

INTERNAL / EXTERNAL CALL

The Institute

The **Fundació Institut de Recerca de l'Hospital de la Santa Creu i Sant Pau** (IR Sant Pau) is a scientific foundation whose mission is to improve the health and quality of life of the population through the production and dissemination of scientific knowledge, the training of researchers at an international level, and the promotion of innovation and health by incorporating medical advances into clinical practice and health policies. Created in 1992, it has been a center of excellence in research affiliated with the Autonomous University of Barcelona (UAB) since 2009 and, since 2011, a CERCA center (Centres de Recerca de Catalunya).

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research" granted to the IIB Sant Pau, since 2015.

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **NEUROBIOLOGY OF DEMENTIAS** group:

AC8- Clinical Researcher

About the Unit / Group:

This line of research focuses on identifying and describing new biological markers with potential utility for the diagnostic and prognostic evaluation of patients with Alzheimer's disease and other neurodegenerative diseases, such as frontotemporal dementia or dementia with Lewy bodies. Biochemical markers can be measured in different biological fluids such as plasma, serum, or cerebrospinal fluid, and their study has improved the diagnosis of these patients and helped to evaluate the relationships between various pathophysiological pathways of neurodegenerative diseases, both in clinical and preclinical stages. The SPIN cohort (Sant Pau Initiative on Neurodegeneration) has been key in biomarker studies. Additionally, work is being carried out to identify new synaptic markers in Alzheimer's disease and frontotemporal dementia through several funded projects.
