

## INTERNAL / EXTERNAL CALL

### The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it's a priority to ensure that the recruitment of the most suitable candidate to cover a job is carried out through an open selection process, transparent and merit-based (OTM-R). Following these guidelines will promote the mobility of staff, the exchange of knowledge and, ultimately, the increase in the quality of teaching and research. Faithful to the commitment to the human resources strategy of the European Union, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee everyone equal access to a work placement. Therefore, the constitutional principles of equality, merit and capacity are followed, respecting in any case the national and international regulations in force in this area, specifically the European Charter of the Investigator and the Code of Conduct for the recruitment of Researchers (C&C). The principles of C & C are applicable for the recruitment of any staff of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of the "Excellence in R + D in Research" granted to the IIB de Sant Pau, since 2015.

HIR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **DNA Repair and Cancer Predisposition Syndromes**:

**R2A – Postdoc Junior**

## About the Unit / Group:

The Genomic Instability Syndromes and DNA Repair research group, coordinated by Dr. Jordi Surrallés, works in the field of human genetic diseases characterized by a high predisposition to cancer. Many of these syndromes are caused by mutations in genes involved in DNA repair. These genes are important in avoiding the accumulation of mutations and preventing tumor transformation. Research on these syndromes is important to unravel the mechanisms that protect us from cancer.

New therapeutic strategies based on a thorough understanding of the genetic causes of the disease are becoming increasingly available. Therefore, a proper genetic diagnosis is important not only to provide good genetic counseling and clinical follow-up to patients and their families, but also to provide personalized medicine based on genomic information
