line 1: Tuberculosis prevention and treatment adherence

► Investigate the impact of the incorporation of new technologies and circuits to favor the control of TB transmission, treatment adherence and TB contact tracing (Farma TITL project, Video DOT, etc.). To describe the incidence and epidemiological characteristics of multidrug resistant TB and TB in people infected with HIV in Europe (Study groups: TB-Net and EuroTB are carrying out observational epidemiological studies to get a more accurate view of this illness). Develop network information tools with different people in charge of the control of TB in other European cities, which allow developing strategies of assistance and control of the disease most suitable for large cities. We participate in the group "TB in Big Cities" promoted by the European CDC and with which we have made a document of consensus on control strategies in large cities. Describe socio-demographic, epidemiological and clinical characteristic of certain vulnerable groups that suffers from TB such as children, immigrants, homeless, etc.

Line 2: HIV and other STI surveillance and control

► Evaluation of interventions based on reducing diagnostic delay of HIV and other sexual transmitted infections (STI): study of sexual contacts, especially vulnerable groups (men who have sex with men, immigrant population...) and offers the HIV and STI tests. The aims are: 1. To offer the HIV test, and other STIs for men who have sex with men and other users of gays saunas, 2. To increase the vaccination coverage of hepatitis A and B in this group, 3. To improve the awareness of the users and workers of the saunas about the risk of exposing themselves to situations that favor the transmission and the need to take prevention measures and facilitate the access of preventive materials for HIV/STI/Hepatitis, 4. Involve entrepreneurs and employees of these centers in the implementation of this initiative. 5. Inform about access to other prevention services outside of saunas.

Line 3: Research in other notifiable diseases

► It focuses on the study of the temporal evolution and transmission patterns of parotiditis, pertussis, other STI, epidemic outbreaks and other emerging diseases, both in Spanish and Foreign-born. The aims are: 1. To describe the epidemiological pattern of these diseases in the last 10 years with the objective of detecting possible changes during the period 2014-2018 and its relationship with the economic crisis. We always try to strengthen the prevention and control measures in order to prevent the appearance of new cases. 2. Describe the temporal evolution of measles and parotiditis in relation to the systematic vaccination policies developed in Catalonia. 3. Investigate the transmission lines during the epidemic measles peri-

ods promoting the identification of strains due to molecular epidemiology. 4. Investigate the lines of transmission of pertussis during periods of epidemic in order to establish the discussion about different strategies for preventing the disease. 5. Investigate the sources of infection and the intrafamily secondary transmission rates of the pertussis, and establish the lines of transmission of pertussis within the family nucleus. 6. To know the epidemiological pattern of malaria in order to identify previously possible cases of autochthonous transmission of disease. 7. In hepatitis we are dealing with the European project, Hepscreen, which objective is to compare 2 strategies: passive (prevalence of infection is seen in immigrants who consult) and active (prevalences are studied from immigrants recruited by community health workers).

Line 4: Community health workers and notifiable disease control among foreign born patients

► For more than fifteen years, we have a team of Community Health Workers (CHW) that acts as sociocultural mediators and translators. They are from six different regions worldwide and collaborate within the team of epidemiologists and public health nursing team. Based on a strategy of complementary profiles, they are responsible for carrying out accompaniment in the diagnosis and treatment of diseases such as TB, hepatitis or HIV in populations with language barriers or the risk of social exclusion (undocumented immigrants). With their cultural and idiomatic profile, can treat patients from Eastern Europe, Asian countries with high incidence of communicable diseases such as China and India, Latin American, Maghreb countries and of sub-Saharan Africa. The aims are: 1. To evaluate the impact of their intervention in prevention and control of communicable diseases (HIV, TB and STI) in immigrant, 2. To adapt and disseminate information for the prevention and the promotion of healthy habits 3. To increase knowledge of the risk factors among these groups, as well as adequate access to the Catalan health system and 4. To reinforce patient's social relations into the communities so that they can become a useful resource in the fight against HIV, other STI and TB.

Line 5: Vaccine hesitancy

► To identify attitudes, beliefs, and knowledge about vaccines among the health care workers who are involved in the administration of systematic childhood vaccines in the public primary care setting in Barcelona, Spain. To describe and compare knowledge, attitudes, and beliefs regarding the vaccination calendar of pediatric primary care teams (doctors and nurses) and determine the factors associated with vaccine hesitancy in Barcelona in 2016-17.

Line 6: Vector Born Transmitted Diseases

▶ Arboviruses and other arthropod born disease such as malaria, are a group of diseases transmitted through arthropods. Many of them are capable of producing infection in humans. Some of the arboviruses such as West Nile Virus (WNV), Chikungunya (CHK), Dengue or Zika Virus (ZV) are emerging and have a high potential of generating epidemic outbreaks in European non-endemic countries. The threat of arbovirolosis emergence and re-emergence has created a risk scenario for global public health. ZV as CHK, dengue and WNV are mandatory notification diseases in Spain. Furthermore, in Barcelona an active epidemiological surveillance system is carried out based on a close relationship with the doctors in charge of imported diseases and in the electronic notification system for notification diseases. It is precisely this concern that has led several countries to adopt new protocols and procedures that adapt to these new situations to re-

spond to this public health problem. After the diagnostic of the first cases of imported arbovirolosis in the city, it was seen that they could pose a risk to public health since *A.albopictus* is endemic in our setting. That is the reason why a system of active epidemiological and entomological surveillance of notifiable diseases records (EDO) for each detected case, has been implemented and the Epidemiology and Entomological Surveillance Service, both from the Public Health Agency of Barcelona are working very close for minimizing the risk of having an autochthonous case. The aims are: 1. To explain the epidemiological and entomological surveillance that took place against the vector born transmitted diseases, and 2.To identify the possible areas if improvement in the procedures in order to control ZV and other emerging arbovirolosis that could be transmitted by local competent vectors.

Scientific Challenges

- ▶ Prevent sexually transmitted infections and other transmissible diseases.
- ▶ Evaluate HIV screening programs in gay saunas.
- ▶ Improve detection and research into causes of C hepatitis.
- ▶ Improve detection and control measures of outbreaks.
- ▶ Improve adherence of tuberculosis and latent tuberculosis infection.
- ▶ STD/HIV and TB contract tracing.
- ▶ Cost effective analysis on public health interventions.
- ▶ Describe the threats and improve the procedures of vector born transmitted diseases.

Main Lines of Research

Social class and geographical inequalities in health

- ▶ Study of health inequalities according to social class in Spain and worldwide.
- ▶ Exploitation of information at the census section level as the maximum disaggregation unit and at higher geographic aggregation levels such as the neighbourhood, town and region.

Gender inequalities in health

- ▶ Sexual division between productive and reproductive work (gender roles) and differences in male and female identities as the 2 main structural factors that generate gender inequalities in health.

Social and political determinants of health and their impact on policy building and interventions

- ▶ Evidence of the macroeconomic determinants of health inequalities between countries.
- ▶ The impact of the political context on the health of the population and the conclusion that countries with better developed welfare states have better levels of health.

Scientific Challenges

Health-inequalities according to different inequality axes

- ▶ Study of social determinants of health in terms of social class and gender, with the purpose of integrating these 2 axes and analysing inequalities among immigrants.
- ▶ Research into the impact of area of residence, especially smaller urbanized areas, on the health of the population.

Gender inequalities in health

- ▶ Further explore the theoretical framework and explanatory charts developed to guide comprehension of the gender determinants that affect health.

Social and political determinants of health and their impact on policy building and interventions

- ▶ Study the influence of policies on the health of populations and on social inequalities in health.

Sex and reproductive inequalities in health

- ▶ Establish a line of research to investigate different aspects of sexual and reproductive health (sexuality, contraception, pregnancy, birth, miscarriage, abortion, birth rates, etc).

Main Lines of Research

Epidemiology of Drug Consumption and Patterns of Use

- ▶ Estimating cocaine use incidence and consumption patterns.
- ▶ Estimating heroin incidence and consumption patterns.
- ▶ Estimating the prevalence of problematic cocaine, heroin and alcohol users.

Health Problems Associated with Drug Use

- ▶ Quality of life and psychiatric comorbidity in cocaine users.
- ▶ Service use in cocaine and alcohol users.
- ▶ Factors associated with cocaine addict and alcoholic retention in treatment programmes.
- ▶ Violent behaviour and aggressive attitudes in young cocaine consumers.

- ▶ Mortality and its determinants in cohorts with substance abuse disorders (alcohol, heroin and cocaine).
- ▶ Factors associated with acute health problems developing after cocaine and heroin use.
- ▶ Social and health discrepancies between immigrants and native drug users.

Health Policies

- ▶ Social inequalities in the evaluation of results and adherence to treatment.
- ▶ Infectious diseases related to drug use.
- ▶ Brief motivational intervention programs as a treatment alternative for teenage users of psychoactive substances.
- ▶ Role of the workplace in drug consumption.

Scientific Challenges

Epidemiology of Drug Consumption and Patterns of Use

- ▶ Determine incidence and patterns of cocaine use.
- ▶ Determine incidence and patterns of heroin use.
- ▶ Determine prevalence of cocaine, heroin and alcohol use.

Health Problems Associated with Drug Use

- ▶ Analyse aggressive and violent attitudes and behaviour in young cocaine users.
- ▶ Assess quality of life in users with psychiatric comorbidity.
- ▶ Determine use of services among young heroin, cocaine and alcohol users.
- ▶ Analyse factors associated with retention in treatment programmes for cocaine and alcohol addiction.

- ▶ Assess mortality and its determinants in cohorts of alcohol and cocaine-dependent subjects.
- ▶ Analyse factors associated with acute health problems following cocaine use.
- ▶ Analyse differential social and health determinants among immigrant users of illegal drugs.

Health Policies

- ▶ Evaluate supervised drug consumption rooms and other policies to reduce harm.
- ▶ Study social inequalities in evaluating results and adherence to treatment.
- ▶ Evaluate brief motivational intervention programmes as an alternative to disciplinary measures in teenage users of psychoactive substances.

Collaborations

Main Lines of Research

Cancer

- ▶ Structural and functional analysis of the androgen receptor (AR). Design and structure-function characterization of AR homodimerization inhibitors.
- ▶ Analysis of mutations and SNPs that affect the TET2 gene and implications for hematopoietic and lymphoid neoplasms.

Neurodegenerative diseases

- ▶ Analysis of the structural bases of exon-7 exclusion from SMN2 and implications for the pathobiology of spinal muscular atrophy (SMA).
- ▶ Structural and functional investigations of the kinase, PINK1, and implications for Parkinson's disease.

Thrombosis and haemostasis

- ▶ Structural and functional investigations of blood coagulation factors, with emphasis on thrombin interactions with physiological substrates (factor VIII and protease-activated receptors).

Lipid metabolism and dyslipidemias

- ▶ Bioinformatics analysis of STAP1 mutations identified in individuals with hypercholesterolemia.

Scientific Challenges

- ▶ Consolidate and extend research within the HSCSP Research Institute and the rest of the IIB Sant Pau in a context of limited access to financial support. To this end, the group needs to participate in at

least one financed structure-and-function project in each of three major research areas (cardiovascular diseases, neurodegenerative diseases and cancer and innate immune responses).

Members

Pla Juncà, Francesc (IR)

Main Lines of Research

- ▶ Population pharmacokinetic analysis aimed at establishing the pharmacokinetic characteristics of drugs and at differentiating and quantifying the degree of intra- and inter- variability.
- ▶ Pharmacokinetic/pharmacodynamic analysis of continuous response aimed at the analysis of effects (in the presence or absence of drugs) where the variable being evaluated changes values gradually.
- ▶ Pharmacokinetic/pharmacodynamic analysis of non-continuous response for responses most frequently observed in clinical practice, such as categorical responses, survival, frequency and censored responses.
- ▶ Simulation of clinical trials and therapeutic dosage selection aimed at assisting with the design of clinical trials to help the development of new drugs (for pharmaceutical companies) and at improving the design of clinical trials (basic research and non-profit clinical studies) and to help in applications of daily clinical practice.

Scientific Challenges

- ▶ Maintain existing external cooperation agreements.
- ▶ Establish new cooperation agreements within the HSCSP RI.
- ▶ Generate sufficient financial resources to maintain and expand group staffing.
- ▶ Communicate the group's activities.

Main Lines of Research

- ▶ Tissue procurement, clinical application, ethics and regulation.
- ▶ Tissue decellularization approaches for clinical applications.
- ▶ Cell-based therapy for ocular diseases.
- ▶ 3D bioimpression and biocompatible substrates.
- ▶ Ex-vivo cell expansion for regenerative purposes.

Scientific Challenges

- ▶ Optimization and improvement of technical procedures related to the donor and tissues.
- ▶ Advances in the elaboration of criteria, regulation and ethics for donor and tissues.
- ▶ Technical excellence related to the processing cells, tissues and advanced therapies medical products (ATMP).
- ▶ The development of new approaches and ATMPs for regenerative medicine.

- ▶ Acute Respiratory Failure. PI: A. Moliné.
- ▶ Ventilatory pattern analysis in heart failure. PI: Sergio Herrera.
- ▶ Pneumonia in the emergency department. PI: Miriam Mateo.

- ▶ Noninvasive ventilation. PI: Miquel Turbau.
- ▶ Pulmonary embolism. PI: Laura Lozano.

Cardiovascular System (Miquel Santaló)

- ▶ Acute coronary syndrome PI: Ivan Díaz.
- ▶ Acute coronary syndrome in women. PI: Marta Blázquez.
- ▶ Ultrasensitive markers in acute coronary syndrome. PI: Aitor Alquézar.
- ▶ Cardiac failure. PI: Miguel Rizzi.
- ▶ Supraventricular arrhythmias. PI: Olga Trejo.

Community Disorders

- ▶ Diabetes care in emergency departments. PI: Iván Agra.
- ▶ Infection in emergency departments. PI: J.M. Guardiola.
- ▶ Sepsis syndrome. PI: Ivan Díaz.
- ▶ Elderly patients. PI: Leopoldo Higa.
- ▶ Sexes transmitted disease. PI: Montse Seres.
- ▶ Haematology disease. PI: Marta Blázquez.

Main Lines of Research

- ▶ Optimization of the functional rehabilitation of patients after cataract surgery using multifocal intraocular lens, and evaluation of vision quality in terms of parameters such as visual acuity, sensitivity to contrast and aberrometry.
- ▶ Ocular repercussions of allogeneic medullary transplants and evaluation of the different clinical manifestations and response to treatment in graft-versus-host disease.
- ▶ Comparison of the effectiveness and safety of intravitreal injection of ranibizumab vs laser photocoagulation in patients with visual alteration due to diabetic macular edema.

Main Lines of Research

Oncology

- ▶ New diagnostic methods based on the identification and visualization of molecular targets employing metabolic mechanisms, receptor systems, hypoxia, angiogenesis and apoptosis.
- ▶ New applications for sentinel node detection and radioguided surgery models.

Cardiovascular Research

- ▶ New methods for non-invasive assessment of ischaemic heart disease and heart failure.

- ▶ Cardiovascular functional studies.
- ▶ New methods for assessing cardiac innervation.

Functional Neuroimaging

- ▶ Development of new functional imaging methods for evaluating neurodegenerative diseases (Parkinson, Parkinson-Plus, Alzheimer, MCI).
- ▶ Dopaminergic system studies using IBZM and Datscan.

Scientific Challenges

- ▶ Introduce new technologies to clinical research (given that imaging techniques are evolving very rapidly towards multimodal systems that integrate biological, molecular, anatomical and functional information in a single examination) and include these technologies, mainly PET/CT and PET/MR, in the group and hospital's research activities.

New Molecular Imaging Techniques

- ▶ Develop new hybrid molecular imaging technologies, mainly PET/CT and PET/MR, building on pre-clinical and clinical molecular imaging models developed using.
- ▶ SPECT and conventional nuclear medicine technologies.

PET Imaging Biomarkers

- ▶ Develop new PET radioactive tracers to be used as biomarkers in new imaging technologies building on our experience with radioactive tracers to view in vivo diagnostic and therapeutic targets.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Neuroradiology: research into neurological and mental disorders and ageing (Dr. Camacho, member).
- ▶ Oncology, Gynaecology, Surgery, Radiology, Radiotherapy, Nuclear Medicine and Pathology: evaluation of the usefulness of PET CT with 18F-FDG in the staging of locally advanced breast carcinoma (Dr. Duch, PI).

Active Grants

- ▶ Philips Healthcare Master Research Agreement. Assessment of Advanced Technologies for Molecular Imaging.
- ▶ Sub-study to study WN25203, using positron emission tomography (PET) with an amyloid tracer to assess changes in amyloid load over time in subjects with prodromal Alzheimer's disease. ROCHE protocol WN25203-PET-substudy.
- ▶ PET imaging substudy associated with: a phase III, randomized, double-blind, placebo-controlled, parallel-group, multicenter, efficacy, and safety study of gantenerumab in patients with mild Alzheimer's disease. ROCHE protocol WN28745-PET Substudy.
- ▶ Ensayo clínico de fase III, aleatorizado, controlado con placebo, de grupos paralelos, doble ciego, para estudiar la eficacia y la seguridad de MK-8931 (SCH900931) en pacientes con deterioro cognitivo leve amnésico debido a la enfermedad de Alzheimer (EA prodrómica). MK-8931-019.
- ▶ Estudio aleatorizado, doble ciego, controlado con placebo y de grupos paralelos de la eficacia y la seguridad de MK-8931 en sujetos con enfermedad de Alzheimer leve o moderada. MK-8931-017.
- ▶ A 24 month, multicenter, randomized, double-blind, placebo-controlled, parallel-group, efficacy, safety, tolerability, biomarker, and pharmacokinetic study of AZD3293 in outpatients with early Alzheimer's disease. D5010C00009.
- ▶ A Phase 3 Multicenter, Randomized, Double-Blind, Placebo-Controlled, Parallel-Group Study to Evaluate the Efficacy and Safety of Aducanumab (BIB037) in Subjects with Early Alzheimer's Disease. Phase 3. 221AD-301 & 302.
- ▶ A multi-centre, double-blind, parallel-group, randomized controlled study to investigate the efficacy, safety and tolerability of orally administered BI409306 during a 12 week treatment period compared to placebo in patients with Alzheimer's disease. 1289.5.
- ▶ A randomized, double-blind, placebo-controlled and delayed start study of LY3314841 in Mild Alzheimer's disease dementia. I8D-MC-AZET.
- ▶ Multicenter, randomized, double-blind, placebo-controlled study to assess the efficacy, safety, pharmacokinetics, and pharmacodynamics of GZ/SAR402671 in patients with early-stage Parkinson's disease carrying a GBA mutation or other pre-specified variant. ACT14820.
- ▶ A placebo controlled, double blind, parallel group, 24 month study to evaluate the efficacy and safety of E2609 in subjects with early Alzheimer's disease. E2606-G000-302.

Main Lines of Research

Acute Respiratory Failure and Artificial Ventilation

- ▶ Non-invasive ventilation.
- ▶ New ventilation modes: proportional-assist ventilation and NAVA.
- ▶ Prone decubitus in acute respiratory dysfunction syndrome (ARDS).
- ▶ Artificial ventilation withdrawal.
- ▶ Expert ventilation systems.
- ▶ Sleep and artificial ventilation.
- ▶ Early and active mobilization of the critical patient.
- ▶ Extracorporeal CO₂ removal in ARDS patients.
- ▶ High-flow oxygen administration by nasal cannula in postextubation phase.
- ▶ Prevalence of drug interactions in critical care unit.

Study of the Usefulness of New Biomarkers in Critically Ill Patients

- ▶ BNP in weaning from mechanical ventilation.
- ▶ Use of the NGAL protein in the renal prognosis of critically ill patients.
- ▶ Strict control of blood glucose in critically ill patients.
- ▶ Prophylaxis of acute gastric mucosal injury in critically ill patients.
- ▶ Study of the haemodynamic effects of different antipyretic drugs in critically ill patients.
- ▶ Influence of position change to supine decubitus position in intra-abdominal pressure.

Scientific Challenges

- ▶ Consolidate clinical and physiological research into ventilation in critically ill patients through multicentre and multinational networking.
- ▶ Create a stable and well-trained group of researchers in this discipline.

Collaborations

Collaborations with other IIB Sant Pau Groups

Main Lines of Research

- ▶ Biologic therapy in dermatology.
- ▶ Genome-wide association studies in psoriasis.
- ▶ Medical and physical treatment options for vascular tumours.
- ▶ Psychopathological studies of patients with chronic dermatological disorders.
- ▶ Innate and acquired immunity-mediated dermatological diseases.

Scientific Challenges

- ▶ Ensure a stable clinical research infrastructure and staff.
- ▶ Foster interdepartmental collaborative research.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Parkinson Disease and Movement Disorders.

- ▶ Inflammatory Diseases.

Main Lines of Research

- ▶ Intraoperative respiratory strategies.
- ▶ Management of preoperative anxiety in pediatric anesthesia and surgery.
- ▶ Intraoperative hypothermia management.
- ▶ Perioperative TVP management.
- ▶ Perioperative medicine.
- ▶ Patient blood management.
- ▶ Massive blood transfusion and associated hemostatic disorders.
- ▶ Loco-regional anesthesia and ecographic plexus identification.
- ▶ Ecocardiography.
- ▶ ECMO therapy.
- ▶ Acute and chronic pain management.
- ▶ New modalities of care delivery: Preoperative prehabilitation, team preoperative evaluations and perioperative care in Ophthalmic surgery.

Scientific Challenges

- ▶ Critical analysis of new clinical technologies.
- ▶ Patient blood management.
- ▶ Perioperative medicine.
- ▶ Development of new health service systems.
- ▶ Clinical and preclinical research into physiology, pharmacology and anaesthetic/analgesic techniques.

Main Lines of Research

- ▶ Application of imaging techniques for intraoperative studies of perforator vessels with the aim to improve the design of flaps, evaluate the suitable blood perfusion and the viability of the flaps avoiding secondary postoperative complications to secondary vascular supply problems.
- ▶ Anatomical studies of the variability of perforator vessels in the following regions: internal mammary artery, inferior epigastric system and internal superficial circumflex system.
- ▶ Study of the perioperative and postoperative factors that influence on the viability of the microsurgical free flaps.
- ▶ Research by indocyanine green angiography of the concept of vascular blood balance after the dissection of a perforator flap.
- ▶ Research by indocyanine green angiography of the relationship between the different anatomical patterns of lymphatic vessels in the upper extremity and its readiness to develop lymphedema in the affected breast cancer patients.
- ▶ Feasibility of the research in animal models of major surgical and nonsurgical techniques existing today to treat secondary lymphatic insufficiency: fat transplant of autologous stem cells, stem cell transplantation autologous from bone marrow, lymphatic-venous anastomosis, free flap of vascularised autologous lymph nodes.
- ▶ Lymphangiogenesis studies in a comparative animal model between transplantation of adipose tissue stem cells vs bone marrow stem cells, lymphatic-venous anastomoses and transplantation of vascularized lymph nodes for lymphoedema treatment.
- ▶ Research in an experimental animal model on lymphangiogenesis and regeneration of the lymphatic system after a model of obstructive lymphoedema.
- ▶ Imaging studies using lymphography and indocyanine green, as well as lympho-magnetic resonance techniques.

Scientific Challenges

- ▶ Improvement of the preoperative planning of perforator flaps with the help of advances in imaging techniques and knowledge of anatomy.
- ▶ Consolidate and optimize preoperative management techniques for locating the most suitable perforating vessels for each microsurgical flap.
- ▶ Minimize intra- and postoperative complications in perforator flaps using new imaging techniques to visualize intraoperatively patterns of vascularisation of the flaps and vascular blood supply dominance.
- ▶ Lymphedema prevention in those patients with mastectomy in which we perform searching procedures of sentinel node and/or axillaries lymph node dissections using new techniques of surgical treatment for this disease (lymphatic venous anastomosis, transfer of vascularised lymph nodes...).
- ▶ Identification by indocyanine green angiography for those patients affected with breast cancer with a major risk of developing secondary lymphedema.

Collaborations

Main Lines of Research

- ▶ Genetics applied to male infertility.
- ▶ Male fertility preservation in oncological patients.
- ▶ Optimisation of preimplantation genetics diagnosis and in vitro fertilization techniques.
- ▶ New surgical procedures, drugs and medical devices applied to diagnosis, prevention and treatment of andrological diseases and conditions (male sexual dysfunction, hypogonadism, Peyronie disease, premature ejaculation, sexually transmitted diseases).
- ▶ Sexually transmitted diseases and public health.
- ▶ Quality of life and integral sexual approach: gender and psychological aspects.

Scientific Challenges

- ▶ Our multidisciplinary team of professionals develops translational and clinical research in the field of diagnosis and treatment of andrological disorders and female sexuality. To improve our knowledge and thereby improve healthcare for patients, we seek to continue active projects, develop new lines of investigation, increase the number of international publications, train professionals and enhance collaboration with hospital and university groups inside and outside the IIB Sant Pau.
- ▶ To promote awareness and divulgate sexuality as health topic and as main aspect of global health and quality life inclusive in chronic and ill patients to professionals who requires a broad and multidisciplinary approach to their patients.
- ▶ To work up in the relationship with patients associations and progressively incorporate them as workteam to develop a responsible research with relevant results with social impact.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Nephrology Group.
- ▶ Urology Group.
- ▶ Gynecological Group.

External Collaborations

National

- ▶ Medical and Molecular Genetics Centre (RI)-IDIBELL: genetics applied to infertility.
- ▶ Cellular Biology and Medical Genetics Unit-UAB: preimplantation of genetic diagnosis techniques.

International

- ▶ Mario Serio Experimental and Clinical Biomedical Sciences Unit, University of Florence: genetics applied to male infertility.
- ▶ Reproductive Genomics Laboratory, Human Genetics Centre (KU Leuven): genetics applied to male infertility.
- ▶ New England Research Institutes: hypogonadism.
- ▶ European Academy of Andrology: radiology examinations of the male genital tract.

Private

- ▶ Participation in clinical studies including clinical trials and postauthorization studies sponsored by national and international pharmaceutical companies.

Active Grants

- ▶ Csilla Gabriella Krausz. Estudio genético y genómico de subtipos específicos de azoospermia secretora: desarrollo de nuevas herramientas diagnósticas y pronósticas. PI14/01250. Instituto de Salud Carlos III. Duration: 2015-2019. 86,500 €.

Main Lines of Research

The Urology Clinical and Basic Research group has been an associated group of IIB Santpau since its very beginning. The group carries out clinical translational research within the field of urinary tract diseases along different lines from urological cancer, functional urology, stone disease, paediatric urology, renal transplant and reconstructive surgery.

Existing lines of research are:

- ▶ In the area of urological cancer, Dr. Breda is leading several projects mainly related to liquid biopsy in urothelial and prostate cancers, focal treatment of prostate cancer, methodology in enhancing lymph nodes in prostate and upper urinary tract disease, intraoperative detection of tumour grade with confocal endomicroscopy in order to facilitate clinical decisions and avoid unnecessary procedures, the role of systemic chemotherapy in upper urinary tract tumours and the role of PET-CT in renal masses and 3D reconstruction in order to facilitate complex renal surgeries. In testis cancer we are evolving to minimally invasive surgery with robotic retroperitoneal dissection in metastatic disease and finally diagnoses using the sentinel node technique in penile cancer, and also reconstructive surgery after partial penectomy plus laparoscopic lymphadenectomy of the groin.
- ▶ Dr. Palou is leading mainly the projects in bladder cancer: there is a collaborative translational research line of predictive biomarkers in NMIBC progression with the Inflammatory Group and Malmoe University. Bladder preservation in high grade tumours is a difficult decision and the possibility to detect those who will progress will allow earlier aggressive treatment. Another line of research is the nerve sparing surgery in cystectomy in order to preserve sexual function after radical surgery.
- ▶ In paediatric urology, led by Dra. Bujons, there are several topics under research related to long term follow-up in reconstructive surgery, sexual function in neurological diseases and fertility in patients after scrotal surgery (varicocele, orchidopexy). This includes the study of the usefulness of Botuline toxine in hyperactive bladder in children, PH urine studies for the risk of infection in urinary tract anomalies, optimisation of irrigation fluids for the prevention of unnoticed perioperative hypothermia in children during RIRS and NLP and the Autologous fat graft with stem cells as a treatment for abdominal wall defects in patients with complex exstrophy epispadias.
- ▶ In the Urolithiasis line chaired by Dr. Angeri, clinical research in some aspects is performed: laser energy devices for stone destruction (holmium, thulium, superthulium) in collaboration with IIBSantPau General and Digestive Surgery Group for primary hiperparathyroidism, tolerance of surgical material for urolithiasis treatment and pH urine research for the management of cystinuria. In cystinuria, there exists an extensive collaborative research with IDIBELL for its genetic study and an active participation in the National Registry of this Rare Disease.
- ▶ The functional urology section by Dr. Errando is evaluating the clinical results of different surgical techniques and devices in incontinence in both sexes such as paraurethral substance injections, laparoscopic colposacropepy technique, long term functional results of Botox in males, functional results of the transcavernous artificial urinary sphincter implantation in high risk patients, usefulness of probiotics in the prevention of recurrent urinary tract infections, acidification of urine pH for women with recurrent UTIs. A quality of line research collaboration with the Centre de Fisioteràpia (RAP) in Barcelona (associated to the UAB Vall d'Hebron) in clinical apps for patients has been recently begun.
- ▶ Renal transplantation unit by Dr. Breda is investigating 3D reconstruction models to facilitate renal transplant for a better preservation of the kidney. The group is establishing the robotic renal transplant all over Europe and undergoing analysis of the urogenital tumours in renal transplant patient in order to update and change daily practice.
- ▶ BPH surgery is one of the most common in urology and the group of Dr. Ponce de Leon is investigating the way to perform surgery with preservation of antegrade ejaculation with different methodologies (TURP, Rezum). The group also study the use of the Rezum system (intraprostatic vaporization) in BPH, the quality of life of patients who had undergone urethroplasty due to urethral stenosis, the use of oral mucosa for urethroplasties. A recent national collaboration for an Urethroplasties Registry has recently begun.
- ▶ Mrs Vanessa Muñoz and the nurse Ana Palomino are the coordinators of clinical studies and trials. They are key pieces to continue with the ongoing studies of the department.

Scientific Challenges

- ▶ To continue the national and international positions in order to increase the scientific networking of the department.
- ▶ Participate and evolve in the elaboration of European Guidelines.
- ▶ Continue in basic and clinical research of the different established areas.
- ▶ Continue and improve relations with industry (pharmaceutics, medical devices industries and biotechnology companies) in order to be upfront in the development of new compounds and surgical techniques.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Uro-oncology meetings: weekly meetings with urologists, oncologists, radiologist, radiation oncologists and pathologist.
- ▶ Uropediatric meeting: weekly meetings with urologists, pediatricians, nephrologists, radiologists and nurses.
- ▶ Functional urology meeting in chronic pelvic pain: monthly meetings with urologists, anesthesiologists, psychologists and nurses.
- ▶ General and Digestive Surgery Group: collaborative surgical group in complex pelvic tumours and urolithiasis research.
- ▶ Clinical Epidemiology and Helathcare Services Group: bladder and prostate cancer.
- ▶ Inflammatory Group: Biomarkers in urooncology.
- ▶ Paediatrics Group: reseach in uropediatric diseases.

External Collaborations

International academic collaborations, network and consortiums

- ▶ IRCCVTC (International Renal Cell Carcinoma Venous Thrombus Consortium): vena cava thrombus in kidney cancer.
- ▶ European Reference Network for rare and complex urogenital diseases and conditions: rare urogenital pediatric conditions.

- ▶ Aarhus University Molecular Genetics Department: bladder cancer.
- ▶ International Robotic Cystectomy Consortium: robotic cystectomy.
- ▶ LARG (Latin American Renal Cancer Group): renal cancer.
- ▶ IBCG (International Bladder Cancer Group): bladder cancer.
- ▶ IBCN (International Bladder Cancer Network): bladder cancer.
- ▶ European Guidelines EAU Group: Non-Muscle Invasive Bladder Cancer.
- ▶ European Guildelines EAU Group: Urothelial Carcinomas of the Upper Urinary Tract.
- ▶ ERUS working Group on RAKT.
- ▶ Champalimaud Center for the Unknown (Lisbon) and the Malmoe University: High-Grade Non Muscle Invasive Bladder Cancer.
- ▶ Columbia University New York, Urooncology.
- ▶ GENS (Grupo Español de Neuromodulación de Raíces Sacras).
- ▶ IDIBELL: Genetic research in cystinuria.
- ▶ RAP (Phisiotherapy center): quality of life research in incontinence.

Private national and international collaborations

- ▶ Clinical trials and postauthorization studies promoted by national and international pharmaceuticals, medical devices industries and biotechnology companies.

Active Grants

- ▶ Bujons A. Autologous enriched stem cell fat injection for the treatment of abdominal defects in patients with Extrophy- Epispadias Complex. FIU- Pedro Cifuentes Díaz Research Grant. Duration: 2016-2018. 18,000 €.

Note: Total amount granted to PI. It does not include indirect costs.

Awards

- ▶ Second prize by Actas Urológicas Españolas for the article: Rodriguez Faba O, Palou J, Vila Reyes H, Guirado L, Palazzetti A, Gontero P, Vigués F, García-Olaverri J, Fernández Gómez JM, Olsburg J, Terrone C, Figueiredo A, Burgos J, Lledó E, Breda A. Opciones terapéuticas y factores predictivos de recurrencia y mortalidad cáncer-específica en pacientes con tumor vesical después de trasplante renal: análisis multiinstitucional.
- ▶ Platinum Award 2018 by The Platinum Journal to J. Palou for his contribution, dedication and collaboration.
- ▶ Award Rene kuss Prize 2018 to A. Territo, European Association of Urology (EAU). The European Experience on robotic assisted kidney transplantation: 2 years after the beginning. The EAU Section of Transplantation Urology (ESTU) – Copenhagen (Denmark).

- ▶ Second prize to best communication awarded by the Asociación Española de Urología during the Eurostars Dynamics Course in Madrid: O. Mayordomo; C. Gutiérrez; L. Mateu; V. Martínez; C. Errando. Neuromodulación sacra en paciente neurogeno.
- ▶ 2018 John Blandy prize awarded by the BJU International for the communication: F. Pisano. The role of re-transurethral resection in the management of high risk non muscle invasive bladder cancer.

Other national recognitions

- ▶ The Paediatric Urology Unit has a CSUR in Bladder Extrophy.
- ▶ The Paediatric Urology Unit is a Center of Reference for rare disease (XUEC).

Transfer Products

- ▶ During 2018, the group participated in 8 clinical trials with drugs, 3 projects for identification of biomarkers in the urooncology field, 8

projects evaluating devices or surgical techniques and 5 other clinical projects sponsored by private companies or academics.

Main Lines of Research

Radiation Therapy Based on PET/CT Functional Imaging of Tumours

- ▶ Implementation of planning techniques for radiotherapy treatment with PET/CT for chest locations and head and neck tumours squamous cell tumours.
- ▶ Image-guided radiotherapy and respiratory movement control.
- ▶ Salvage brachytherapy for local recurrence after external beam radiotherapy in prostate cancer.
- ▶ Hypofractionated intensity-modulated GRT in prostate cancer.

Scientific Challenges

- ▶ SBRT for Patients with Lung Cancer and with Oligometastases with the intention to increased the quality of life and avoid surgery.
- ▶ Stereotactic body radiotherapy techniques in radical treatment of patients with early-stage non-surgical lung cancer and selected patients with non-surgical oligometastases with the same aim.

Transfer Products

- ▶ Gemma Sancho (PI). A prospective randomised phase III study of androgen deprivation therapy with or without local radiotherapy with or without abiraterone acetate and prednisone in patients with metastatic hormone-naïve prostate cancer. GETUG-AFU 21.UC-0160/1105-EudraCT:2012-000142-35.

Main Lines of Research

Antiresorptives in Orthopedic and Trauma Surgery

- ▶ Effect of zoledronic acid (Aclasta) on periprosthetic bone mineral density in patients undergoing total knee arthroplasty. Study approved by the HSCSP ethics committee and authorized by the Spanish Medicines and Health Products Agency (AEMPS) for the out-of-context indication of Aclasta.

Knee

Haemostasis

- ▶ Blood loss control using tranexamic acid in primary prosthetic and knee revision surgery.
- ▶ Retrospective study of revision knee arthroplasty to compare the effects of intravenous tranexamic acid and normal haemostasis.
- ▶ Clinical trial comparing outcomes for intravenous tranexamic acid with fibrin glue (Tissuocol) and normal haemostasis in primary knee prosthetic surgery.
- ▶ Observational study of blood loss in redon drainage over time in peritrochanteric hip fractures.
- ▶ Randomized multicenter parallel clinical trial in antiaggregated patients with proximal femur fracture that evaluates a strategy to shorten the time to surgery. AFFECT study.

Cartilage

- ▶ Regeneration of cartilage defects using tissue engineering and a matrix seeded with characterized allogeneic chondrocytes.
- ▶ Prospective study on fresh osteochondral allograft transplantation. CT, MRI and clinical outcomes.

Main Lines of Research

- ▶ Involvement of brain areas and release of substances in acute and chronic neuropathic pain.
- ▶ Sleep disturbance on initiating systemic opioid treatment in patients with severe chronic pain and altered sleep patterns.
- ▶ Influence epidural corticosteroids treatment by diferent approach on the effectiveness of the radicular pain due to herniated lumbar disc.
- ▶ Profile in terms of demographics, comorbidities, kind of pain, physical and mentalstatus and diability of patient.
- ▶ Look for a local and non pharmacological treatment for elderly patients with pain.
- ▶ Influence of Radiofrequency lesions in diferent procedures in patients with chronic pain.

Scientific Challenges

- ▶ Establish the possible differences in brain area involvement between acute and chronic pain.
- ▶ Determine the extent of chronic pain according to the involvement of different brain areas and if these alterations can improve with the relive of pain.
- ▶ Determine whether the intensity of chronic neuropathic pain assessed by the patient is correlated with the patient's psychopathology, essentially anxiety, depression and catastrophizing.
- ▶ Determine the profile of patients who would benefit from treatment with major systemic opioids in relation to night rest and establish the recommendable opioid.
- ▶ Establish the recomended opioid dose to start a treatment and how to remove them.

Main Lines of Research

- ▶ Qualitative study of foetal motility by means of 2D ultrasound in foetuses with spinal muscular atrophy.
- ▶ Value of foetal nuchal translucency as a marker of neuromuscular diseases and other monogenic diseases.
- ▶ Usefulness of Doppler ultrasound of the umbilical artery during the second trimester as a discriminator of pregnancies at high risk of poor perinatal outcomes.
- ▶ Cutoff point for foetal pyelectasis as a nephrourologic pathology discriminator.
- ▶ Value of ultrasound in the control of foetal anaemia.

Scientific Challenges

- ▶ Consolidate a line of work with Sant Pau's genetics department concerning possible early clinical manifestations detectable using 2D and 4D ultrasound in foetuses affected by genetic diseases, particularly neuromuscular disorders, given that Sant Pau is a referral centre for a particular group of rare diseases.
- ▶ Screen for chromosomal abnormalities from the ultrasound and biochemistry points of view, investigating the potential usefulness of the markers used either alone or in combination as indicators of populations at risk of placental insufficiency.
- ▶ Investigate the usefulness of new technologies such as 3D power Doppler angiography of the placenta in the diagnosis and control of certain foetal diseases.

Main Lines of Research

- ▶ Off-pump coronary artery by-pass grafting surgery.
- ▶ Mitral repair surgery.
- ▶ Ascending aorta pathology.
- ▶ Pathogenesis of atrial fibrillation after cardiac surgery: electrophysiologic and mitochondrial analysis.
- ▶ Follow-up of sutureless aortic valve prosthesis: Perceval S.
- ▶ Follow-up of surgical check-list implementation.
- ▶ Use of erythropoietin before cardiac surgery.
- ▶ Participation in VISION study (Vascular events In Surgery patients cOhort evaluatioN)-Cardiac Surgery.

Scientific Challenges

- ▶ Consolidation as a research group in different cardiac surgery-related fields, specific sutureless valve prosthesis-perioperative myocardial infarction.
- ▶ Participation in the assessment and validation of new products employed in cardiac surgery: haemostatics, sutures, systems for sternal closure...
- ▶ Collaboration with different national and international research teams involved in our lines of study.

Collaborations

Collaborations with other IIB Sant Pau Groups

- ▶ Leif Hove-Madsen, CSIC. Regulation of Cardiac Rhythm and Contraction.
- ▶ M. Luz Maestre Hittinger. Department of Anaesthesiology.

External Collaborations

- ▶ Elena Domínguez Garrido. Unit of Molecular Diagnosis. Fundación Rioja Salud, La Rioja, Spain.
- ▶ Elisabeth Berastegui. Department of Cardiac Surgery. Hospital Germans Trias i Pujol, Badalona, Spain.
- ▶ Mercé Cladellas Capdevila. Department of Cardiology. Hospital del Mar, Barcelona, Spain.
