

INTERNAL PROMOTION CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it's a priority to ensure that the recruitment of the most suitable candidate to cover a job is carried out through an open selection process, transparent and merit-based (OTM-R). Following these guidelines will promote the mobility of staff, the exchange of knowledge and, ultimately, the increase in the quality of teaching and research. Faithful to the commitment to the human resources strategy of the European Union, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee everyone equal access to a work placement. Therefore, the constitutional principles of equality, merit and capacity are followed, respecting in any case the national and international regulations in force in this area, specifically the European Charter of the Investigator and the Code of Conduct for the recruitment of Researchers (C&C). The principles of C & C are applicable for the recruitment of any staff of the institution, regardless of their professional category.

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Clinical Epidemiology and Health Services Group**:

A5 Manager

About the Unit / Group:

Epidemiology, Public Health and Primary Care: Research in this area involves the study of population health and its social, political and environmental determinants with special attention to inequalities and their consequences. It also evaluates the effectiveness and health impact of public interventions and policies such as the promotion of evidence-based medicine practice in order to make health intervention more effective, appropriate and safe. Also important is the development and evaluation of methods or strategies to improve the generation, evaluation, communication and transfer of scientific evidence. Finally, this area studies the epidemiology of communicable diseases in the population of Barcelona, with special attention to the impact of prevention and control strategies developed. The aim of this

area is, therefore, to achieve public health wellbeing by improving medical policies and management.
