

INTERNAL / EXTERNAL CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it's a priority to ensure that the recruitment of the most suitable candidate to cover a job is carried out through an open selection process, transparent and merit-based (OTM-R). Following these guidelines will promote the mobility of staff, the exchange of knowledge and, ultimately, the increase in the quality of teaching and research. Faithful to the commitment to the human resources strategy of the European Union, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee everyone equal access to a work placement. Therefore, the constitutional principles of equality, merit and capacity are followed, respecting in any case the national and international regulations in force in this area, specifically the European Charter of the Investigator and the Code of Conduct for the recruitment of Researchers (C&C). The principles of C & C are applicable for the recruitment of any staff of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of the "Excellence in R + D in Research" granted to the IIB de Sant Pau, since 2015.

HR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Information Systems Unit** :

A3A Junior Systems Technician

About the Unit/Group:

The Information Systems Unit is responsible for ensuring that IT systems are reliable, secure and efficient for all users of the organization.

Technology Infrastructure Management: The Information Systems Unit is responsible for managing the organization's entire technology infrastructure, including servers, networks, hardware, mobile devices and operating systems.

Technical support: The Unit provides technical support to the organization's internal users, helping them to resolve technical problems and difficulties related to the use of information technologies. This can range from basic troubleshooting to advanced assistance on specific applications or systems.

Information Security: It is the responsibility of the Information Systems Unit to ensure the security and protection of the organization's data and sensitive information. This involves establishing and implementing security policies, performing audits, managing access control, making regular backups, and responding to security threats or incidents.

Systems development and implementation: The Unit collaborates with other areas of the organization to understand the needs and requirements related to information systems. From this, it is responsible for the development, implementation and maintenance of information systems, applications and technological solutions that are necessary for the different departments and processes of the organization.

Management of technological projects: The Information Systems Unit plays a key role in the management of the organization's technological projects. This involves planning, coordinating and supervising the implementation of new technologies, system upgrades, data migrations and other projects related to the technological infrastructure.

In short, the Information Systems Unit is responsible for ensuring the smooth operation of all the organization's computer and technology systems, as well as providing support and technical solutions to internal users.
