

EXTERNAL CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it's a priority to ensure that the recruitment of the most suitable candidate to cover a job is carried out through an open selection process, transparent and merit-based (OTM-R). Following these guidelines will promote the mobility of staff, the exchange of knowledge and, ultimately, the increase in the quality of teaching and research. Faithful to the commitment to the human resources strategy of the European Union, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee everyone equal access to a work placement. Therefore, the constitutional principles of equality, merit and capacity are followed, respecting in any case the national and international regulations in force in this area, specifically the European Charter of the Investigator and the Code of Conduct for the recruitment of Researchers (C&C). The principles of C & C are applicable for the recruitment of any staff of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of the "Excellence in R + D in Research" granted to the IIB de Sant Pau, since 2015.

HR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the to the **Cellular Immunotherapy and Gene Therapy Group (GITG)**

R2A – Postdoc Junior

About the Unit / Group:

The GITG focuses on the study of genetically modified T cells expressing chimeric antigen receptors (CAR) and their clinical application in patients with hematologic malignancies. The GITG at IR-Sant Pau is a well-established group that develops and manufactures CAR-T cells for treating patients with lymphoid hematologic malignancies. In 2020, our group initiated a Phase I clinical trial, the "first in Europe," with CAR-T30 cells for patients with Hodgkin lymphoma, with Phase II currently underway. In 2023, we initiated a second clinical trial in patients with refractory B-cell lymphomas using memory T cells expressing CAR19. Both CAR-T30 and CAR-T19 products are entirely manufactured at Sant Pau by the GITG following good manufacturing practices.

Current Research Lines:

- Investigation of the antitumor efficacy of memory T cell subtypes.
- Study of the antitumor efficacy of genetically modified stem memory T cells with CAR.
- Development of innovative 4th generation CARs targeting antigens expressed in hematologic malignancies.
- Development of clinical trials for CAR-T cell immunotherapy in patients with lymphoid malignancies; development of academic CAR-Ts.
