

INTERNAL PROMOTION CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it's a priority to ensure that the recruitment of the most suitable candidate to cover a job is carried out through an open selection process, transparent and merit-based (OTM-R). Following these guidelines will promote the mobility of staff, the exchange of knowledge and, ultimately, the increase in the quality of teaching and research. Faithful to the commitment to the human resources strategy of the European Union, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee everyone equal access to a work placement. Therefore, the constitutional principles of equality, merit and capacity are followed, respecting in any case the national and international regulations in force in this area, specifically the European Charter of the Investigator and the Code of Conduct for the recruitment of Researchers (C&C). The principles of C & C are applicable for the recruitment of any staff of the institution, regardless of their professional category.

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Microbiology and Infectious Diseases**:

AC6- Study Coordinator

About the Unit / Group:

Main lines of research of the Microbiology and Infectious Diseases group:

- **Clinical microbiology**
 - Detection and characterization of different mechanisms of antimicrobial resistance.
 - Tuberculosis, epidemiology and mechanisms of antituberculous resistance.
 - Applications of molecular biology detection of infectious diseases, taxonomy and epidemiology.
 - Description of the microbiome in different clinics.
 - Leishmaniasis: Epidemiology, characterization and diagnosis.
 - Chagas diseases: Epidemiology, diagnosis and study of congenital infection.

- Viral infections: epidemiology, diagnosis and characterization of respiratory viruses and enteroviruses.
- Healthcare projects.
- **Kidney transplant**
 - Biomarkers for BKV in urine samples.
 - CD8+ T immunity to CMV in renal transplant patients treated with thymoglobulin.
 - Kidney transplant program for donors positive for the hepatitis C virus.
 - Hepatitis E virus positive in patients with haemodialysis and kidney transplantation.
 - Study of microbiota in recurrent urinary tract infections.
- **Infectious diseases**
 - Policies of restricted use of antibiotics and antimicrobials and proper use of antimicrobial agents.
 - Study of infections by multidrug-resistant microorganisms to antimicrobials that require isolation from the patient.
 - Study of infections associated with foreign bodies (joint prostheses, catheters, heart prostheses and pacemakers).
 - Tuberculosis.

Essential requirements

- Minimum qualification required: Higher Education (Bachelor's Degree, University Degree) in Health Sciences
- Specific training in Clinical Trials (Master's degree in Clinical Trial Monitoring) or 2 years of accredited professional experience in a similar position
- Training in Good Clinical Practice and Quality standards
- Oral and written knowledge of the two official languages of Catalonia
- Advanced level of English
- Advanced knowledge of office tools (excel, word, power point, etc).
