

INTERNAL / EXTERNAL CALL

The Institute

The **Research Institute Foundation of the Hospital de la Santa Creu i Sant Pau** (IR Sant Pau) is a scientific foundation whose mission is to improve the health and quality of life of the population through the production and dissemination of scientific knowledge, the training of researchers at an international level, and the promotion of innovation and healthcare by incorporating medical advances into clinical practice and health policies. Created in 1992, it has been an excellence research center affiliated with the Autonomous University of Barcelona (UAB) since 2009 and, since 2011, a CERCA center (Research Centers of Catalonia).

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research", since 2015.

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the Cellular Immunotherapy and Gene Therapy Group (GITG):

T2- Research Technician

About the Unit / Group:

The Cellular Immunotherapy and Gene Therapy Group (GITG) of the Hematology Service focuses on the study of genetically modified T cells that express antigen-specific chimeric receptors (CAR) and their clinical application in patients with hematological malignancies

The GITG group at IR-Sant Pau is a consolidated team that develops and manufactures CART cells for the treatment of patients with lymphoid hematological malignancies. In 2020, our group initiated a Phase I clinical trial, "first in Europe," with CART30 (HSP-CAR30) cells for patients with Hodgkin lymphoma, whose Phase II is ongoing. In 2023, a second clinical trial was launched in patients with refractory B-cell lymphomas using memory T cells expressing CAR19 (HSP-CAR19M). The CART30 and CART19 products are entirely manufactured at Sant Pau by the GITG group following Good Manufacturing Practice (GMP) guidelines.

Current research lines focus on:

- Investigating the antitumor efficacy of memory T cell subtypes.
- Studying the antitumor efficacy of genetically modified "stem" memory T cells with CARs.
- Developing innovative 4th-generation CARs targeting antigens expressed in hematological malignancies.
- Conducting clinical trials of CAR T-cell immunotherapy in patients with lymphoid malignancies; developing academic CART therapies.

Essential requirements

- Minimum qualification required: Higher Education (University Diploma or University Degree) or equivalent.
- Oral and written knowledge of the two official languages of Catalonia or, failing this, the selected candidate must demonstrate, or undertake to acquire, within a period not exceeding one year, a correct knowledge of two official languages in Catalonia
- Intermediate level of English
- Intermediate level of office tools (Excel, Word, Power Point, etc.).

Skills will be valued

- Knowledge of immunology, immunotherapy, tumor immunology assays, and molecular biology (qPCR).
- Experience in the development of CART therapies.
- Experience in flow cytometry and cell culture.

Functions

- Conducting quality control studies of CART products under GMP regulations: cellular characterization by flow cytometry, cytotoxicity assays, molecular analysis.
- Data interpretation and presentation at scientific meetings.
- Material management according to GMP regulations.
- Maintenance and review of equipment.
- Immunological monitoring of patients receiving CART therapy.

Offered

- Permanent contract linked to the research line Teràpia CART para Neoplasias Hematològiques
- Annual working hours: 1,627.50 hours (37.5 hours/week).
- Salary according to the collective agreement.
- Research Group: Cellular Immunotherapy and Gene Therapy Group (GITG).
